Talking Therapy Kylie Smith 2020-05-15 First place in the 2020 American Journal of Nursing Book of the Year Award in History and Public Policy Winner of the 2020 Lavinia L. Dock Award from the American Association for the History of Nursing
Talking Therapy traces the rise of modern psychiatric nursing in the United States from the 1930s to the 1970s. Through an analysis of the relationship between nurses and other mental health professions, with an emphasis on nursing scholarship, this book demonstrates the inherently social construction of 'mental health', and highlights the role of nurses in challenging, and complying with, modern approaches to psychiatry. After WWII, heightened cultural and political emphasis on mental health for social stability enabled the development of psychiatric nursing as a distinct knowledge project through which nurses aimed to transform institutional approaches to patient care, and to contribute to health and social science beyond the bedside. Nurses now take for granted the ideas that underpin their relationships with patients, but this book demonstrates that these were ideas not easily won, and that nurses in the past fought hard to make mental health nursing what it is today.
Adult Psychiatric Nursing Jeanette Lancaster 1988
Transcultural Nursing - E-Book Joyce Newman Giger 2020-03-10 Provide quality care for clients from culturally diverse backgrounds! Transcultural Nursing, 8th Edition shows you how to apply assessment and intervention strategies to individuals from a variety of different cultures. Based on Giger and Davidhizer's unique transcultural model, this text helps you design culturally sensitive care with use of the six key aspects of cultural assessment: communication, time, space, social organization, environmental control, and biologic variations. Written by nursing educators Joyce Newman Giger and Linda G. Haddad, Transcultural Nursing shows how an understanding of cultural variations and individual patient needs will help you provide safe and effective care. UNIQUE! The six key aspects of cultural assessment each receive a full chapter of coverage, allowing you to also apply the Transcultural Assessment Model to cultures not covered in the text. Case studies and critical decision-making questions help you apply the assessment framework to practice. 23 chapters on specific cultural groups apply this assessment model to the clients most commonly encountered in United States health care settings, with nearly all chapters written by contributors who are part of that ethnic group. Client care plans in culture-specific chapters show how to apply principles to the needs of individuals. Review questions reinforce your understanding of cultural principles, with answers found in the back of the book. Discussions of spirituality throughout the text provide a holistic, integrated approach to culture, beliefs, and assessment. NEW co-author Dr. Linda Haddad is an internationally recognized cultural scholar who has taught nursing around the globe, has acted as an advisor and coordinator for the World Health Organization, and has published over 30 scholarly articles on nursing with a focus on understanding the cultural implication to care. UPDATED! Cultural chapters are

completely revised to reflect the shifting experiences of cultural groups in our society.

Transcultural Nursing Joyce Newman Giger 2014-04-14 Giger and Davidhizer's unique transcultural model of clear, easy-to-apply assessment and intervention strategies is the definitive source for use in the clinical setting! This authoritative resource will help you learn to identify the six key cultural phenomena used in caring for clients from different backgrounds (communication, space, social organization, time, environmental control, and biological variations), and help you apply these phenomena to a variety of individuals in different cultures. Unique! Giger & Davidhizer's Transcultural Assessment Model devotes a full chapter to each of the six aspects of cultural assessment (communication, space, social organization, time, environmental control, and biologic variations) to help you apply this model to any client of any culture. Expert author Joyce Newman Giger is a pioneer in the field of transcultural nursing. Case studies and critical thinking questions help you apply the assessment framework in practice. UNIQUE! Sample care plans demonstrate how to apply principles to specific client needs. UNIQUE! Discussion of the spiritual component provides a more holistic, integrated approach to culture and assessment. Clarification of biologic variations for select cultural groups raises awareness of potential risks/influences on client health. 2010 census data is incorporated through the book to provide the most current analysis of demographic trends. Completely revised cultural chapters reflect the shifting experiences of different cultural groups in our society. NEW! 6 additional cultural chapters on Nigerians, Uganda Americans, Jordanian Americans, Cuban Americans, Amish Americans, and Irish Americans

Nursing as Therapy Richard McMahon 2013-11-11 Over the past 20years, nursing has begun to rediscover some of its basic 'truths' which have become obscured because of the rise in technology and medical knowledge this century. One of these basic 'truths' is the concern of this book - that intelligent, sensitive nursing does make a difference to the consumers of health care. Like most essential truths, this seems almost too obvious to be stated. Nevertheless, many nurses have become increasingly aware of a commonly held view that 'getting better' or staying healthy is largely dependent upon the intervention of or monitoring by medical practitioners and paramedical therapists together with the technology they use and that nurses merely carry out the orders of such workers and keep things in order. An apt analogy, frequently used, is that of the air journey. The point of the journey is to get from A to B and is largely dependent upon the aeroplane (i.e. the technology in health care) and the crew in the cockpit (i.e.

Modules for Independent-individual Learning in Nursing Lou Coffey 1975 The 4th Edition of the gold standard of rehabilitation resources is now in full color and thoroughly revised and updated to reflect the art and science of practice today! A compendium of frequently used, but rarely memorized information organized for easy reference, it covers an extraordinary breadth of topics from the full range of basic scientific information (neuroanatomy and clinical neurology, osteology and clinical orthopedics, general anatomy, cardiac and pulmonary anatomy) to the treatments and methods used in modern rehabilitation practice. With its outcome and evidence-based focus and several expert contributors, this text is a must for PT s at any stage in their career.
