The book encourages mental health professionals to harness the knowledge of the dramatic therapies and contemporary neuroscience in the service of facilitating integration among discrepant parts of the self, the family and the group.

A Brief History of the Recent Future David Manning 2012-03-01 David Manning wrote A Brief History of the Recent Future in the mid 1970s with the idea of satirizing the present by forecasting the most bizarre imaginable future. The result was a verbally animated cartoon tracing the evolution of an apocalyptic conflict between proponents of ganic garbage vs those advocating fcial garbage as civilization's final energy resource. Along the way, the tale introduces such absurdities as a credit-system economy; the Bronx Sanitation Air Force; a 3,000-acre rubber-raft island named Carabia; a news toaster that burns headlines onto breakfast bread; and people metabolically transformed by Mango Tango, the core building block of the artificial ecosystem. Resurrected from the past, the book remains, after 35-plus years, a satiric fantasy, now looking back at the odd events nobody knows transpired but brought us to our increasingly dystopian state. Once the harbinger of a future too ridiculous to contemplate, the original bizarre predictions resonate more every day.

Wonderland Steven Johnson 2016-11-15 "A house of wonders itself. . . . Wonderland inspires grins and well-what-d'ya-knows" —The New York Times Book Review From the New York Times–bestselling author of How We Got to Now and Extra Life, a look at the world-changing innovations we made while keeping ourselves entertained. This lushly illustrated history of popular entertainment takes a long-zoom approach, contending that the pursuit of novelty and wonder is a powerful driver of world-shaping technological change. Steven Johnson argues that, throughout history, the cutting edge of innovation lies wherever people are working the hardest to keep themselves and others amused. Johnson’s storytelling is just as delightful as the inventions he describes, full of surprising stops along the journey from simple concepts to complex modern systems. He introduces us to the colorful innovators of leisure: the explorers, proprietors, showmen, and artists who changed the trajectory of history with their luxurious wares, exotic meals, taverns, gambling tables, and magic shows. In Wonderland, Johnson compellingly argues that observers of technological and social trends should be looking for clues in novel amusements. You'll find the future wherever people are having the most fun.

Hanging Out, Messing Around, and Geeking Out Mizuko Ito 2009-10-30 An examination of young people's everyday new media practices—including video-game playing, text-messaging, digital media production, and social media use. Conventional wisdom about young people's use of digital technology often equates generational identity with technology identity: today's teens seem constantly plugged in to video games, social networking sites, and text messaging. Yet there is little actual research that investigates the intricate dynamics of youths' social and recreational use of digital media. Hanging Out, Messing Around, and Geeking Out fills this gap, reporting on an ambitious three-year ethnographic investigation into how young people are living and learning with new media in varied settings—at home, in after-school programs, and in online spaces. Integrating twenty-three case studies—which include Harry Potter podcasting, video-game playing, music sharing, and online romantic breakups—in a unique collaborative authorship style, Hanging Out, Messing Around, and Geeking Out is distinctive for its combination of in-depth description of specific group dynamics with conceptual analysis.

Messing with the Enemy Clint Watts 2018-05-29 A former FBI Special Agent and leading cyber-security expert offers a devastating and essential look at the misinformation campaigns, fake news, and electronic espionage operations that have become the cutting edge of modern warfare—and how we can protect ourselves and our country against them. Clint Watts electrified the nation when he testified in front of the House Intelligence Committee regarding Russian interference in the 2016 election. In Messing with the Enemy, the cyber and homeland security expert introduces us to a frightening world in which terrorists and cyber criminals don’t hack your computer, they hack your mind. Watts reveals how these malefactors use your information and that of your friends and family to work for them through social media, which they use to map your social networks, scour your world affiliations, and master your fears and preferences. Thanks to the schemes engineered by social media manipulators using you and your information, business executives have coughed up millions in fraudulent wire transfers, seemingly good kids have joined the Islamic State, and staunch anti-communist Reagan Republicans have cheered the Russian government’s hacking of a Democratic presidential candidate’s e-mails. Watts knows how they do it because he’s mirrored their methods to understand their intentions, combat their actions, and coopt their efforts. Watts examines a particular social media platform—from Twitter to internet Forums to Facebook to LinkedIn—and a specific bad actor—from al Qaeda to the Islamic State to the Russian and Syrian governments—to illuminate exactly how social media tracking is used for nefarious purposes. He explains how he’s learned, through his successes and his failures, to engage with hackers, terrorists, and even the Russians—and how these interactions have generated methods of fighting back. Shocking, funny, and eye-opening, Messing with the Enemy is a deeply urgent guide for living safe and smart in a super-connected world.

Hidden Children of the Holocaust Suzanne Vromen 2010-03-04 In the terrifying summer of 1942 in Belgium, when the Nazis began the brutal roundup of Jewish families, parents searched desperately for safe haven for their children. As Suzanne Vromen reveals in Hidden Children of the Holocaust , these children found sanctuary with other families and schools-but especially in Roman Catholic convents and orphanages. Vromen has interviewed not only those who were hidden as children, but also the Christian women who rescued them, and the nuns who gave the children shelter, all of whose voices are heard in this powerfully moving book. Indeed, here are numerous first-hand memoirs of life in a wartime convent-the secrecy, the humor, the admiration, the anger, the deprivation, the cruelty, and the kindness-all with the backdrop of the terror of the Nazi occupation. We read the stories of the women of the Resistance who risked their lives in placing Jewish children in the care of the Church, and of the Mothers Superior and nuns who sheltered these children and hid their identity from the authorities. Perhaps most riveting are the stories told by the children themselves-abruptly separated from distraught parents and given new names, the children were brought to the convents with a sense of urgency, sometimes under the cover of darkness. They were plunged into a new life, different from anything they had ever known, and expected to adapt seamlessly. Vromen shows that some adapted so well that they converted to Catholicism, at times to fit in amid the daily prayers and rituals, but often because the Church

appealed to them. Vromen also examines their lives after the war, how they faced the devastating loss of parents to the Holocaust, struggled to regain their identities and sought to memorialize those who saved them.

Don't Mess With Me: The Strange Lives of Venomous Sea Creatures (How Nature Works) Paul Erickson 2018-12-04 The role of venoms in nature ... and in human medicine Why are toxins so advantageous to their possessors as to evolve over and over again? What is it about watery environments that favors so many venomous creatures? Marine biologist Paul Erickson explores these and other questions with astounding images from Andrew Martinez and other top underwater photographers. GREAT for teaching STEM Marine Biology Scorpions and brown recluse spiders are fine as far as they go, but if you want daily contact with venomous creatures, the ocean is the place to be. Blue-ringed octopi, stony corals, sea jellies, stonefish, lionfish, poison-fanged blennies, stingrays, cone snails, blind remipedes, fire urchins—you can choose your poison in the ocean. Venoms are often but not always defensive weapons. The banded sea krait, an aquatic snake, wriggles into undersea caves to prey on vicious moray eels, killing them with one of the world’s most deadly neurotoxins, which it injects through fangs that resemble hypodermic needles. The Komodo dragon, an ocean-going reptile, tears into a water buffalo with its blade-like teeth, then secretes a deadly toxin into the open wounds.

Living and Learning with New Media Mizuko Ito 2009-06-05 This report summarizes the results of an ambitious three-year ethnographic study, funded by the John D. and Catherine T. MacArthur Foundation, into how young people are living and learning with new media in varied settings—at home, in after school programs, and in online spaces. It offers a condensed version of a longer treatment provided in the book Hanging Out, Messing Around, and Geeking Out (MIT Press, 2009). The authors present empirical data on new media in the lives of American youth in order to reflect upon the relationship between new media and learning. In one of the largest qualitative and ethnographic studies of American youth culture, the authors view the relationship of youth and new media not simply in terms of technology trends but situated within the broader structural conditions of childhood and the negotiations with adults that frame the experience of youth in the United States. The book that this report summarizes was written as a collaborative effort by members of the Digital Youth Project, a three-year research effort funded by the John D. and Catherine T. MacArthur Foundation and conducted at the University of California, Berkeley, and the University of Southern California. John D. and Catherine T. MacArthur Reports on Digital Media and Learning
