*Kill the Messenger* Richard Phelps  
2017-09-04 In response to public demand, federal legislation now requires testing of most students in the United States in reading and

mathematics in grades three through eight. Many educators, parents, and policymakers who have paid little attention to testing policy issues in the past need to have better information on the topic than has generally been available. *Kill the Messenger*, now in paperback, fills this gap. This is perhaps the most

thorough and authoritative work in defense of educational testing ever written. Phelps points out that much research conducted by education insiders on the topic is based on ideological preference or profound self-interest. It is not surprising that they arrive at emphatically anti-testing conclusions. Much, if not most, of this hostile research is passed on to the public by journalists as if it were neutral, objective, and independent. Kill the Messenger explains and refutes many of the common criticisms of testing; describes testing opponents' strategies, through case studies of Texas and the SAT; illustrates the profound media bias against testing; acknowledges testing's limitations, and suggests how it can be improved; and finally, outlines the consequences of losing the "war on standardized testing.

2011-12-15 The Messenger Trilogy builds to an exciting conclusion as Tristan Shays and Rebecca Traeger return to Florida to help a troubled teen exonerate her wrongfully imprisoned father. But when the girl is reported as being kidnapped, an Amber Alert makes them wanted felons—just as Tristan is sent to warn a New Orleans police captain that her life is in danger. To make matters worse, they've crossed Calvin Traeger, whose powerful business associates at Consolidated Offshore want to keep the pair alive just long enough to extract valuable information about the location of an untapped oil reserve. If they are to have any hope of surviving, Tristan and Rebecca must decide to trust Stelios and his boss, Wolfson, who

tried to frame Tristan for murder in Atlanta. When Consolidated's forces bring out a living weapon of unimaginable destructive power, they will all have to rely on centuries-old prophecies that appear to foretell the outcome of the impending conflict. On the shores of the Gulf of Mexico, the two warring factions clash, thrusting the messenger into a battle for his very life.

"In the age of fake news, understanding who we trust and why is essential in explaining everything from leadership to power to our daily relationships." -Sinan Aral We live in a world where proven facts and verifiable data are freely and widely available. Why, then, are self-confident ignoramuses so often believed over thoughtful experts? And why do seemingly irrelevant details such as a person's appearance or financial status influence whether or not we trust what they are saying, regardless of their wisdom or foolishness? Stephen Martin and Joseph Marks compellingly explain how in our uncertain and ambiguous world, the messenger is increasingly the message. We frequently fail, they

argue, to separate the idea being communicated from the person conveying it, explaining why the status or connectedness of the messenger has become more important than the message itself. Messengers influence business, politics, local communities, and our broader society. And Martin and Marks reveal the forces behind the most infuriating phenomena of our modern era, such as belief in fake news and how presidents can hawk misinformation and flagrant lies yet remain.

**The Critique of Theological Reason**

James P. Mackey 2000-10-12 Far from merely reinvigorating relativism, postmodernism has detected and expressed in our time a powerful nihilating process of which truth and reality itself are the final casualties; and with these morality and religion. Beginning from the theological reaches of philosophy, this book argues that gods played a crucial part in modern philosophy, even when it was most critical of them; that the dominant nihilism of Derrida is really an excessive and misleading outcome of a contemporary philosophy which could otherwise resonate with all that is best in our evolutionary image of the universe;

that moralists who turn to art in order to overcome the fact-value version of this deadly dualism do not thereby rule out religion; and that a Christian theology which recognises the evolutionary and historical conditions of faith and revelation is once again producing a theology that builds upon the best of contemporary philosophy and science.

**The Bright Messenger** Algernon Blackwood 2018-05-14  
Algernon Blackwood was a prolific writer across short stories, novels and plays. His passion for the supernatural and for ghost stories together with a fascination for all things in the occult and mysticism created some of the most enthralling works ever written. HP Lovecraft referred to his works as that of a

master. Henry James in referring to The Bright Messenger said "the most extraordinary novel on psychoanalysis, one that dwarfs the subject." Many other authors similarly lauded him. Today his works are beginning to regain their former

popularity. Here we publish one of his classic novels, The Bright Messenger, one of a number of books that any fan of the occult should read.
