**Children's Books in Print** 1981

**Reel Bad Arabs** Jack G. Shaheen 2012-12-31 A groundbreaking book that dissects a slanderous history dating from cinema’s earliest days to contemporary Hollywood blockbusters that feature machine-gun wielding and bomb-blowing "evil" Arabs Award-winning film authority Jack G. Shaheen, noting that only Native Americans have been more relentlessly smeared on the silver screen, painstakingly makes his case that "Arab" has remained Hollywood’s shameless shorthand for "bad guy," long after the movie industry has shifted its portrayal of other minority groups. In this comprehensive study of over one thousand films, arranged alphabetically in such chapters as "Villains," "Sheikhs," "Cameos," and "Cliffhangers," Shaheen documents the tendency to portray Muslim Arabs as Public Enemy #1—brutal, heartless, uncivilized Others bent on terrorizing civilized Westerners. Shaheen examines how and why such a stereotype has grown and spread in the film industry and what may be done to change Hollywood’s defamation of Arabs.

**Discovering Dune** Dominic J. Nardi 2022-08-01 Frank Herbert's Dune is one of the most well-known science fiction novels of all time, and it is often revered alongside time-honored classics like *The Lord of the Rings*. Unlike Tolkien's work, the Dune series has received remarkably little academic attention. This collection includes fourteen new essays from various academic disciplines—including philosophy, political science, disability studies, Islamic theology, environmental studies, and Byzantine history--that examine all six of Herbert's Dune books. As a compendium, it asserts that a multidisciplinary approach to the texts can lead to fresh discoveries. Also included in this collection are an introduction by Tim O'Reilly, who authored one of the first critical appraisals of Herbert's writings in 1981, and a comprehensive bibliography of essential primary and secondary sources.

**Journal of the House of Representatives of the United States** United States. Congress. House 1996 Some vols. include supplemental journals of "such proceedings of the sessions, as, during the time they were depending, were ordered to be kept secret, and respecting which the injunction of secrecy was afterwards taken off by the order of the House."

**Information, The Hidden Side of Life** Cédric Gaucherel 2019-04-09 This book explores the unity of life. It proposes that the concept of information is the inner essence of what we today call life. The importance of information for our species is obvious. Human beings are highly dependent on information, constantly exchanging with conspecifics. In a less apparent way, we are the product of genetic and epigenetic information which determines our development in a given environment from a fertilized egg to the adult stage. Even less apparent is that information plays a determining role in ecosystems. This observation may include the prebiotic systems in which life emerged. Our claim is that Nature processes information continuously. This means that even beyond living entities, we can see messages and decoding procedures. Nature can be said to send messages to its own future and then to decode them. Nature “talks” to itself! The systematic organization of messages suggests that, in some respects, we should even speak of the “languages” of Nature.

**Was Frankenstein Really Uncle Sam?** Richard J. Rolwing 2017-02-13 Chief Justice Marshall said the legislature makes, the executive executes, and judiciary construes the law. James Wilson quoted Francis Bacon two hundred years earlier saying that making law is not for the judges. Chief Justice Hutchinson of Massachusetts in 1767 said that the Judge should never be the Legislator because then the Will of the Judge would be the Law: and this tends to a State of Slavery. Justice Wilson himself said in 1789 that when once it is established that Congress possesses the power to pass an act, our province ends with its construction. . . . The province of the courts is to pass upon the validity of laws, not to make them, and when their validity is established, to declare their meaning and apply their provisions. All else lies beyond their domain (p.379). In 1960, Charles Black confirmed that for the colonists, the function of the Judge was thus placed in sharpest antithesis to that of the Legislator who alone was concerned with what the law ought to be. Washingtons farewell address told the delegates to confine themselves within their respective Constitutional spheres, avoiding in the exercise of powers of one department to encroach upon another. The spirit of encroachment tends to consolidate the powers of all the departments in one, and thus to create . . . a real despotism. In 1926, Justice Brandeis stated, The doctrine of separation of powers was adopted . . . to preclude the exercise of arbitrary power.

**Catalog of Copyright Entries, Third Series** Library of Congress. Copyright Office 1965 The record of each copyright registration listed in the Catalog includes a description of the work copyrighted and data relating to the copyright claim (the name of the copyright claimant as given in the application for registration, the copyright date, the copyright registration number, etc.).

**The Hero Behind the Sand Dune** Susan Blanchard 2021-08-17 David loves his super hero costumes, however he was unable to wear one this day. The lesson he learned was, that you don't need to have a super hero costume, in order to be a hero. Susan Houck Blanchard: I live in Monroe NH. My grandson, David is an inspiration to me. David loves his super hero costumes and knows the power of each one! He also loves animals, especially puppies! David is very gentle to all living creatures and he lives in the moment! He is a reminder for me also, to live in the moment. To help when we can. We can all be heroes, nobody needs a costume to be a hero! Thank you David for your inspiration. Mackenzie Craig: I live in Bethlehem NH. Presently, I am a Junior in High School. My goal is to study Illustration at a local art school. With the

opportunity of illustrating this book, it will certainly add to my portfolio. I have enjoyed the entire process of creating the illustrations for this book and created each picture with my own stylistic elements and my favorite mediums: ink and watercolors. Every line and brush stroke in this book were made with joy.

**The Book of Sand** Theo Clare 2022-07-19 The first in an epic series created by one of our finest and most inventive storytellers, also known as the international bestseller Mo Hayder Sand. A hostile world of burning sun.Outlines of several once-busy cities shimmer on the horizon. Now empty of inhabitants, their buildings lie in ruins.In the distance a group of people—a family—walks toward us.Ahead lies shelter: a “shuck” the family calls home and which they know they must reach before the light fails, as to be out after dark is to invite danger and almost certain death.To survive in this alien world of shifting sand, they must find an object hidden in or near water. But other families want it too. And they are willing to fight to the death to make it theirs.It is beginning to rain in Fairfax County, Virginia, when McKenzie Strathie wakes up. An ordinary teenage girl living an ordinary life—except that the previous night she found a sand-lizard in her bed, and now she’s beginning to question everything around her, especially who she really is ...Two very different worlds featuring a group of extraordinary characters driven to the very limit of their endurance in a place where only the strongest will survive.

**The World To-day** 1908

**Oregon Dunes National Seashore** United States. Congress. Senate. Interior and Insular Affairs 1965

**The Legend of Sleeping Bear** Kathy-jo Wargin 2013-08-15 It started with a mother's love... Fleeing from a forest fire, a mother bear urges her two cubs into the watery shelter of a vast body of water. Though it will be difficult, she knows if they can swim across to the opposite shore, they will be safe. With calls of encouragement and steadfast love, Mother Bear guides her cubs across the great lake, Lake Michigan. And the story of what happens once Mother Bear reaches the far shore becomes the legend behind the natural wonder known as Sleeping Bear Dune. In 1998 writer Kathy-jo Wargin and nature artist Gijsbert van Frankenhuyzen combined their talents to bring The Legend of Sleeping Bear to life. Published to wide acclaim, the book was soon named the Official Children's Book of Michigan.

**The Message in the Sand Dunes** Frances K. Judd 1952

**The Australian Flying Corps in the Western and Eastern Theatres of War, 1914-1918** Frederic Morley Cutlack 1923

**Monthly Catalog of United States Government Publications** United States. **Sand** Michael Welland 2009-01-15 From individual grains to desert dunes, from the bottom of the sea to the landscapes of Mars, and from billions of years in the past to the future, this is the extraordinary story of one of nature’s humblest, most powerful, and most ubiquitous materials. Told by a geologist with a novelist’s sense of language and narrative, Sand examines the science—sand forensics, the physics of granular materials, sedimentology, paleontology and archaeology, planetary exploration—and at the same time explores the rich human context of sand. Interwoven with tales of artists, mathematicians, explorers, and even a vampire, the story of sand is an epic of environmental construction and destruction, an adventure in staggering scales of time and distance, yet a tale that encompasses the ordinary and everyday. Sand, in fact, is all around us—it has made possible our computers, buildings and windows, toothpaste, cosmetics, and paper, and it has played dramatic roles in human history, commerce, and imagination. In this luminous, kinetic, revelatory account, we do indeed find the world in a grain of sand.

**The Rise and Decline of the Redneck Riviera** Harvey H. Jackson 2012-05-01 A “lucid, often pithy” history of the eastern Gulf Coast vacation destination by an Alabama native who is “a talented storyteller as well as a scholar” (Washington Times). In *The Rise and Decline of the Redneck Riviera*, Southern historian Harvey H. Jackson presents a cultural history of the coastal region stretching from Mobile Bay and Gulf Shores, Alabama, to Panama City, Florida—an area known as the “Redneck Riviera.” Jackson chronicles the evolution of the are from the late 1920s, when it was sparsely populated with small fishing villages, through to the devastating BP/Deepwater Horizon oil spill of 2010. With both personal and historical perspectives, Jackson explores the area’s development as a middle- and working-class vacation destination following World War II, the building boom of the fifties and sixties, and the emergence of the Spring Break “season.” He tracks the hurricanes that destroyed historic construction, the building boom that brought high-rise condos, and the effects of the 2008 housing market crash. While his major focus is on the social, cultural, and economic development, he also documents the environmental and financial impacts of natural disasters and the politics of beach access and dune and sea turtle protection.

**Dune** Frank Herbert 2016-10-25 NOW A MAJOR MOTION PICTURE directed by Denis Villeneuve and starring Timothée Chalamet, Zendaya, Jason Momoa, Rebecca Ferguson, Oscar Isaac, Josh Brolin, Stellan Skarsgård, Dave Bautista, Stephen McKinley Henderson, Chang Chen, Charlotte Rampling, and Javier Bardem A deluxe hardcover edition of the best-selling science-fiction book of all time—part of Penguin Galaxy, a collectible series of six sci-fi/fantasy classics, featuring a series introduction by Neil Gaiman Winner of the AIGA + Design Observer 50 Books | 50 Covers competition Science fiction’s supreme masterpiece, Dune will be forever considered a triumph of the imagination. Set on the desert planet Arrakis, it is the story of the boy Paul Atreides, who will become the mysterious man known as Muad'Dib. Paul’s noble family is named stewards of Arrakis, whose sands are the only source of a powerful drug called “the spice.” After his family is brought down in a traitorous plot, Paul must go undercover to seek revenge, and to bring to fruition humankind’s most ancient and unattainable dream. A stunning blend of adventure and mysticism, environmentalism and politics, Dune won the first Nebula Award, shared the Hugo Award, and formed the basis of what is undoubtedly the grandest epic in science fiction. Penguin Galaxy Six of our greatest masterworks of science fiction and fantasy, in dazzling collector-worthy hardcover editions, and featuring a series introduction by #1 New York Times bestselling author Neil Gaiman, Penguin Galaxy represents a constellation of achievement in visionary fiction, lighting the way toward our knowledge of the universe, and of ourselves. From historical legends to mythic futures, monuments of world-building to mind-bending dystopias, these touchstones of human invention and storytelling ingenuity have transported millions of readers to distant realms, and will continue for generations to chart the frontiers of the imagination. The Once and Future King by T. H. White Stranger in a Strange Land by Robert A. Heinlein Dune by Frank Herbert 2001: A Space Odyssey by Arthur C. Clarke The Left Hand of Darkness by Ursula K. Le Guin Neuromancer by William Gibson For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

**Range Rover Classic - Torque Technical Tips - Vol 1** Range Rover Club of Australia, Victoria Branch 2020-07-01 Torque Technical Tips books are a must for Range Rover Classic enthusiasts. There are two volumes in this series, which totals over 700 pages of expert technical tips for Land Rover’s Range Rover Classic - spanning from 1977 to 1992 and have been collated from "Torque", the club magazine of one of the oldest Range Rover Clubs around - the Range Rover Club of Australia, Victoria Branch. Volume 1 has 373 pages and takes tips and articles dated between 1977 and 1986., Contributions come from a mix of Land Rover mechanics and club enthusiasts and include: how these wonderful cars work; getting home if you break down in the middle of nowhere (we call it bush-mechanics, in Australia); modifications; off-road driving and recovery techniques; and many more. The wealth of knowledge from the club that was formed in 1977 is emmense; it's still going strong and still has some of the original members.

**The Butterfly** 1913

**A Sand County Almanac** Aldo Leopold 2020-08-12 Few books have had a greater impact than A Sand County Almanac, which many credit with launching a revolution in land management. Written as a series of

sketches based principally upon the flora and fauna in a rural part of Wisconsin, the book, originally published by Oxford in 1949, gathers informal pieces written by Leopold over a forty-year period as he traveled through the woodlands of Wisconsin, Iowa, Arizona, Sonora, Oregon, Manitoba, and elsewhere; a final section addresses the philosophical issues involved in wildlife conservation. Beloved for its description and evocation of the natural world, Leopold's book, which has sold well over 2 million copies, remains a foundational text in environmental science and a national treasure.

**The Specific Density of Scientists** David Conn 2012-07-05 Praise for THE SPECIFIC DENSITY OF SCIENTISTS: As an expert in understanding and defining the cult mentality, David Conn manages, through logic and his strong faith, to explain the inability, or the refusal, of many scientists to separate the spiritual self from the scientifically driven self (in other words, "to bifurcate"). This, he boldly says, is their real path to illumination, to Jesus Christ, the only source of Truth, the creator not only of science, but of the entire universe. Mr. Conn bolsters his case by way of an inarguable and mathematically proven truism. --Lillian Carucio, author, Humility, A Lost Virtue and the Search for Truth In his latest book, THE SPECIFIC DENSITY OF SCIENTISTS, Mr. Conn deals with the cult mentality that has invaded the realm of science and scientists. He explains four major concepts that the unbifurcated wing of science has either refused to consider or has fearfully and illogically swept aside. He exposes the weakness of the unbifurcated scientists, their minions, and the growing majority of a general population who, having themselves been infused with unscientific

scientism, see to it that their children, their students, their spouses, and their friends, are also steeped in it. This errant scientism is a mentality that people are unaware of, but that flows in and out of them in torrents through public institutions, workplaces, artistic expressions, and social networks until it reaches a remarkable status of being something that Everybody knows and believes! Four major concepts in THE SPECIFIC DENSITY OF SCIENTISTS were introduced in Mr. Conn's last book, the Christian science fiction novel, LEDNORFS DILEMMA. One of these concepts, Graths Paradox, is a Terminal Corruption Hypothesis. It is tenuous, at best, as analysts attempt to discern whether the United States has or has not reached the point of no return. In this latest book, Mr. Conn says: If the point of no return has not been reached, the only hope for a healthy realignment lies with America's intellectual community and its general citizenry coming to understand that scientists and other intellectuals are wrong to think their brains and education give them special advantages in determining whether or not God exists and participates in the lives of His people. The masses, therefore, should no longer be swayed by scientists who have no special authority in these spiritual matters. It is critical that they pursue the one source of Truth with all their hearts, souls and minds. David Conn was for ten years a lead analyst with Chevrons big environmental laboratory and then joined the Department of Defense as a Quality Control Representative, a liaison among several Naval and Air Force bases and the Defense Department, performing surveillance over chemicals and fuels and the occasional fueling of Air Force One. Aside from LEDNORFS DILEMMA, David Conn also co-authored THE CULT THAT DIED (G. P. Putnam's Sons, New York, 1980).
