After Cooling Eric Dean Wilson 2022-07-19

This “ambitious [and] delightful” (The New York Times) work of literary nonfiction interweaves the science and history of the powerful refrigerant (and dangerous greenhouse gas) Freon with a haunting meditation on how to live meaningfully and morally in a rapidly heating world. In *After Cooling*, Eric Dean Wilson braids together air-conditioning history, climate science, road trips, and philosophy to tell the story of the birth, life, and afterlife of Freon, the refrigerant that ripped a hole larger than the continental United States in the ozone layer. As

he traces the refrigerant’s life span from its invention in the 1920s—when it was hailed as a miracle of scientific progress—to efforts in the 1980s to ban the chemical (and the resulting political backlash), Wilson finds himself on a journey through the American heartland, trailing a man who buys up old tanks of Freon stockpiled in attics and basements to destroy what remains of the chemical before it can do further harm. Wilson is at heart an essayist, looking far and wide to tease out what particular forces in American culture—in capitalism, in systemic racism, in our values—combined to lead us into the Freon crisis and then out. “Meticulously researched and engagingly written” (Amitav Ghosh), this “knockout debut” (New York Journal of Books) offers a rare glimpse of environmental hope, suggesting that maybe the vast and terrifying problem of global warming is not beyond our grasp to face.

Poison Ivy Evan Mandery 2022-10-25 An eye-opening look at how America’s elite colleges and

suburbs help keep the rich rich—making it harder than ever to fight the inequality dividing us today. The front-page news and the trials that followed Operation Varsity Blues were just the tip of the iceberg. *Poison Ivy* tells the bigger, seedier story of how elite colleges create paths to admission available only to the wealthy, despite rhetoric to the contrary. Evan Mandery reveals how tacit agreements between exclusive “Ivy-plus” schools and white affluent suburbs create widespread de facto segregation. And as a college degree continues to be the surest route to upward mobility, the inequality bred in our broken higher education system is now a principal driver of skyrocketing income inequality everywhere. Mandery—a professor at a public college that serves low- and middle-income students—contrasts the lip service paid to “opportunity” by so many elite colleges and universities with schools that actually walk the walk. Weaving in shocking data and captivating interviews with students and administrators

alike, *Poison Ivy* also synthesizes fascinating insider information on everything from how students are evaluated, unfair tax breaks, and questionable fundraising practices to suburban rituals, testing, tutoring, tuition schemes, and more. This bold, provocative indictment of America’s elite colleges shows us what’s at stake in a faulty system—and what will be possible if we muster the collective will to transform it.

Computational Data and Social Networks

Xuemin Chen 2018-12-11 This book constitutes the refereed proceedings of the 7th International Conference on Computational Data and Social Networks, CSoNet 2018, held in Shanghai, China, in December 2018. The 44 revised full papers presented in this book together with 2 extended abstracts, were carefully reviewed and selected from 106 submissions. The topics cover the fundamental background, theoretical technology development, and real-world

applications associated with complex and data network analysis, minimizing in uence of rumors on social networks, blockchain Markov modelling, fraud detection, data mining, internet of things (IoT), internet of vehicles (IoV), and others.

The Greatest Secret Orison Swett Marden
2019-11-07 CONTROL YOUR THOUGHTS, CONTROL YOUR DESTINY We are the product of our thoughts, yet none of us has truly chosen the thoughts we have grown up with. They are the thoughts of our families, our culture, our religious teachings, and those of our peers. Consequently, none of us has attained the full life we desired for ourselves. Modern science has proved that intelligence is not confined to the brain cells, but that we think as a whole, and that all the cell life takes part in the thinking process. Every thought, every impression made on the mind, every mental attitude, affects all of the cells of the body. For that reason, this classic text by Orison Swett Marden and updated by

David H. Morgan may be the most important book you will ever read. If our thoughts are our destiny, in reading this book, you will discover: • Thought, Our Incredible Life-Force • The Power of Thought In Creating Self-Confidence • The Power of Thought in Creating Health • The Power of Thought in Creating Happiness • The Power of Thought in Creating Prosperity • The Power of Thought to Prevent Aging These ideas and techniques will enable you to create a life where you control your own destiny...your ideals, your dreams, your hopes. OUR THOUGHTS AND IMAGINATION ARE THE ONLY REAL LIMITS TO OUR POSSIBILITIES. — Orison Swett Marden

THE MIRACLES OF RIGHT THOUGHT Orison Swett Marden 2017-07-06 In words of the author

this book teaches us the importance of having the 'right' thoughts about ourselves. It teaches that we should strangle every idea of deficiency, imperfection, or inferiority, and however much our apparent conditions of discord, weaknesses, poverty, and ill-health may seem to contradict, cling tenaciously to our vision of perfection. A positive outlook certainly goes a long way in overcoming fear and being happy. Spread over fifteen chapters and a conversational way of writing, it would surely interest those who are looking for a well-rounded, successful life. Dr. Orison Swett Marden (1848-1924) was an American inspirational author who wrote about achieving success in life and founded SUCCESS magazine in 1897. He is often considered as the father of the modern-day inspirational talks and writings and his words make sense even to this day. In his books he discussed the common-sense principles and virtues that make for a well-rounded, successful life. Excerpt: "What we yearn for, earnestly desire and strive to bring

about, tends to become a reality. Our ideals are the foreshadowing outlines of realities behind them—the substance of the things hoped for."

The Key to Prosperity Dr. Orison Swett Marden 2020-03-12 DR. ORISON SWETT MARDEN was an American inspirational author who founded Success Magazine in 1897. His writings focus on common-sense principles for achieving success while still enjoying a well-rounded life. Many of his ideas are based on New Thought philosophy. Marden bridged the gap between the old notion of success made popular by authors such as Napoleon Hill, Dale Carnegie, Norman Vincent Peale and today's authors like Stephen R. Covey and Brian Tracy. In *The Key to Prosperity*, Marden shows how a positive mind is a magnet for abundance and wealth. He teaches that you need to play the part of your ambition. If you want to be prosperous, act like you are. If you are trying to show opulence, you have to intensely feel opulent, think opulence, and appear opulent and

your entire being needs to be filled with confidence. Above all, you must erase all fears of poverty and failure from your mind. Prosperity can be yours if you follow Marden's lessons, including: How to Make Your Dreams Come True Making Yourself a Prosperity Magnet Conquering the Ultimate Prosperity Obstacle How to Make Yourself Lucky The Law of Opulence How to Attract Prosperity Financing Yourself The Secret Key to Prosperity "The constant aspiration to measure up to a high ideal is the only force in heaven or on earth that can make a life great."

Educated Tara Westover 2018-02-20 #1 NEW YORK TIMES, WALL STREET JOURNAL, AND BOSTON GLOBE BESTSELLER • One of the most acclaimed books of our time: an unforgettable memoir about a young woman who, kept out of school, leaves her survivalist family and goes on to earn a PhD from Cambridge University "Extraordinary . . . an act

of courage and self-invention.”—The New York Times NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY THE NEW YORK TIMES BOOK REVIEW • ONE OF PRESIDENT BARACK OBAMA’S FAVORITE BOOKS OF THE YEAR • BILL GATES’S HOLIDAY READING LIST • FINALIST: National Book Critics Circle’s Award In Autobiography and John Leonard Prize For Best First Book • PEN/Jean Stein Book Award • Los Angeles Times Book Prize Born to survivalists in the mountains of Idaho, Tara Westover was seventeen the first time she set foot in a classroom. Her family was so isolated from mainstream society that there was no one to ensure the children received an education, and no one to intervene when one of Tara’s older brothers became violent. When another brother got himself into college, Tara decided to try a new kind of life. Her quest for knowledge transformed her, taking her over oceans and across continents, to Harvard and to Cambridge University. Only then would she wonder if she’d

traveled too far, if there was still a way home. “Beautiful and propulsive . . . Despite the singularity of [Westover’s] childhood, the questions her book poses are universal: How much of ourselves should we give to those we love? And how much must we betray them to grow up?”—Vogue NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post • O: The Oprah Magazine • Time • NPR • Good Morning America • San Francisco Chronicle • The Guardian • The Economist • Financial Times • Newsday • New York Post • theSkimm • Refinery29 • Bloomberg • Self • Real Simple • Town & Country • Bustle • Paste • Publishers Weekly • Library Journal • LibraryReads • Book Riot • Pamela Paul, KQED • New York Public Library

The Vital Balance Albert Gresswell 1913
Self-Taught Chris Edwards 2022-12-14 The American educational structure is a feudal system designed around an inefficient seat time model. This structure sets students against each

other in competition, creates zip-code inequalities, and empowers an expensive and often damaging bureaucratic class of administrators. Due to shortages of teachers and staff, and to needless problems with curricula and testing, this system is about to fall.

Historically, when feudal systems collapse, they create opportunities for new structures to emerge. Technology has made it possible to develop a new educational model that connects students to their community and reduces pressure on students and teachers. This new model makes it possible to deliver high quality education for all students, regardless of zip code, while turning students into active learners.

Self Taught: Moving from a Seat Time Model to a Mastery Learning Model explains how this process can begin by asking just one question: what would you do if you needed to learn something?

Aeschylus' Use of Psychological Terminology Shirley Darcus Sullivan 1997 Annotation Sullivan (classics, U. of British Columbia) analyzes how the 6th-5th BC Greek poet used eight key psychological terms that appear frequently in ancient Greek texts but have a wide range of possible meanings. She also compares his use with that of earlier and contemporary poets, including Homer, Hesiod, Pindar, and Bacchylides, to assess the degree to which his usage was innovative or traditional. She very adroitly explains the use of the Greek terms for readers who do not read Greek. Canadian card order number: C97-900392-X. Annotation c. by Book News, Inc., Portland, Or. *Success Fundamentals* Orison Swett Marden 1920
