Lifespan Development

Tara L. Kuther 2018-11-15

In the Second Edition of her award-winning, chronologically organized text, *Lifespan Development: Lives in Context*, author and teacher Tara L. Kuther explores the dynamic interactions between individuals, our genetic makeup, and the diverse contexts that shape our growth and development at every stage of life. With a clear and approachable writing style, Kuther integrates current research findings with foundational, classic theory and research to present a comprehensive yet concise introduction to the field. The book is organized around part-level

overviews brought to life in Dr. Kuther's Chalk Talks, brief animations narrated by the author. Within each chapter, Lives in Context Video Cases spotlight real individuals' contexts and experiences to bring key concepts home. Lively feature boxes and critical thinking questions encourage students to compare concepts, apply theoretical perspectives, and consider applications of research findings in their own lives and future careers.
