Transcultural Nursing - E-Book Joyce Newman Giger 2020-03-10 Provide quality care for clients from culturally diverse backgrounds! Transcultural Nursing, 8th Edition shows you how to apply assessment and intervention strategies to individuals from a variety of different cultures. Based on Giger and Davidhizer's unique transcultural model, this text helps you design culturally sensitive care with use of the six key aspects of cultural assessment: communication, time, space, social organization, environmental control, and biologic variations. Written by nursing educators Joyce Newman Giger and Linda G. Haddad, Transcultural Nursing shows how an understanding of cultural variations and individual patient needs will help you provide safe and effective care. UNIQUE! The six key aspects of cultural assessment each receive a full chapter of coverage, allowing you to also apply the Transcultural Assessment Model to cultures not covered in the text. Case studies and critical decision-making questions help you apply the assessment framework to practice. 23 chapters on specific cultural groups apply this assessment model to the clients most commonly encountered in United States health care settings, with nearly all chapters written by contributors who are part of that ethnic group. Client care plans in culture-specific chapters show how to apply principles to the needs of individuals. Review questions reinforce your understanding of cultural principles, with answers found in the back of the book. Discussions of spirituality throughout the text provide a holistic, integrated approach to culture, beliefs, and assessment. NEW co-author Dr. Linda Haddad is an internationally recognized cultural scholar who has taught nursing around the globe, has acted as an advisor and coordinator for the World Health Organization, and has published over 30 scholarly articles on nursing with a focus on understanding the cultural implication to care. UPDATED! Cultural chapters are completely revised to reflect the shifting experiences of cultural groups in our society.

Mental Health Nursing Verna Benner Carson 2000 In addition to comprehensive coverage of all standard topics in psychiatric nursing, the New Edition of this groundbreaking text offers unparalleled insights into the human side of mental illness. It enables readers to empathize with psychiatric patients and treat them with dignity and understanding. A unique, holistic approach prepares readers to care for all of their patients' needs physical, psychological, social, and spiritual.This second edition contains new, one-of-a-kind appendices on patient/family teaching and spiritual interventions, clinical practice guidelines for home care, testimonials from mental health nurses in a full range of settings, new, full-color brain scan images that depict visible differences in the brains of patients with certain mental illnesses, and much more. Combines the latest biological and psychopharmacological advances, proven psychodynamic approaches, and spiritual and cultural interventions to encourage consideration of the total person. Integrates DSM-IV categories throughout and relates NANDA diagnoses to the psychiatric diagnoses. Features new Snap Shotsconcise summaries of the nursing interventions for particular disorders. Contains all-new full-color images demonstrating the visible differences in the brain of patients with various mental illnesses. Offers new What Do You Think questions that encourage students to explore their own perceptions about mental health. Includes new Home Care Clinical Practice Guidelines that illustrate the steps, stages, and treatment plans involved in a patients recovery from mental illness and introduces students to the multidisciplinary health care team.

Transcultural Nursing Joyce Newman Giger 2014-04-14 Giger and Davidhizar's unique transcultural model of clear, easy-to-apply assessment and intervention strategies is the definitive source for use in the clinical setting! This authoritative resource will help you learn to identify the six key cultural phenomena used in caring for clients from different backgrounds (communication, space, social organization, time, environmental control, and biological variations), and help you apply these phenomena to a variety of individuals in different cultures. Unique! Giger & Davidhizar's Transcultural Assessment Model devotes a full chapter to each of the six aspects of cultural assessment (communication, space, social organization, time, environmental control, and biologic variations) to help you apply this model to any client of any culture. Expert author Joyce Newman Giger is a pioneer in the field of transcultural nursing. Case studies and critical thinking questions help you apply the assessment framework in practice. UNIQUE! Sample care plans demonstrate how to apply principles to specific client needs. UNIQUE! Discussion of the spiritual component provides a more holistic, integrated approach to culture and assessment. Clarification of biologic variations for select cultural groups raises awareness of potential risks/influences on client health. 2010 census data is incorporated through the book to provide the most current analysis of demographic trends. Completely revised cultural chapters reflect the shifting experiences of different cultural groups in our society. NEW! 6 additional cultural chapters on Nigerians, Uganda Americans, Jordanian Americans, Cuban Americans, Amish Americans, and Irish Americans

Talking Therapy Kylie Smith 2020-05-15 First place in the 2020 American Journal of Nursing Book of the Year Award in History and Public Policy Winner of

the 2020 Lavinia L. Dock Award from the American Association for the History of Nursing Talking Therapy traces the rise of modern psychiatric nursing in the United States from the 1930s to the 1970s. Through an analysis of the relationship between nurses and other mental health professions, with an emphasis on nursing scholarship, this book demonstrates the inherently social construction of 'mental health', and highlights the role of nurses in challenging, and complying with, modern approaches to psychiatry. After WWII, heightened cultural and political emphasis on mental health for social stability enabled the development of psychiatric nursing as a distinct knowledge project through which nurses aimed to transform institutional approaches to patient care, and to contribute to health and social science beyond the bedside. Nurses now take for granted the ideas that underpin their relationships with patients, but this book demonstrates that these were ideas not easily won, and that nurses in the past fought hard to make mental health nursing what it is today.

Nursing History Review, Volume 26 Patricia D'Antonio, PhD, RN, FAAN 2017-08-15 Nursing History Review, an annual peer-reviewed publication of the American Association for the History of Nursing, is a showcase for the most significant current research on nursing history. Regular sections include scholarly articles, over a dozen book reviews of the best publications on nursing and health care history that have appeared in the past year, and a section abstracting new doctoral dissertations on nursing history. Historians, researchers, and individuals fascinated with the rich field of nursing will find this an important resource. Included in Volume 26... Different Places, Different Ideas: Reimagining Practice in American Psychiatric Nursing After World War II Evolving as Necessity Dictates: Home and Public Health in the 19th and 20th Centuries "Women's Mission Among Women": Unacknowledged Origins of Public Health Nursing The Triumph of Proximity: The Impact of District Nursing Schemes in 1890s' Rural Ireland More than Educators: New Zealand's Plunket Nurses, 1907-1950 To Care and Educate: The Continuity Within Queen's Nursing in Scotland, c. 1948-2000

Nursing Action Guides 1978

Psychiatric Nursing Peggy Martin 1987-11-11 In line with the recommendations of Project 2000 and the 1982 RMN syllabus this is an important new book which takes a fresh look at the requirements of trainee psychiatric nurses and their teachers. The book is divided into two parts. Part One - Concepts, establishes the nurses approach to psychiatric care as an individual and as a member of a team. Part Two - Care, explores the application of concepts through numerous patient profiles and care plans based on conceptual models. The text is well illustrated and attractively designed throughout. The author, Peggy Martin, is closely involved in nurse training and, as well as being aware of the needs of the practising nurse, has a strong commitment to Peplau's developmental model which she has used in this book.

A Refresher Course for Registered Nurses, a Guide for Instructors and Students, 1974 United States. Health Resources Development Bureau 1974

Lifelines Ellen L. Bassuk 2012-12-06 Suicide is a source of endless disquiet. One of the few fatal consequences of psychiatric illness, it is a threat to patients, and a vexation to therapists that puts clinical judgment to the ultimate test. It arouses countertransference reactions of unusual intensity-helplessness and guilt when the suicide is successful; anxiety and anger when it is used as a manipulative tool. For as Samuel Johnson was aware when he commented that many "commit suicide, as a passionate man will stab an other," it is not only an escape from hopeless despair but an expression of the most violent rage. To all those who care for suicidal patients, this book will come as a welcome guide. Each of the authors represented here brings a wealth of clinical experience to bear on the subject under discussion. The psychological and biological determinants of depression are simply and clearly delineated to provide a basis for understanding the processes underlying suicide, for judging its likelihood, and for preventing its occurrence. Detailed descriptions of the variety of psychological and pharmacological treatments of the suicidal patient are complemented by extensive discussions of the several settings in which such patients will be encountered, whether these be an in-patient unit, an out-patient clinic, a medical ward, an emergency room, or a private office.

Technical Manual United States Department of the Army 1962

Shadows in the Sun Betty Davies 2015-12-22 Shadows in the Sun covers the immediate, short- and long-term responses and subsequent generational effects of sibling bereavement and discusses sibling responses in the context of the variables which influence them. The final chapter synthesizes all that has gone before into a comprehensive model of sibling bereavement. Practical guidelines are offered for those who seek to help grieving siblings, children, and families.

Nursing as Therapy Richard McMahon 2013-11-11 Over the past 20years, nursing has begun to rediscover some of its basic 'truths' which have become obscured because of the rise in technology and medical knowledge this century. One of these basic 'truths' is the concern of this book - that intelligent, sensitive nursing does make a difference to the consumers of health care. Like most essential truths, this seems almost too obvious to be stated. Nevertheless, many nurses have become increasingly aware of a commonly held view that ,getting better' or staying healthy is largely dependent upon the intervention of or monitoring by medical practitioners and paramedical therapists together with the technology they use and that nurses merely carry out the orders of such workers and keep things in order. An apt analogy, frequently used, is that of the air journey. The point of the journey is to get from A to Band is largely dependentupon the aeroplane (i.e. the technology in health care) and the crew in the cockpit (i.e.
