Selected writings from the Journal of the Mathematics Council of the Alberta Teachers' Association Egan J Chernoff 2014-06-01 The teaching and learning of mathematics in Alberta - one of three Canadian provinces sharing a border with Montana - has a long and storied history. An integral part of the past 50 years (1962-2012) of this history has been delta-K: Journal of the Mathematics Council of the Alberta Teachers' Association. This volume, which presents ten memorable articles from each of the past five decades, that is, 50 articles from the past 50 years of the journal, provides an opportunity to share this rich history with a wide range of individuals interested in the teaching and learning of mathematics and mathematics education. Each decade begins with an introduction, providing a historical context, and concludes with a commentary from a prominent member of the Alberta mathematics education community. As a result, this monograph provides a historical account as well as a contemporary view of many of the trends and issues in the teaching and learning of mathematics. This volume is meant to serve as a resource for a variety of individuals, including teachers of mathematics, mathematics teacher educators, mathematics education researchers, historians, and undergraduate and graduate students. Most importantly, this volume is a celebratory retrospective on the work of the Mathematics Council of the Alberta Teachers' Association.

Hop! Plap! Corey Rosen Schwartz 2006-04-04 When Mouse and Elephant go to the playground together, it seems as if everything they try to play on together is broken, until they finally find the piece of equipment that is just right for them.

Internet Children's Television Series, 1997-2015 Vincent Terrace 2016-12-16 Created around the world and available only on the web, internet "television" series are independently produced, mostly low budget shows that often feature talented but unknown performers. Typically financed through crowd-funding, they are filmed with borrowed equipment and volunteer casts and crews, and viewers find them through word of mouth or by chance. The fifth in a series focusing on the largely undocumented world of internet TV, this book covers 573 children's series created for viewers 3 to 14. The genre includes a broad range of cartoons, CGI, live-action comedies and puppetry. Alphabetical entries provide websites, dates, casts, credits, episode lists and storylines.

Soccer Score CC Joven 2017-01-01 Mia runs fast. Mia kicks hard. But does Mia score a soccer goal? Goal or not, everyone is a winner when they read a book from the Starting Line Reader series.

The Children's Picture Gallery and Story Teller Obadiah Oldfellow 1854

Merry's Museum, Parley's Magazine, Woodworth's Cabinet and the Schoolfellow 1858

Vile Bodies Evelyn Waugh 2012-12-11 "A wickedly witty and iridescent novel" (Time) from one of England's greatest satirists takes aim at the generation of Bright Young Things that dominated London high society in the 1920s. In the years following the First World War a new generation emerged, wistful and vulnerable beneath the glitter. The Bright Young Things of 1920s London, with their paradoxical mix of

innocence and sophistication, exercised their inventive minds and vile bodies in every kind of capricious escapade. In these pages a vivid assortment of characters, among them the struggling writer Adam Fenwick-Symes and the glamorous, aristocratic Nina Blount, hunt fast and furiously for ever greater sensations and the hedonistic fulfillment of their desires. Evelyn Waugh's acidly funny satire reveals the darkness and vulnerability beneath the sparkling surface of the high life.

New Research Directions in DNA Repair Clark Chen 2013-05-22 This book is intended for students and scientists working in the field of DNA repair. Select topics are presented here to illustrate novel concepts in DNA repair, the cross-talks between DNA repair and other fundamental cellular processes, and clinical translational efforts based on paradigms established in DNA repair. The book should serve as a supplementary text in courses and seminars as well as a general reference for biologists with an interest in DNA repair.
