The Geopsychology Theory of International Relations in the 21st Century B. M. Jain 2021-02-15 This book introduces an innovative theoretical construct of geopsychology to navigate the complex dynamics of international politics in the 21st century. It explains how geopsychology is different from mainstream international relations theories in terms of primary actors, human behavior, spatial application, instruments, and key issues. It argues that peace and stability in the troubled parts of the world warrants an imperative need for understanding psychological dispositions of non-state actors and authoritarian regimes. In The Geopsychology Theory of International Relations in the 21st Century: Escaping the Ignorance Trap, B.M.Jain unfolds that neither a global hegemon nor a cohort of powers could weaken their resolve and break their morale, as proven in the cases of Iraq, Afghanistan, and North Korea. Importantly, the regional case studies —India and Pakistan in South Asia; North Korea and China in Northeast Asia; and the U.S. involvement in the Middle East — reveal how the psyche and thought processes of national and regional actors have been the driving force in triggering interstate conflicts and civil wars. The book brilliantly illuminates how America became a conscious victim of the ignorance trap in Asia’s volatile regions. This must book offers easy solutions to complex conflicts to induce a peaceful change in world politics.

America's Arab Refugees Marcia C. Inhorn 2018-01-09 America's Arab Refugees is a timely examination of the world's worst refugee crisis since World War II. Tracing the history of Middle Eastern wars—especially the U.S. military interventions in Iraq and Afghanistan—to the current refugee crisis, Marcia C. Inhorn examines how refugees fare once resettled in America. In the U.S., Arabs are challenged by discrimination, poverty, and various forms of vulnerability. Inhorn shines a spotlight on the plight of resettled Arab refugees in the ethnic enclave community of "Arab Detroit," Michigan. Sharing in the poverty of Detroit's Black communities, Arab refugees struggle to find employment and to rebuild their lives. Iraqi and Lebanese refugees who have fled from war zones also face several serious health challenges. Uncovering the depths of these challenges, Inhorn's ethnography follows refugees in Detroit suffering reproductive health problems requiring in vitro fertilization (IVF). Without money to afford costly IVF services, Arab refugee couples are caught in a state of "reproductive exile"—unable to return to war-torn countries with shattered healthcare systems, but unable to access affordable IVF services in America. America's Arab Refugees questions America's responsibility for, and commitment to, Arab refugees, mounting a powerful call to end the violence in the Middle East, assist war orphans and uprooted families, take better care of Arab refugees in this country, and provide them with equitable and affordable healthcare services.
