African American Leadership and Mentoring Through Purpose, Preparation, and Preceptors

Pichon, Henrietta Williams 2021-12-10 The lack of African Americans in leadership roles within the academy creates a real crisis in the leadership pipeline. One of the problems could be that the

pathways to leadership for African Americans are less visible. They can see the end result but may be less clear about how to get there. Oftentimes, understanding these pathways to leadership is less academic in nature and more informal and/or relational. Thus, the relationship between leadership and mentorship for African Americans is especially important to advancing in the academy. Further guidance and understanding of steps to advancement from established African American leaders in the academy is therefore needed. *African American Leadership and Mentoring Through Purpose, Preparation, and Preceptors* provides an exhaustive exploration of leadership and mentorship through purpose, preparation, and preceptors. This edited book explains how to identify ways that individuals can strengthen their career trajectory, determine strategies to employ for career advancement, establish lasting and impactful

mentoring-the-tao-of-giving-and-receiving-wisdom

connections with key stakeholders per career aspirations, provide guidance for individuals seeking advancement within the academy, and explore current theoretical and practical nuances with regard to research, literature, and application of leadership and mentorship of African Americans in the academy. Covering topics such as cross-racial mentorship, emotionally intelligent leadership, and African American leaders, this text is ideal for teachers, faculty, university administrators, leaders in education, aspiring future leaders, researchers, academicians, and students.

Mentoring Across Generations Andrea S. Taylor 2012-12-06 Currently, blame for the difficulties facing youth is too often laid on one particular segment of the community - whether parents, school personnel or the children themselves. However, the problems of today's young people are problems for all generations. In response, the past decade has seen unparalleled proliferation of planned mentoring initiatives. *Across Ages*, the multi-faceted and multigenerational intervention described in this volume, uses older adult volunteers as mentors for young people. By acting

mentoring-the- tao-of-giving-and-receiving-wisdom

as advocates, challengers, nurturers, role models and friends, older mentors help children develop the awareness, self-confidence, and skills they need to overcome overwhelming obstacles. *Across Ages* is cost-effective and feasible even where resources are fairly limited. Although designed as a school-based model, this program can easily be adopted to other settings. Each of the four major program components - mentoring, community service, 'life skills' instruction, and family support - is described in step-by-step detail.

Rise of the DEO Maria Giudice 2013-10-04 The

majority of companies, their employees and their leaders navigate a space where competitors appear overnight, customers demand innovations monthly, business plans rarely last a full year and career ladders have been replaced by trampolines. This environment of constant change will only accelerate in the future and traditional business leaders are ill equipped to deal with it. Just as we took our cues from MBAs and the military in casting the ideal CEO of the 20th century, we can look to design - in its broadest form - to model our future leader, the DEO. These leaders possess characteristics, behaviors and mindsets that allow them to excel in unpredictable, fast-moving and value-charged conditions. They are catalysts for transformation and agents of change. A hybrid of strategic business executive and creative problem-solver, the DEO is willing to take on anything as an object of design and looks at ALL problems as design

challenges. Readers will learn not only why this form of leadership is essential to the success of modern organizations, but also what characteristics are best suited to this role. Through intimate conversations with leading DEOs, we explore the mindsets, communities, processes and practices common to creative business leaders. The book lays out—graphically and through example—how DEOs run their companies and why this approach makes sense now. We help readers identify these skills in themselves and their colleagues, and we guide them in using these skills to build, revive or reinvent the next generation of great companies and organization.

Managers As Mentors Chip R. Bell 2013-06-03
NEW EDITION, REVISED AND UPDATED This latest edition of the classic *Managers as Mentors* is a rapid-fire read that guides leaders in helping associates grow in today's tumultuous organizations.

Thoroughly revised throughout with twelve new chapters, this edition places increased emphasis on the mentor acting as a learning catalyst with the protégé rather than simply handing down knowledge. As with previous editions, a fictional case study of a mentor-protégé relationship runs through the book. But now this is augmented with interviews with six top US CEOs. New chapters cover topics such as the role of mentoring in spurring innovation and mentoring a diverse and dispersed workforce accustomed to interacting digitally. Also new to this edition is the Mentor's Toolkit, six resources to help in developing the mentor-protégé relationship. This hands-on guide teaches leaders to be the kind of confident coaches integral to learning organizations.

Faculty mentoring programs greatly benefit the institutions that have instituted them, and are

effective in attracting and retaining good faculty. Prospective faculty members commonly ask about mentoring at on-campus interviews, and indicate that it is a consideration when choosing a position. Mentoring programs also increase the retention rate of junior faculty, greatly reducing recruitment costs, and particularly help integrate women, minority and international faculty members into the institution, while providing all new hires with an orientation to the culture, mission and identity of the college or university. The book provides step-by-step guidelines for setting up, planning, and facilitating mentoring programs for new faculty members, whether one-on-one, or using a successful group model developed and refined over twenty-five years by the authors. While it offers detailed guidance on instituting such programs at the departmental level, it also makes the case for establishing school or institutional level programs,

and delineates the considerable benefits and economies of scale these can achieve. The authors provide guidance for mentors and mentees on developing group mentoring and individual mentor / protégé relationships – the corresponding chapters being available online for separate purchase; as well as detailed outlines and advice to department chairs, administrators and facilitators on how to establish and conduct institution-wide group mentoring programs, and apply or modify the material to meet their specific needs. For training and faculty development purposes, we also offer two chapters as individual e-booklets. Each respectively provides a succinct summary of the roles and expectations of the roles of Mentor and Mentee. Faculty Mentoring / Mentor Guide Faculty Mentoring / Mentee Guide The booklets are affordably priced, and intended for individual purchase by mentors and mentees, and are only available through our Web site.

In today's networked world society, mentoring is a crucial area for study that requires a deep international understanding for effective implementation. Despite the immense benefits of mentoring, current literature on this subject is surprisingly sparse. The Wiley International Handbook of Mentoring fills the need for a comprehensive volume of in-depth information on the different types of mentoring programs, effective mentoring practices, and emerging practical and applicable theories. Based on sound research methodologies, this unique text presents original essays by experts from over ten different countries, demonstrating the ways mentoring can make a difference in the workplace and in the

classroom; these experts have an understanding of mentoring worldwide having worked in mentoring in over forty countries. Each of the Handbook's four sections—mentoring paradigms, practices, programs, and possibilities—include a final synthesis chapter authored by the section editors that captures the essence of the lessons learned, applies a global context, and recommends research avenues for further exploration. This innovative volume demonstrates how mentoring in any culture can help employees to complete tasks and advance in their positions, aid in socialization and assimilation in various settings, provide diverse groups access to resources and information, navigate through personalities, politics, policies, and procedures, and much more. Offers an inclusive, international perspective that supports moving mentoring into a discipline of its own and lays a theoretical foundation for further research Shows
