true for those who are new to research, or who belong to groups that are underrepresented in research. The Entering Research curriculum offers a mechanism to structure the independent research experience, and help students overcome these challenges.

**Athena Rising** W. Brad Johnson 2019-12-03 When it comes to mentoring, women face more barriers than men. Here's how men can help change that. Increasingly, new employees and junior members of any profession are encouraged--sometimes stridently--to "find a mentor!" Four decades of research reveals that the effects of mentorship can be profound and enduring; strong mentoring relationships have the capacity to transform individuals and entire organizations. But the mentoring landscape is unequal. Evidence consistently shows that women face more barriers in securing mentorships than men, and when they do find a mentor, they may reap a narrow range of both professional and psychological benefits. *Athena Rising* is a book for men about how to eliminate this problem by mentoring women deliberately and effectively. Traditional notions of mentoring are modeled on male-to-male relationships, yet women often report a desire for mentoring that addresses their interpersonal needs. Women want mentors who not only understand this, but truly honor it. Coauthors W. Brad Johnson and David G. Smith present a straightforward, no-nonsense manual for men working in all types of institutions, organizations, and businesses to become excellent mentors to women, because as women succeed, lean in, and assume leading roles in any organization or work context, the culture will become more egalitarian, effective, and prone to retaining top talent.

**Faculty Mentoring** Susan L. Phillips 2015-08-13 Faculty mentoring programs greatly benefit the institutions that have instituted them, and are effective in attracting and retaining good faculty. Prospective faculty members commonly ask about mentoring at on-campus interviews, and indicate that it is a consideration when choosing a position. Mentoring programs also increase the retention rate of junior faculty, greatly reducing recruitment costs, and particularly help integrate women, minority and international faculty members into the institution, while providing all new hires with an orientation to the culture, mission and identity of the college or university. The book provides step-by-step guidelines for setting up, planning, and facilitating mentoring programs for new faculty members, whether one-on-one, or using a successful group model developed and refined over twenty-five years by the authors. While it offers detailed guidance on instituting such programs at the departmental level, it also makes the case for establishing school or institutional level programs, and delineates the considerable benefits and economies of scale these can achieve. The authors provide guidance for mentors and mentees on developing group mentoring and individual mentor / protégé relationships - the corresponding chapters being available online for separate purchase; as well as detailed outlines and advice to department chairs, administrators and facilitators on how to establish and conduct institution-wide group mentoring programs, and apply or modify the material to meet their specific needs. For training and faculty development purposes, we also offer two chapters as individual e-booklets. Each respectively provides a succinct summary of the roles and expectations of the roles of Mentor and Mentee. *Faculty Mentoring / Mentor Guide* *Faculty Mentoring / Mentee Guide* The booklets are affordably priced, and intended for individual purchase by mentors and mentees, and are only available through our Web site.
