Roads Were Not Built for Cars Carlton

Reid 2015-04-09 Cyclists were written out of highway history in the 1920s and 1930s by the all-powerful motor lobby: Roads Were Not Built For Cars tells the real story, putting cyclists center stage again. Not that the book is only about cyclists. It will also contain lots of automotive history because many automobile pioneers were cyclists before becoming motorists. A surprising number of the first car manufacturers were also cyclists, including Henry Ford. Some carried on cycling right through until the 1940s. One famous motor manufacturing pioneer was a racing tricycle rider to his dying day.

Paris in the Dark Eric Smoodin
2020-03-27 In Paris in the Dark Eric Smoodin takes readers on a journey through the streets, cinemas, and theaters of Paris to sketch a comprehensive picture of French film culture during the 1930s and 1940s. Drawing on a wealth of journalistic

sources, Smoodin recounts the ways films moved through the city, the favored stars, and what it was like to go to the movies in a city with hundreds of cinemas. In a single week in the early 1930s, moviegoers might see Hollywood features like King Kong and Frankenstein, the new Marlene Dietrich and Maurice Chevalier movies, and any number of films from Italy, Germany, and Russia. Or they could frequent the city's ciné-clubs, which were hosts to the cinéophile subcultures of Paris. At other times, a night at the movies might result in an evening of fascist violence, even before the German Occupation of Paris, while after the war the city's cinemas formed the space for reconsolidating French film culture. In mapping the cinematic geography of Paris, Smoodin expands understandings of local film exhibition and the relationships of movies to urban space.

The History and Politics of Sport-for-

Development Simon C. Darnell 2019-03-04

This book focuses on the major social and political forces that have shaped the ways in which sport has been understood, organized, and contested in an effort to engender social change. Integrating the history of international development with the history of modern sport, the authors examine the underpinnings of sport-for-development from the mid-19th through the early 21st centuries. Including both archival research and extensive interviews with more than 15 individuals who were central to the institutions and movements that shaped sport as a force for development, this book will be of particular interest to the growing number of scholars, students, practitioners, advocates and activists interested in the possibilities and limitations of sport-for-development.

Habeas Viscus Alexander G. Weheliye

2014-07-30 *Habeas Viscus* focuses attention on the centrality of race to notions of the human. Alexander G. Weheliye develops a theory of "racializing assemblages," taking race as a set of sociopolitical processes that discipline humanity into full humans, not-quite-humans, and nonhumans. This disciplining, while not biological per se, frequently depends on anchoring political hierarchies in human flesh. The work of the black feminist scholars Hortense Spillers and Sylvia Wynter is vital to Weheliye's argument. Particularly significant are their contributions to the intellectual project of black studies vis-à-vis racialization and the category of the human in western modernity. Wynter and Spillers configure black studies as an endeavor to disrupt the governing conception of humanity as synonymous with white, western man. Weheliye posits black feminist theories of modern humanity as useful correctives to

the "bare life and biopolitics discourse" exemplified by the works of Giorgio Agamben and Michel Foucault, which, Weheliye contends, vastly underestimate the conceptual and political significance of race in constructions of the human. Habeas Viscus reveals the pressing need to make the insights of black studies and black feminism foundational to the study of modern humanity.

Encyclopedia of Automotive Engineering

Oustanding Academic Title The

Encyclopedia of Automotive Engineering provides for the first time a large, unified knowledge base laying the foundation for advanced study and in-depth research.

Through extensive cross-referencing and search functionality it provides a gateway to detailed but scattered information on best industry practice, engendering a better understanding of interrelated concepts and

techniques that cut across specialized areas of engineering. Beyond traditional automotive subjects the Encyclopedia addresses green technologies, the shift from mechanics to electronics, and the means to produce safer, more efficient vehicles within varying economic restraints worldwide. The work comprises nine main parts: (1) Engines: Fundamentals (2) Engines: Design (3) Hybrid and Electric Powertrains (4) Transmission and Driveline (5) Chassis Systems (6) Electrical and Electronic Systems (7) Body Design (8) Materials and Manufacturing (9) Telematics. Offers authoritative coverage of the wide-ranging specialist topics encompassed by automotive engineering An accessible point of reference for entry level engineers and students who require an understanding of the fundamentals of technologies outside of their own expertise or training Provides invaluable guidance to

more detailed texts and research findings in the technical literature Developed in conjunction with FISITA, the umbrella organisation for the national automotive societies in 37 countries around the world and representing more than 185,000 automotive engineers 6 Volumes www.automotive-reference.com An essential resource for libraries and information centres in industry, research and training organizations, professional societies, government departments, and all relevant engineering departments in the academic sector.

Cosmos & Culture Steven J. Dick 2009 From GPO Bookstore's Website: Authors with diverse backgrounds in science, history, anthropology, and more, consider culture in the context of the cosmos. How does our knowledge of cosmic evolution affect terrestrial culture? Conversely, how does our knowledge of cultural evolution

affect our thinking about possible cultures in the cosmos? Are life, mind, and culture of fundamental significance to the grand story of the cosmos that has generated its own self-understanding through science, rational reasoning, and mathematics? Auto Racing Comes of Age Robert Dick 2013-05-03 The first quarter of the 20th century was a time of dramatic change in auto racing, marked by the move from the horseless carriage to the supercharged Grand Prix racer, from the gentleman driver to the well-publicized professional, and from the dusty road course to the autodrome. This history of the evolution of European and American auto racing from 1900 to 1925 examines transatlantic influences, early dirt track racing, and the birth of the twin-cam engine and the straight-eight. It also explores the origins of

the Bennett and Vanderbilt races, the early career of “America’s Speed King” Barney Oldfield, the rise of the speedway specials from Marmon, Mercer, Stutz and Duesenberg, and developments from Peugeot, Delage, Ballot, Fiat, and Bugatti. This informative work provides welcome insight into a defining period in motorsports.

Mondo Agnelli Jennifer Clark 2011-11-21

The fascinating story of a century-old automobile dynasty Fiat is one of the world's largest automakers, but when it made headlines by grabbing control of a bankrupt Chrysler in 2009 it was unknown in the U.S. Fiat’s against-all-odds swoop on Chrysler---masterminded by Sergio Marchionne, the Houdini-like manager who saved Fiat from its own near-collapse in 2005 - has made the automaker one of the most unlikely winners of the financial crisis. Mondo Agnelli is a new book that looks at

the chain of unpredictable events triggered by the death of Gianni Agnelli in 2003. Gianni, the charismatic, silver-haired power broker and style icon, was the patriarch who had lead the company founded by his grandfather in 1899. But Gianni's own son had committed suicide. Without a mature heir, the dynasty and Fiat were rudderless. Backed by Gianni's closest advisors, his serious, shy, and determined grandson John plucked Marchionne from obscurity. Together, they saved the family company and, inadvertently, positioned Fiat as a global trailblazer when the global storm hit. A classic story of ingenuity and hard work, the book portrays a business dynasty that triumphed over adversity and family tragedy because of its own smarts, sweat, and ability to bend the rules A an engaging tale for those interested in the stories behind the economic crash, the book contains never-before reported material

about how Fiat succeeded in making Chrysler profitable where both Daimler AG and Cerberus, its previous owners, had failed. A story for a wide audience, from car buffs, business readers, lovers of Italy, and anyone fascinated by the lifestyle of Europe's most glamorous industrial dynasty, this book tells the tale of how Fiat achieved the seemingly impossible -- turning around an American automotive icon everyone else had given up for dead.

The Turning Wheel - The story of General Motors through twenty-five years

1908-1933 Arthur Pound 2013-12-09 “

...GENERAL MOTORS in 1933 reached its twenty-fifth milestone. Since the founding of General Motors Company of New Jersey in 1908, the growth of the organization has

contributed a unique chapter to American industrial history. From beginnings so small that its birth escaped notice in financial centers, General Motors has worked its way steadily forward to a place where its leadership in many of the most exacting branches of production and distribution is taken for granted and where it meets the public of many lands with a wide variety of merchandise and services. Scientific research, close attention to dealer and consumer needs, and constructive public policies are among the factors accounting for General Motors' present strength. My acquaintance with General Motors began at its birth in 1908, and as a somewhat impartial observer of social trends I have watched its progress with keen interest ever since” ARTHUR POUND - 1934

Mad for Speed Elsa A. Nystrom

2013-06-06 This book covers Joan Newton Cuneo's life, and her roles (from 1905 to

1915) as the premier female racer in the United States and spokeswoman for women drivers and good roads. Beginning with her family history and marriage to Andrew Cuneo, it traces her life in New York society, the birth of her children, and Joan's growing interest in automobile touring and racing and partnership with Louis Disbrow, her racing mechanic. The book covers Joan's experiences in three Glidden Tours, including her notes on the 1907 tour, her first races, and her rivals. It also looks at the growth and change of automobile culture and the battles for control of racing among the American Automobile Association, the Automobile Club of America, and the American Automobile Manufacturers Association—which ended in banishing women racers shortly after Joan's greatest racing victories at New Orleans (in 1909). The book then follows Joan's attempts to continue racing, the end of her

marriage, her move to the Upper Peninsula, and her remarriage and death. The book also includes a chapter on her female rivals in racing and touring.

The International Motor Racing Guide

Peter Higham 2003 Includes coverage from all major international races, from the first organised event in 1894 to the present day. [A Gravity's Rainbow Companion](#) Steven C. Weisenburger 2011-03-15 Adding some 20 percent to the original content, this is a completely updated edition of Steven Weisenburger's indispensable guide to Thomas Pynchon's Gravity's Rainbow. Weisenburger takes the reader page by page, often line by line, through the welter of historical references, scientific data, cultural fragments, anthropological research, jokes, and puns around which Pynchon wove his story. Weisenburger fully annotates Pynchon's use of languages ranging from Russian and Hebrew to such

subdialects of English as 1940s street talk, drug lingo, and military slang as well as the more obscure terminology of black magic, Rosicrucianism, and Pavlovian psychology. The Companion also reveals the underlying organization of Gravity's Rainbow--how the book's myriad references form patterns of meaning and structure that have eluded both admirers and critics of the novel. The Companion is keyed to the pages of the principal American editions of Gravity's Rainbow: Viking/Penguin (1973), Bantam (1974), and the special, repaginated Penguin paperback (2000) honoring the novel as one of twenty "Great Books of the Twentieth Century."

Early Automobiles Jim Harter 2015-10-01
Image archivist and transportation historian Jim Harter follows his work, *Early Farm Tractors*, with an even larger

collection of images from advertising line art from 1880 to 1930, this time focused on Early Automobiles. Nearly 250 entrancing illustrations -- many suitable for framing -- are gems of the art of commercial engraving. Harter provides a very substantial, detailed history of the development of the "horseless carriage" into the brands famous from the early 20th century -- racers like Stutz, Duesenberg, Stanley, as well as those that became household names like Oldsmobile, Ford, Chrysler and others. Of special interest are the dozens of successful electric automobiles that flourished for 25 years. The history includes many colorful anecdotes about early long-distance races as well as interesting details of engineering breakthroughs. Full bibliography and index.

Human Accomplishment Charles Murray 2009-10-13 A sweeping cultural survey reminiscent of Barzun's *From Dawn to Decadence*. "At irregular times and in scattered settings, human beings have achieved great things. Human Accomplishment is about those great things, falling in the domains known as the arts and sciences, and the people who did them.' So begins Charles Murray's unique account of human excellence, from the age of Homer to our own time. Employing techniques that historians have developed over the last century but that have rarely been applied to books written for the general public, Murray compiles inventories of the people who have been essential to the stories of literature, music, art, philosophy, and the sciences—a total of 4,002 men and women from around the

world, ranked according to their eminence. The heart of *Human Accomplishment* is a series of enthralling descriptive chapters: on the giants in the arts and what sets them apart from the merely great; on the differences between great achievement in the arts and in the sciences; on the meta-inventions, 14 crucial leaps in human capacity to create great art and science; and on the patterns and trajectories of accomplishment across time and geography. Straightforwardly and undogmatically, Charles Murray takes on some controversial questions. Why has accomplishment been so concentrated in Europe? Among men? Since 1400? He presents evidence that the rate of great accomplishment has been declining in the last century, asks what it means, and offers a rich framework for thinking about the conditions under which the human spirit has expressed itself most gloriously. Eye-

opening and humbling, Human Accomplishment is a fascinating work that describes what humans at their best can achieve, provides tools for exploring its wellsprings, and celebrates the continuing common quest of humans everywhere to discover truths, create beauty, and apprehend the good.

The Dictator's Seduction Lauren H. Derby 2009-01-01 The dictatorship of Rafael Trujillo, who ruled the Dominican Republic from 1930 until his assassination in 1961, was one of the longest and bloodiest in Latin American history. *The Dictator's Seduction* is a cultural history of the Trujillo regime as it was experienced in the capital city of Santo Domingo. Focusing on everyday forms of state domination, Lauren Derby describes how the regime infiltrated civil society by fashioning a "vernacular politics" based on popular idioms of masculinity and fantasies of race and class

mobility. Derby argues that the most pernicious aspect of the dictatorship was how it appropriated quotidian practices such as gossip and gift exchange, leaving almost no place for Dominicans to hide or resist. Drawing on previously untapped documents in the Trujillo National Archives and interviews with Dominicans who recall life under the dictator, Derby emphasizes the role that public ritual played in Trujillo's exercise of power. His regime included the people in affairs of state on a massive scale as never before. Derby pays particular attention to how events and projects were received by the public as she analyzes parades and rallies, the rebuilding of Santo Domingo following a major hurricane, and the staging of a year-long celebration marking the twenty-fifth year of Trujillo's regime. She looks at representations of Trujillo, exploring how claims that he embodied the popular barrio

antihero the tiguere (tiger) stoked a fantasy of upward mobility and how a rumor that he had a personal guardian angel suggested he was uniquely protected from his enemies. The Dictator's Seduction sheds new light on the cultural contrivances of autocratic power.

The Goodriches Dane Starbuck 2001
When local author Dane Starbuck set out several years ago to write the biography of Pierre Goodrich, scion of one of Indiana's most prominent twentieth-century families, he soon discovered that it was impossible to

really understand Pierre Goodrich without also closely examining his family. Starbuck's years of research culminated in *The Goodriches: An American Family*, now available from Liberty Fund. This work is a revealing window into the founding ideals of both Indiana and our country, and how our founders meant these ideals to be lived. *The Goodriches: An American Family* begins with the birth of James P. Goodrich in 1864 and continues through the death of his son Pierre F. Goodrich in 1973. As the story of two fascinating and fiercely individualistic men, it is compelling reading, but as author Dane Starbuck says in the preface, "the later chapters of this book are as much a social commentary on American life in the twentieth century as parts of a biography of two accomplished men." In his foreword to *The Goodriches: An American Family*, James M. Buchanan, Nobel laureate in economics and celebrated

Liberty Fund author, says, “The Indiana Goodriches are an American family whose leading members, James and Pierre, helped to shape the American century. . . . This biography makes us recognize what is missing from the millennial setting in which we find ourselves. We have lost the ‘idea of America,’ both as a motivation for action and as a source of emotional self-confidence. We have lost that which the Goodriches possessed.” What did the Goodrich family “possess” which made them so unique? A belief in the power of knowledge, the importance of education, and a strong work ethic combined to imbue the Goodrich family with a distinctive sense of civic duty. James Goodrich served as governor of Indiana from 1917 to 1921 and as adviser to Presidents Warren G. Harding, Calvin Coolidge, and Herbert Hoover. During his eulogy of James Goodrich, the Reverend Gustav Papperman explained,

“The Governor felt that he had been given talents that were a trust, that he was to administer them faithfully. . . .” According to author Dane Starbuck, “Education was a large part of the Goodriches’ work ethos. . . . The family viewed education as a process by virtue of which the individual remained informed, made better business decisions, learned the importance of citizenship, and was given an opportunity for individual self-improvement. Therefore, work and education became the centerpieces of the Goodrich family’s ethical and practical life.” In later years, Pierre Goodrich, successful businessman and entrepreneur, would set aside a portion of his estate to found Liberty Fund because he believed that the principles of liberty on which our nation was founded need to be constantly kept before the public.

Cutthroats Robert Dick 2007-12-18 Soon after we landed it became apparent that

there was more than enough artillery here, that the enemy were excellent shots, and that their ammo supply seemed to be endless. With the Japanese deeply entrenched and determined to die rather than surrender, Robert Dick and his fellow soldiers quickly realized that theirs would be a war fought inch by bloody inch—and that their Sherman tanks would serve front and center. As driver, Dick had to maneuver his five-man crew in and out of dangerous and often deadly situations. Whether crawling up beaches, bogged down in the mud-soaked Leyte jungle, or exposed in the treacherous valleys of Okinawa, the Sherman was a favorite target. A land mine could blow off the tracks, leaving its crew marooned and helpless, and the nightmare of swarms of Japanese armed with satchel charges was all too real. But there was a war to be won, and Americans like Robert Dick did their

jobs without fanfare, and without glory. This gripping account of tanker combat is a ringing testament to the awe-inspiring bravery of ordinary Americans.

Auto Racing in the Shadow of the Great War

Robert Dick 2019-03-11 From 1915 through the early 1920s, American auto racing experienced rapid and exciting change. Competition by European vehicles forced American car manufacturers to incorporate new features, resulting in legendary engineering triumphs (and, essentially, works of art). Some of the greatest drivers in racing history were active during this time--Ralph DePalma, Dario Resta, Eddie Rickenbacker, the Chevrolet brothers, Jimmy Murphy. Presenting dozens of races in detail and a wealth of engineering specs, this history recalls the era's cigar-shaped speedway specials and monumental board tracks, the heavy-footed drivers, fearless mechanics,

gifted engineers and enthusiastic backers.

Women in the Silent Cinema

Annette Förster 2018-01-31 This magisterial book offers comprehensive accounts of the professional itineraries of three women in the silent film in the Netherlands, France and North America. Annette Förster presents a careful assessment of the long career of Dutch stage and film actress Adriënne Solser; an exploration of the stage and screen careers of French actress and filmmaker Musidora and Canadian-born actress and filmmaker Nell Shipman; an analysis of the interaction between the popular stage and the silent cinema from the perspective of women at work in both realms; fresh insights into Dutch stage and screen comedy, the French revue and the American Northwest drama of the 1910s; and much more, all grounded in a wealth of

archival research.

Mercedes and Auto Racing in the Belle

Epoque, 1895-1915 Robert Dick 2005 The history of the Mercedes provides the thread for this book that narrates the early history of automobile racing from the beginnings in 1895 until the First World War in 1915 when racing temporarily ceased. The book focuses on the races themselves, the drivers and mechanics, the engineers in the background and the technical progress of the cars. Automobile racing had its origins in Paris, and French marques and the Automobile Club de France were dominating the scene. But in 1901 a foreign troublemaker emerged, the Mercedes. This German machine was to play a leading role, its career and evolution becoming an image of the whole period. The individuals who built and drove these early racers laid the foundation of a new industry, conceived the modern, high-performance engine, and

gave magic to a series of races, which drew ever more spectators and thrilled entire nations. This richly illustrated history answers many questions from this time in automotive history. Early chapters discuss the marketing of the original Daimler engine in France, the position and influence of Emil Jellinek and Wilhelm Maybach, and the great town-to-town and Gordon Bennett races. Later chapters focus on the French Grand Prix, the great crisis of 1909, the voiturette movement, the Mercedes and Benz successes in America, including the record attempts of the Blitzen Benz, and the role of Ernest Henry in the development of the revolutionary Peugeot. Final chapters describe the career of the 4.5-litre Mercedes and its impact on future designs.

Crossroads of Colonial Cultures Gesine Müller 2018-04-23 The study examines cultural effects of various colonial systems of government in the Spanish- and French-speaking Caribbean in a little investigated period of transition: from the French Revolution to the abolition of slavery in Cuba (1789-1886). The comparison of cultural transfer processes by means of literary production from and about the Caribbean, embedded in a broader context of the circulation of culture and knowledge deciphers the different transculturations of European discourses in the colonies as well as the repercussions of these transculturations on the motherland's ideas

of the colonial other: The loss of a culturally binding centre in the case of the Spanish colonies – in contrast to France’s strong presence and binding force – is accompanied by a multirelationality which increasingly shapes hispanophone Caribbean literature and promotes the pursuit for political independence. The book provides necessary revision to the idea that the 19th-century Caribbean can only be understood as an outpost of the European metropolises. Examining the kaleidoscope of the colonial Caribbean opens new insights into the early processes of cultural globalisation and questions our established concept of a genuine western modernity.
