Reel Bad Arabs Jack G. Shaheen 2012-12-31 A groundbreaking book that dissects a slanderous history dating from cinema's earliest days to contemporary Hollywood blockbusters that feature machine-gun wielding and bomb-blowing "evil" Arabs Award-winning film authority Jack G. Shaheen, noting that only Native Americans have been more relentlessly smeared on the silver screen, painstakingly makes his case that "Arab" has remained Hollywood's shameless shorthand for "bad guy," long after the movie industry has shifted its portrayal of other minority groups. In this comprehensive study of over one thousand films, arranged alphabetically in such chapters as "Villains," "Sheikhs," "Cameos," and "Cliffhangers," Shaheen documents the tendency to portray Muslim Arabs as Public Enemy #1—brutal, heartless, uncivilized Others bent on terrorizing civilized Westerners. Shaheen examines how and why such a stereotype has grown and spread in the film industry and what may be done to change Hollywood's defamation of Arabs.

Hermosa Beach Chris Ann Miller 2007 Unlike most

Los Angeles County beach communities, the City of Hermosa Beach owns its own beach. But perhaps more than most coastal Southern California destination cities, Hermosa Beach represents shared experience, detailed on thousands of postcards over the decades. This greater square mile of sand, surf, and sun has conjured cherished memories for fishermen, surfers, and volleyball players as well as jazz fans, diners and tavern celebrants, and simply lovers of the beach who found lifelong or short-term happiness in Hermosa. These postcards recall many bygone landmarks and changing lifestyles and celebrate the Hermosa Beach century (1907-2007).

Was Frankenstein Really Uncle Sam? Richard J. Rolwing 2017-02-13 Chief Justice Marshall said the legislature makes, the executive executes, and judiciary construes the law. James Wilson quoted Francis Bacon two hundred years earlier saying that making law is not for the judges. Chief Justice Hutchinson of Massachusetts in 1767 said that the Judge should never be the Legislator because then the Will of the Judge would be the Law: and this tends to a State of Slavery. Justice Wilson himself said in 1789 that when once it is established that Congress possesses the power to pass an act, our province ends with its construction. . . . The province of the courts is to pass upon the validity of laws, not to make them, and when their validity is established, to declare their meaning and apply their provisions. All else lies beyond their domain (p.379). In 1960, Charles Black confirmed that for the colonists, the function of the Judge was thus placed in sharpest antithesis to that of the Legislator who alone was concerned with what the law ought to be. Washington's farewell address told the delegates to confine themselves within their respective Constitutional spheres, avoiding in the exercise of powers of one department to encroach upon another. The spirit of encroachment tends to consolidate the powers of all the departments in one, and thus to create . . . a real despotism. In 1926, Justice Brandeis stated, The doctrine of separation of powers was adopted . . . to preclude the exercise of arbitrary power.

Congress. Senate. Interior and Insular Affairs 1965 [The Book of Sand](#) Theo Clare 2022-07-19 The first in an epic series created by one of our finest and most inventive storytellers, also known as the international bestseller Mo Hayder Sand. A hostile world of burning sun. Outlines of several once-busy cities shimmer on the horizon. Now empty of inhabitants, their buildings lie in ruins. In the distance a group of people—a family—walks toward us. Ahead lies shelter: a “shuck” the family calls home and which they know they must reach before the light fails, as to be out after dark is to invite danger and almost certain death. To survive in this alien world of shifting sand, they must find an object hidden in or near water. But other families want it too. And they are willing to fight to the death to make it theirs. It is beginning to rain in Fairfax County, Virginia, when McKenzie Strathie wakes up. An ordinary teenage girl living an ordinary life—except that the previous night she found a sand-lizard in her bed, and now she’s beginning to question everything around her, especially who she really is ... Two very different worlds featuring a group of extraordinary characters driven to the very limit of their endurance in a place where only the strongest will survive.

The Rise and Decline of the Redneck Riviera Harvey H. Jackson 2012-05-01 A “lucid, often pithy” history of the eastern Gulf Coast vacation destination by an Alabama native who is “a talented storyteller as well as a scholar” (Washington Times). In *The Rise and Decline of the Redneck Riviera*, Southern historian Harvey H. Jackson presents a cultural history of the coastal region stretching from Mobile Bay and Gulf Shores, Alabama, to Panama City, Florida—an area known as the “Redneck Riviera.” Jackson chronicles the evolution of the area from the late 1920s, when it was sparsely populated with small fishing villages, through to the devastating

BP/Deepwater Horizon oil spill of 2010. With both personal and historical perspectives, Jackson explores the area's development as a middle- and working-class vacation destination following World War II, the building boom of the fifties and sixties, and the emergence of the Spring Break "season." He tracks the hurricanes that destroyed historic construction, the building boom that brought high-rise condos, and the effects of the 2008 housing market crash. While his major focus is on the social, cultural, and economic development, he also documents the environmental and financial impacts of natural disasters and the politics of beach access and dune and sea turtle protection.

Information, The Hidden Side of Life Cédric Gaucherel 2019-01-23 This book explores the unity of life. It proposes that the concept of information is the inner essence of what we today call life. The importance of information for our species is obvious. Human beings are highly dependent on information, constantly exchanging with conspecifics. In a less apparent way, we are the product of genetic and epigenetic information which determines our development in a given environment from a fertilized egg to the adult stage. Even less apparent is that information plays a determining role in ecosystems. This observation

may include the prebiotic systems in which life emerged. Our claim is that Nature processes information continuously. This means that even beyond living entities, we can see messages and decoding procedures. Nature can be said to send messages to its own future and then to decode them. Nature “talks” to itself! The systematic organization of messages suggests that, in some respects, we should even speak of the “languages” of Nature.

The Hero Behind the Sand Dune Susan Blanchard
2021-08-17 David loves his super hero costumes, however he was unable to wear one this day. The lesson he learned was, that you don't need to have a super hero costume, in order to be a hero. Susan Houck Blanchard: I live in Monroe NH. My grandson, David is an inspiration to me. David loves his super hero costumes and knows the power of each one! He also loves animals, especially puppies! David is very gentle to all living creatures and he lives in the moment! He is a reminder for me also, to live in the moment. To help when we can. We can all be heroes, nobody needs a costume to be a hero! Thank you David for your inspiration.

Mackenzie Craig: I live in Bethlehem NH. Presently, I am a Junior in High School. My goal is to study Illustration at a local art school. With the opportunity of illustrating this book, it will certainly add to my portfolio. I have enjoyed the entire process of creating the illustrations for this book and created each picture with my own stylistic elements and my favorite mediums: ink and watercolors. Every line and brush stroke in this book were made with joy.

A Sand County Almanac Aldo Leopold 2020-08-12
Few books have had a greater impact than A Sand County Almanac, which many credit with

launching a revolution in land management.

Written as a series of sketches based principally upon the flora and fauna in a rural part of Wisconsin, the book, originally published by Oxford in 1949, gathers informal pieces written by Leopold over a forty-year period as he traveled through the woodlands of Wisconsin, Iowa, Arizona, Sonora, Oregon, Manitoba, and elsewhere; a final section addresses the philosophical issues involved in wildlife conservation. Beloved for its description and evocation of the natural world, Leopold's book, which has sold well over 2 million copies, remains a foundational text in environmental science and a national treasure.

Discovering Dune Dominic J. Nardi 2022-08-01
Frank Herbert's Dune is one of the most well-known science fiction novels of all time, and it is often revered alongside time-honored classics like The Lord of the Rings. Unlike Tolkien's work, the Dune series has received remarkably little academic attention. This collection includes fourteen new essays from various academic disciplines--including philosophy, political science, disability studies, Islamic theology, environmental studies, and Byzantine history--that examine all six of Herbert's Dune books. As a compendium, it asserts that a multidisciplinary approach to the texts can lead to fresh discoveries. Also included in this collection are an introduction by Tim O'Reilly, who authored one of the first critical appraisals of Herbert's writings in 1981, and a comprehensive bibliography of essential primary and secondary sources.

The Legend of Sleeping Bear Kathy-jo Wargin
2013-08-15 It started with a mother's love... Fleeing from a forest fire, a mother bear urges her two cubs into the watery shelter of a vast body of water. Though it will be difficult, she knows if they can swim across to the opposite shore, they will be safe. With calls of encouragement and steadfast love, Mother Bear guides her cubs across the great lake, Lake Michigan. And the story of what happens once Mother Bear reaches the far shore becomes the legend behind the natural wonder known as

Sleeping Bear Dune. In 1998 writer Kathy-jo Wargin and nature artist Gijsbert van Frankenhuyzen combined their talents to bring The Legend of Sleeping Bear to life. Published to wide acclaim, the book was soon named the Official Children's Book of Michigan.

Maryland's Ocean City Beach Patrol Robert M. Craig 2019-08-05 The Ocean City Beach Patrol has been saving lives along Maryland's Atlantic coast since 1930. The job remains that of "an athlete with a buoy," and the reality of the responsibility dispels any stereotype of a cushy summer job filled by a youth merely sitting all day in the sun. Aided by semaphore flags, the beach patrol's lifeguards have reunited countless lost children with parents they are charged to enforce the town's beach ordinances; and sometimes at personal risk, they navigate rip currents and heavy surf to rescue distressed swimmers and bring them ashore to safety. This brief history examines the innovations, training, competitions, organizational structure, and character building that are all part of the serious lifesaving work of Maryland's Ocean City Beach Patrol-- young men and women whose inestimable contributions over the years have given rise to the patrol's international reputation in lifesaving circles.
