**Why We Love Dogs, Eat Pigs, and Wear Cows** Melanie Joy 2011-09-01 In this paperback edition is a foreword by activist and author John Robbins and a reader's group study guide. This ground-breaking work, voted one of the top ten books of 2010 by VegNews Magazine, offers an absorbing look at why and how humans can so wholeheartedly devote ourselves to certain animals and then allow others to suffer needlessly, especially those slaughtered for our consumption. Social psychologist Melanie Joy explores the many ways we numb ourselves and disconnect from our natural empathy for farmed animals. She coins the term "carnism" to describe the belief system that has conditioned us to eat certain animals and not others. In *Why We Love Dogs, Eat Pigs, and Wear Cows* Joy investigates factory farming, exposing how cruelly the animals are treated, the hazards that meatpacking workers face, and the environmental impact of raising 10 billion animals for food each year. Controversial and challenging, this book will change the way you think about food forever.

**Female Chauvinist Pigs** Ariel Levy 2005-09-13 A classic work on gender culture exploring how the women's movement has evolved to Girls Gone Wild in a new, sex-imposed chauvinism. In the tradition of Susan Faludi's Backlash and Naomi Wolf's The Beauty Myth, New York Magazine writer Ariel Levy studies the effects of modern feminism on women today. Meet the Female Chauvinist Pig—the new brand of “empowered woman” who wears the Playboy bunny as a talisman, bares all for Girls Gone Wild, pursues casual sex as if it were a sport, and embraces “raunch culture” wherever she finds it. If male chauvinist pigs of years past thought of women as pieces of meat, Female Chauvinist Pigs of today are doing them one better, making sex objects of other women—and of themselves. They think they're being brave, they think they're being funny, but in Female Chauvinist Pigs, Ariel Levy asks if the joke is on them. In her quest to uncover why this is happening, Levy interviews college women who flash for the cameras on spring break and teens raised on Paris Hilton and breast implants. She examines a culture in which every music video seems to feature a stripper on a pole, the memoirs of porn stars are climbing the bestseller lists, Olympic athletes parade their Brazilian bikini waxes in the pages of Playboy, and thongs are marketed to prepubescent girls. Levy meets the high-powered women who create raunch culture—the new oinking women warriors of the corporate and entertainment worlds who eagerly defend their efforts to be “one of the guys.” And she traces the history of this trend back to conflicts between the women's movement and the sexual revolution long left unresolved. Levy pulls apart the myth of the Female Chauvinist Pig and argues that what has come to pass for liberating rebellion is actually a kind of limiting conformity. Irresistibly witty and wickedly intelligent, Female Chauvinist Pigs makes the case that the rise of raunch does not represent how far women have come, it only proves how far they have left to go.

**The Fourth Industrial Revolution** Klaus Schwab 2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to develop new frameworks that advance progress.

**Lord of the Flies** William Golding 2003-12-16 Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

**Graphic Design** Stephen J. Eskilson 2019-05-21 A classic and indispensable account of graphic design history from the Industrial Revolution to the present Now in its third edition, this acclaimed survey explores the evolution of graphic design from the 19th century to the present day. Following an exploration of design's prehistory in ancient civilizations through the Industrial Revolution, author Stephen J. Eskilson argues that modern design as we know it grew out of the influence of Victorian-age reformers. He traces the emergence of modernist design styles in the early 20th century, examining the wartime politicization of regional styles. Richly contextualized chapters chronicle the history of the Bauhaus and the rise of the International Style in the 1950s and '60s, and the postmodern movement of the 1970s and '80s. Contemporary considerations bring the third edition up to date, with discussions of app design, social media, emojis, big data visualization, and the use of animated graphics in film and television. The contemporary phenomenon of the citizen designer, professionals who address societal issues either through or in addition to their commercial work, is also addressed, highlighting protagonists like Bruce Mau and the Center for Urban Pedagogy. This edition also features 45 additional images, an expanded introduction and epilogue, and revised text throughout. A newly redesigned interior reinforces the fresh contents of this now-classic volume.

**Public Information Messages** Anne Barron 2012-08-23 Public information messages are an important means of state-citizen communication in today's societies. Using this genre, citizens are directed to “never ever drink and drive”, to “slow down” and to “learn to say no”. Yet, this book presents the first in-depth analysis of public information messages from a linguistic perspective, and indeed also from a cross-cultural perspective. Specifically, the study, adopting genre analysis, contrasts a corpus of state-run national public information campaigns in Germany and Ireland. A taxonomy of moves is developed inductively and the interactional features of the genre are analysed and related to the context of use. The comprehensive discussion of theoretical and methodological issues, the in-depth analysis and the extensive bibliography make this book of interest to researchers and students in (contrastive) discourse analysis, (cross-cultural) pragmatics, contrastive rhetoric, advertising, social psychology, mass communication and media studies. Copy-writers will also profit from the insights gained, particularly within the context of an increase in Europe-wide public information campaigns.

**Strategic Planning for Public Relations** Ronald D. Smith 2017-05-18 Strategic Planning for Public Relations is in its fifth edition of offering an innovative and clear approach for students looking to learn how to develop public relations campaigns. Ronald Smith shows how to implement pragmatic, research-driven strategic campaigns used in public relations practice, and draws from his years of experience as a professional in the industry and his years of teaching in the classroom. **The English Pig Industry** Food and R (NA) House of Commons Environment 2009-01-13 This report finds that, although the pig industry is highly competitive and is well known for being cyclical, the last ten years have seen a steady decline in the scale and productivity of the English pig industry and an increase in the pig meat imported into the UK to satisfy consumer demand. The lack of transparency in the supply chain leads farmers to form the view that they are not getting their fair share. UK pigs cost more to produce than their EU counterparts. The industry blames this on the effects of disease outbreaks, high feed prices, burdensome environmental regulations and the high cost of the introduction of new welfare standards of housing for pigs in 1999. Pig producers are rightly proud of their high welfare standards, but the Committee believes that they have not successfully promoted to the consumer the justification for the higher cost of English pig meat. Retailers and catering suppliers are responsible for ensuring that labelling of pig meat products is clear and unambiguous, but producers, animal welfare groups such as the RSPCA, and Government, have a role in making certain that consumers understand the difference between the standards of welfare in the various methods of pig production and ensuring that pig meat produced in the UK is of a high welfare standard. Defra must continue to: advise other Government departments and public bodies on the welfare standards of farm assurance schemes in order to encourage them to adopt a more innovative approach in public sector procurement of pig meat; liaise closely with the industry on its Health and Welfare Council; fund research into the pig-specific diseases which have severely impacted on the industry in recent years.

**The Austin Clarke Library** Austin Clarke 2015-08-22 Gathered together are three extraordinary books by renowned storyteller and memoirist Austin Clarke. 'Membering, Clarke's breathtaking memoir, spans over fifty years of his life as a writer, chronicling his coming to Canada in the fifties, formative experiences with Malcolm X, Chinua Achebe, and LeRoi Jones, and bursting with cultural insights and poignant memories from a narrative master. In The Polished Hoe, winner of the Giller Prize and the 2003 Commonwealth Writers' Prize, when an elderly Bimshire village woman calls the police to confess to a murder, the result is a shattering all-night vigil that brings together elements of the African diaspora in one epic sweep. Set on the post-colonial West Indian island of Bimshire in 1952, The Polished Hoe unravels over the course of 24 hours but spans the lifetime of one woman and the collective experience of a society informed by slavery. Choosing His Coffin is a selection of Clarke's finest work from more than forty years of storytelling, drawing on his Caribbean roots and his years in Canada. These stories range in theme from growing up in West Indian society and what it means to be black in both the United States and Canada to surviving as an immigrant in a predominantly Anglo-Saxon culture.
