The Island of the Day Before

Umberto Eco 2006-06-05 A

17th century Italian nobleman is marooned on an empty ship in this “astonishing intellectual journey” by the author of

Foucault’s Pendulum (San Francisco Chronicle). In the

year 1643, a violent storm in the South Pacific leaves

Roberto della Griva

shipwrecked—on a ship. Swept

from the Amaryllis, he has

managed to pull himself aboard

the Daphne, anchored in the

bay of a beautiful island. The

ship is fully provisioned, he

discovers, but the crew is

missing. As Roberto explores

the different cabinets in the

hold, he looks back on various

episodes from his life: Ferrante,

his imaginary evil brother; the

siege of Casale, that

meaningless chess move in the Thirty Years' War in which he lost his father and his illusions; and the lessons given him on Reasons of State, fencing, the writing of love letters, and blasphemy. In this

“intellectually stimulating and dramatically intriguing” novel, Umberto Eco conjures a young dreamer searching for love and meaning; and an old Jesuit who, with his clocks and maps, has plumbed the secrets of longitudes, the four moons of Jupiter, and the Flood (Chicago Tribune).

Mensa Mind Busters Philip J.

Carter 2002 This gigantic new

puzzle book from Mensa

includes more than 500

puzzles, from cunning

numerical conundrums and

testing word games to logic

teasers, enigmatic lateral

thinking tests, and abstract

visual problems. Because they

don't follow any special pattern,

you'll never know what fiendish

challenge is lying in wait on the

next page. Get some practice in

puzzle thinking with the easy

section, build mental muscles in

the medium section, and gain a

fighting chance for the really hard part. No special skills or abilities are needed, just a bit of common sense, some basic literacy, the ability to think things through, and the stubborn willpower and determination not to be defeated by a mere puzzle.

Logical Deduction Puzzles

George J. Summers 2006 It's not elementary, but you will need Holmes's famed powers of deduction to solve these crafty puzzles. Here's how it goes: at the end of each conundrum, you'll find at least one condition--and sometimes more--that the solution must meet. For example, here's the first, relatively simple problem: Mr. Scott, his sister, his son, and his daughter are tennis players. The best player's twin and the worst player are of the opposite sex. The best player and the worst player are the same age. Which one of the four is the best player? Did you figure out that Mr. Scott's sister had to be the same age as his children? A few of the puzzles demand a basic knowledge of algebra, and others feature

drawings or diagrams.

Abandoned by his wife and child, sick and alone, he was transported while unconscious to a magical, dreamlike world called the Land. Convinced it was all a delusion, Covenant was christened The Unbeliever by the Land's inhabitants—but gave his life to save this new-found world he came to regard as precious. Ten years after Covenant's death, Linden Avery still mourns for her beloved companion. But a violent confrontation with Covenant's son, who is doing the evil Lord Foul's bidding, forces her into the Land, where a dark malevolence is about to unmake the laws of nature—and of life and death

A Confederacy of Dunces John Kennedy Toole 2007-12-01 Winner of the Pulitzer Prize "A masterwork . . . the novel

astonishes with its inventiveness . . . it is nothing less than a grand comic fugue."—The New York Times Book Review A Confederacy of Dunces is an American comic masterpiece. John Kennedy Toole's hero, one Ignatius J. Reilly, is "huge, obese, fractious, fastidious, a latter-day Gargantua, a Don Quixote of the French Quarter. His story bursts with wholly original characters, denizens of New Orleans' lower depths, incredibly true-to-life dialogue, and the zaniest series of high and low comic adventures" (Henry Kisor, Chicago Sun-Times).
