Mercedes SL Series Andrew Noakes 2004-10-30 Mercedes Benz has now been manufacturing SL sports cars for fifty years, and for all that time the cars adorned with those two special letters have been admired and coveted by car lovers the world over. It all started in 1954, with the fabulous and iconic 300SL Gullwing, a road car developed directly from the stunning 300SLR racing car. Other models followed, including the more affordable 190SL, the 'Pagoda' car of the sixties and the stylish ranges of the seventies and eighties. Mercedes now use the SL tag before rather than after the numbers in the cars' designations, but the line is as strong as ever, with a magnificent new range and an SLR supercar developed with McLaren that takes the family right back to its roots.

Mercedes-Benz 300SL Karl Ludvigsen 2005-04-15 In 1952 Mercedes-Benz astonished the racing world with the successes it achieved with its 300SL, exploiting an advanced space-type frame and aerodynamic body with gullwing doors. Already the subject of a Ludvigsen Library Series book, the racing 300SL inspired the creation of a production version, which first took flight in 1954. The 300SL stunned critics and experts alike with its fabulous performance-more than 150 miles per hour-exotic looks and superb build quality. Not just a pretty face, the 300SL was also extremely successful in competition on both sides of the Atlantic. The original coupe was followed by a roadster version in 1957; in all, 3,258 were made. Drawing on his unmatched archive of Mercedes-Benz photos, including coverage by Rudy Mailander and Edward Eves of the 300SL production line, Karl Ludvigsen presents the 300SL in all its glory. He also draws on his own experience as an owner of one of these great cars.

Faszination SL - 230 - 280 SL (W 113) Günter Engelen 2008

First Overland Tim Slessor 2016-03-07 Why Not? After all, no-one had ever done it before. It would be one of the longest of all overland journeys – half way round the world, from the English Channel to Singapore. They knew that several expeditions had already tried it. Some had got as far as the deserts of Persia; a few had even reached the plains of India. But no one had managed to go on from there: over the jungle clad mountains of Assam and across northern Burma to Thailand and Malaya.

Over the last 3,000 miles it seemed there were 'just too many rivers and too few roads'. But no-one really knew ... In fact, their problems began much earlier than that. As mere undergraduates, they had no money, no cars, nothing. But with a cool audacity, which was to become characteristic, they set to work – wheedling and cajoling. First, they coaxed the BBC to come up with some film for a possible TV series. They then gently persuaded the manufacturers to lend them two factory-fresh Land Rovers. A publisher was even sweet-talked into giving them an advance on a book. By the time they were ready to go, their sponsors (more than 80 of them) ranged from whiskey distillers to the makers of collapsible buckets. In late 1955, they set off. Seven months and 12,000 miles later, two very weary Land Rovers, escorted by police outriders, rolled into Singapore – to flash bulbs and champagne. Now, fifty years on, their book, 'First Overland', is republished – with a foreword by Sir David Attenborough. After all, it was he who gave them that film.
