Self-objectification in Women Stacey Tantleff-Dunn 2011 Modern industrialized society chronically and pervasively objectifies the female body, and many women have come to view themselves through the lens of an external observer, habitually monitoring their own appearance whether in public or private settings. Given the negative effects associated with self-objectification-such as body shame, appearance anxiety, depression, and disordered eating-an empirically based approach to researching and treating self-objectification is critical. This book integrates recent research developments and current clinical knowledge on self-objectification in women. Using Barbara L. Fredrickson and Tomi-Ann Roberts' objectification theory as a framework, the contributors address various aspects of the theory, including evidence for and causes of self-objectification across the life span, psychological consequences, and associated mental health risks. The book also discusses various scales for measuring self-objectification, as well as approaches to prevent and disrupt this phenomenon. With research from a variety of disciplines-psychology, sociology, anthropology, women's studies, and political science-this book should be read by everyone interested in the well-being of women.

Treatment of Sex Offenders D. Richard Laws 2016-02-29 This rigorous survey offers a comprehensive rethinking of the assessment and treatment of sexual offenders for a bold challenge to practitioners. It critiques what we understand about offenders and the mechanisms of offending behaviors, and examines how this knowledge can best be used to reduce offending and relapses. To this end, experts weigh the efficacy of common assessment methods and interventions, the value of prevention programs, and the validity of the DSM's classifications of paraphilias. This strengths/weaknesses approach gives professional readers a guide to the current state as well as the future of research, practice, and policy affecting this complex and controversial field. Included in the coverage: Strengths of actuarial risk assessment. Risk formulation: the new frontier in risk assessment and management. Dynamic risk factors and offender rehabilitation: a comparison of the Good Lives Model and the Risk-Need-Responsivity Model. The best intentions: flaws in sexually violent predator laws. Victims of Sexual Assault and Abuse Michele Antoinette Paludi 2010 A team of educators, counselors, and scholars examine the widespread problem of sexual assault and abuse in the United States from a legal, criminal justice, psychological, clinical, and legislative perspective. Sexing the Look in Popular Visual Culture Kathy Justice Gentile 2020-05-15 With dramatic advances in media technology, the practice of sexing or erotically enhancing images has become an increasingly widespread phenomenon. The eroticized "look," as both noun and verb, the thing or image that draws our look, and the look that we bestow on images that elicit our visual, physiological, and emotional attention, is the focus of the essays in this volume. Every day, whether we are out in the world or in the workplace or in the privacy of our homes, we enter visual fields that heighten and distort reality, distortions that often emphasize sexuality and erotic promise. The contributors for this collection look at the sexualization of visual culture from a range of disciplinary perspectives, including literature, film studies, history, philosophy, art history, and media studies, with gender and sexuality studies providing the encompassing critical framework that binds these essays into a coherent analytical project. The essays in this collection offer new theoretical conceptions of perception and representation, as well as rigorous reconsiderations of the polarized feminist debates over pornographic images. Essays on literature and film range from an interrogation of Baudrillard's theory of seduction that posits femininity as a strategy of illusion and subversion to Bridget Jones's challenge to the prevailing disciplinary regime that prescribes rigid standards for feminine beauty to a reevaluation of the subversive potential of sexy female robots. Other contributors consider the history of nudist images in US periodicals, the proliferation of eroticized images of girls in new digital technologies, gentlemanly masculinity in men's fashion in late Victorian England, and a rape prevention campaign's unintentional reinforcement of persistent heterosexist misconceptions about rape.

Family Violence in the United States Denise A. Hines 2020-08-24 Family Violence in the United States takes an ecological approach to examining violence and abuse within the context of families. Easy-to-read chapters are organized by exploring the "Scope of the Problem", definitions of key terminology, predictors, and consequences of different forms of maltreatment. Attention is paid to larger social systems that can contribute to abuse, as well as community, relationship, and individual predictors of both perpetration and victimization. Additionally, there is an emphasis on both prevention and intervention of family violence at various levels of the ecological model. Authors Denise A. Hines, Kathleen Malley-Morrison, and Leila B. Dutton help students explore what family violence is and the reasons why it happens. Their approach covers contemporary and controversial topics across the lifespan, including maltreatment of male partners by women, of parents, within sexual minority relationships, and on college campuses. This 3rd edition is filled with chapter-opening cases to prompt discussion within the classroom as well as considerations of context and application in the larger community. Rich in scholarly references and case materials, it is suitable for advanced undergraduates, graduate students, and professionals alike.

Handbook of Positive Body Image and Embodiment Niva Piran 2019-04-02 For five decades, negative body image has been a major focus of study due to its association with psychological and social morbidity, including eating disorders. However, more recently the body image construct has broadened to include positive ways of living in the body, enabling greater understanding of embodied well-being, as well as protective factors and interventions to guide the prevention and treatment of eating disorders. Handbook of Positive Body Image and Embodiment is the first comprehensive, research-based resource to address the breadth of innovative theoretical concepts and related practices concerning positive ways of living in the body, including positive body image and embodiment. Presenting 37 chapters by world-renowned experts in body image and eating behaviors, this state-of-the-art collection delineates constructs of positive body image and embodiment, as well as social environments (such as families, peers, schools, media, and the Internet) and therapeutic processes that can enhance them. Constructs examined include positive embodiment, body appreciation, body functionality, body image flexibility, broad conceptualization of beauty, intuitive eating, and attuned sexuality. Also discussed are protective factors, such as environments that promote body acceptance, personal safety, diversity, and activism, and a resistant stance towards objectification, media images, and restrictive feminine ideals. The handbook also explores how therapeutic interventions (including Acceptance and Commitment Therapy, Cognitive Dissonance, and many more) and public health and policy initiatives can inform scholarly, clinical, and prevention-based work in the field of eating disorders.

Resources in Education 1998

Redefining Babes, Booze and Brawls Lu Luo Hong 1999 Despite evidence that 90% of violent crimes are committed by men, higher education professionals and researchers still understand relatively little about the process by which male students acquire the attitudes, knowledge, values and skills which serve as deterrents to perpetrating violence against women and against other men. Men Against Violence is a peer advocacy organization at a large, public Research I institution in the South which focuses on the special and unique responsibility men have to end violence. Through participation in a wide array of service learning, community action and leadership opportunities, MAV members challenge cultural norms which link masculinity with violence. Types of violence targeted by MAV include: fighting, domestic violence, rape, vandalism, hazing, harassment, hate crimes, homicide and suicide. Utilizing a sociological, public health perspective that incorporates theories of masculinity and models of student development, this dissertation is a case study of the organization Men Against Violence. It examines the ways in which a close-knit association of men generated and sustained an organizational culture that encourages and rewards non-violence among its members, as well as begins to reframe traditional conceptions of masculinity. Subjects for this study consisted of the eight male students who comprised the 1997-1998 Executive Board of MAV. Primary research questions were: (1) What are the characteristics of an organizational culture of non-violence that is created and maintained among a close-knit group of male college students? (2) How can higher education professionals, particularly women, facilitate the process of creating such an organizational culture? Chapter 1 addresses methodological concerns in the dissertation; Chapters 2 and 3 review current literature regarding men and campus violence; Chapter 4 provides a historical narrative of the founding and development of MAV; Chapter 5 presents cultural themes which emerged during content analysis of data from ethnographic interviews and participant-observation; and Chapter 6 offers theoretical and practical implications of the study.

Handbook on Sexual Violence Jennifer M. Brown 2011-10-19 This book contextualizes the complexity of sexual violence within its broader context - from war to the resolution of interpersonal disputes - and covers a wide span including sexual harassment, bullying, rape and murder as well as domestic violence. Written by leading academics from a variety of disciplines, contributions also include commentaries that relate the research to the work of

practitioners. Despite advances made in the investigation of sexual offences, evidence still points to a continued belief in the culpability of victims in their own victimization and a gap between the estimated incidence of sexual violence and the conviction of perpetrators. Adopting an implicitly and explicitly critical stance to contemporary policy responses that continue to fail in addressing this problem, this book focuses on attitudes and behaviour towards sexual violence from the point of view of the individual experiencing the violence - perpetrator and victim - and situates them within a broader societal frame. It is through an understanding of social processes and psychological mechanisms that underpin sexual violence that violence can be combated and harm reduced, and at this individual level that evidence-based interventions can be designed to change policy and practice. The Handbook is split into four sections: 'Legacies: Setting the Scene' offers a critical overview of historical, legal and cultural processes which help to explain the origins of current thinking and offer steers for future developments 'Theories and Concepts' examines contemporary thinking on sexual violence and reviews explanatory frameworks from a number of perspectives 'Acts of Sexual Violence' reviews a number of specific types of sexual violence, elaborating the range of circumstances, victims and perpetrators with a view to addressing the general and pervasive nature of such violence thus contradicting narrow cultural stereotyping 'Responding to Sexual Violence' overviews and evaluates current policies and practices and offers new ideas to develop different types of interventions. The editors' conclusion not only draws out the key themes and ideas from contributions to the Handbook, but also considers the nature of and the extent to which any progress has been made in understanding and responding to sexual violence. This will be a key text for students and academics studying sexual violence and an essential reference tool for professionals working in the field including police officers, probation staff, lawyers and judges.
