Cities and Creativity from the Renaissance to the Present Ilja Van Damme 2017-09-18 This volume critically challenges the current creative city debate from a historical perspective. In the last two decades, urban studies has been engulfed by a creative city narrative in which concepts like the creative economy, the creative class or creative industries proclaim the status of the city as the primary site of human creativity and innovation. So far, however, nobody has challenged the core premise underlying this narrative, asking why we automatically have to look at cities as being the agents of change and innovation. What processes have been at work historically before the predominance of cities in nurturing creativity and innovation was established? In order to tackle this question, the editors of this volume have collected case studies ranging from Renaissance Firenze and sixteenth-century Antwerp to early modern Naples, Amsterdam, Bologna, Paris, to industrializing Sheffield and nineteenth-and twentieth century cities covering Scandinavian port towns, Venice, and London, up to the French techno-industrial city Grenoble. Jointly, these case studies show that a creative city is not an objective or ontological reality, but rather a complex and heterogenic "assemblage," in which material, infrastructural and spatial elements become historically entangled with power-laden discourses, narratives and imaginaries about the city and urban actor groups.

Industrial Clusters John F. Wilson 2022-07-01 *Industrial Clusters* shows the latest state of knowledge on the topic of industrial clusters, with a particular focus on clustering in the UK, and brings together a chronological coverage of the phenomenon. This set of original essays by a group of leading business and industrial historians offers fresh perspectives about clusters and clustering. A primary emphasis of the collection is how knowledge is generated and disseminated across a cluster, and whether these processes stimulated innovation and consequently longer-term sustainability. This analysis also prompts questions about which unit of analysis to examine, from the entrepreneurs and firms they created through to the industry as a whole and district in which they are located, or whether one should look outside the region for explanatory factors. Covering regions as diverse as North Wales, the Scottish Highlands, the City of London, the Potteries, Sheffield and Lancashire, the essays have been channelled to provide a detailed understanding of these issues. The editors have also provided a challenging Conclusion that suggests a new research agenda that could well unravel some of the mysteries associated with clustering. This edited collection will be of interest to international researchers, academics and students in the fields of business and management history, innovation, industrialisation and clusters.

Industrial Clusters and Regional Business Networks in England, 1750-1970

2017-07-05 Although economists have long recognised industrial districts as one of the key features of many economies, it is only recently that attention has been focused on the region as an effective means of generating accurate insights into the larger picture of economic performance. This renewed interest in regional issues has also placed at centre stage the role played by networks as a principal organisational feature of the local business community, providing scholars with a rich topic for investigation and debate. Recent work has shown that universal generalisations concerning the impact of networking on the performance of industrial clusters lack credibility, highlighting the consequent need to compare the role played by business networks in a variety of regions. Using a copious range of research material examining several British regions, this volume poses a series of fundamental questions about the nature of industrial clusters and networks. Particular attention is paid to identifying the basic characteristics of a network, outlining how they evolved in key industrial clusters, and assessing their impact on industrial performance, both regionally and nationally. The durability of such networks is another key thread that runs through the essays, prompting comparison with industrial clusters in Britain and abroad. These are issues which stimulate discussion on a wide range of factors within the disciplines of business, economic and social history.

Sidney Pollard David Renton 2004-10-29 Sidney Pollard was a pioneering labour historian who influenced the great luminaries in the field, E.P. Thompson and E.J. Hobsbawm. Almost single-handedly, he pioneered the study of economic management in history and the understanding of the economic processes by which regions are formed. As a labour historian, his contribution to the study of the marginalized in society was original and vital. His history was intimately connected with his

personal life - from escape to Britain from Nazi-occupied Vienna on the Jewish kindertransporte, to work in Britain, the USA, Israel and apartheid South Africa. The Making of Sheffield Melvyn Jones 2004-09-30 Covering thousands of years and a multitude of topics, the book tells the story of the development from a group of small agricultural settlements into a town and then a modern city. It covers success, disappointments, miserable periods and glorious episodes that have marked the city's evolution.

The Companion to Martin Chuzzlewit Nancy Aycock Metz 2001 This companion provides the most comprehensive annotation of Martin Chuzzlewit ever undertaken. The factual annotation supplies information on the historical, literary, and topical allusions which inform Dickens' work, thus establishing sound foundations for further critical enquiry of this major Victorian novel.

Advancing with the Army Marcus Ackroyd 2007-01-04 Providing the first ever statistical study of a professional cohort in the era of the industrial revolution, this prosopographical study of some 450 surgeons who joined the army medical service during the Revolutionary and Napoleonic wars, charts the background, education, military and civilian career, marriage, sons' occupations, wealth at death, and broader social and cultural interests of the members of the cohort. It reveals the role that could be played by the nascent professions in this period in promoting rapid social mobility. The group of medical practitioners selected for this analysis did not come from affluent or professional families but profited from their years in the army to build up a solid and sometimes spectacular fortune, marry into the professions, and place their sons in professional careers. The study contributes to our understanding of Britishness in the period, since the majority of the cohort came from small-town and rural Scotland and Ireland but seldom found their wives in the native country and frequently settled in London and other English cities, where they often became pillars of the community.

The Ends of Life Keith Thomas 2009-02-12 How should we live? That question was no less urgent for English men and women who lived between the early sixteenth and late eighteenth centuries than for this book's readers. Keith Thomas's masterly exploration of the ways in which people sought to lead fulfilling lives in those centuries between the beginning of the Reformation and the heyday of the Enlightenment illuminates the central values of the period, while casting incidental light on some of the perennial problems of human existence. Consideration of the origins of the modern ideal of human fulfilment and of obstacles to its realization in the early modern period frames an investigation that ranges from work, wealth, and possessions to the pleasures of friendship, family, and sociability. The cult of military prowess, the pursuit of honour and reputation, the nature of religious belief and scepticism, and the desire to be posthumously remembered are all drawn into the discussion, and the views and practices of ordinary people are measured against the opinions of the leading philosophers and theologians of the time. The Ends of Life offers a fresh approach to the history of early modern England, by one of the foremost historians of our time. It also provides modern readers with much food for thought on the problem of how we should live and what goals in life we should pursue.

The Historical Archaeology of the Sheffield Cutlery and Tableware Industry, 1750-1900 Victoria Beauchamp 2002 For more than 250 years the name Sheffield was synonymous with the cutlery industry, although archaeological evidence shows that

the industry goes back as far as the 12th century. With many of the buildings rapidly disappearing or being redeveloped, aside from those that have already been destroyed, this type of publication forms a vital record of an important part of industrial England. The contributors to this volume look at the development of the industry in the 18th century, the production of cutlery and flatware, forks and spoons, the organisation of the labour and working practices, and the geographical and structural development of workshops and other buildings associated with the industry.

The Politics of Hospital Provision in Early Twentieth-Century Britain Barry M Doyle 2015-10-06 Doyle examines the role of local and national politics on hospitals. Ultimately, Doyle argues that social and economic diversity created a number of models for future health care which rested on a combination of voluntary and municipal provision.

A Regional Study of Yorkshire Schools, 1500-1820 John Roach 1998 This history focuses on Yorkshire, but should facilitate the understanding of all of England's educational history and invite future comparative studies. Roach (education, U. of Sheffield, UK) studies the individual histories of schools in the region, puts education during the 300-year span into its local context, and posits that while various districts of England responded both to educational ideas that spread throughout the country and to decisions that originated in parliament, some of the best ideas started in the provinces themselves. The Bowie Knife Norm Flayderman 2004 From Norm Flayderman, perhaps the best-known name in arms collecting, comes this exciting new book on the Bowie Knife. Gladstone Centenary Essays David Bebbington 2000-01-01 W. E. Gladstone towers over the politics of the nineteenth century. He is known for his policies of financial rectitude, his campaigns to settle the Irish question and his championship of the rights of small nations. He remains the only British Prime Minister to have served for four separate terms. In 1998 an international conference at Chester College brought together Gladstone scholars to mark the centenary of his death, and many of the papers presented on that occasion are published in this volume. Covering the whole of the statesman's long political life from the first Reform Act to the last decade of the nineteenth century, they range over topics as diverse as parliamentary reform and free trade, Gladstone's English Nonconformist supporters and his Irish Unionist opponents. A select bibliography, arranged by subject, supplies guidance for further research. The collection forms a tribute, appreciative but critical, to the Grand Old Man of British politics.

Sheffield Ruth Harman 2004-01-01 Sheffield has been synonymous with steelmaking since the eighteenth century and with cutlery for centuries before that. But while it has an extraordinary variety of industrial buildings connected to its metal trades, there is another side to what is England's least known big city. Set amidst magnificent scenery, it has some surprising survivals of its earlier

history, as well as handsome public, commercial and religious buildings designed by its Victorian local architects. The leafy western suburbs that rise towards the Peak District were described by Sir John Betjeman as the finest in England. The 1950s and 60s saw the city famed for its innovative public housing, university buildings and churches. After the decline of its manufacturing sector in the 1980s, major new venues for sport and entertainment, the prize-winning Peace Gardens and exciting new buildings such as the Millennium Galleries, Winter Garden and Persistence Works are visible signs of a renaissance in the city's fortunes. This is the first comprehensive architectural guide to Sheffield. It describes the buildings of the city centre and those of the inner suburbs within a two mile radius of it. It also covers the lower Don valley, still the heart of Sheffield's steel industry, the outer suburbs to the west where those who made their fortunes from it lived in splendour and there are excursions to some outstanding buildings on the outskirts. Major buildings including the Town Hall, the two Cathedrals and the Winter Garden are given more detailed treatment, as are the two Universities. The central areas are the subject of walks, those further out have suggested tours by car. Illustrated throughout in colour with specially commissioned photographs and with these images augmented by historic maps, paintings and drawings, Sheffield will enable residents to look at familiar buildings in a fresh light and encourage visitors to discover for themselves the city's enticing contrasts of industrial heritage and natural beauty.

History of the Lodge of Edinburgh (Mary's Chapel) No.1. David Murray Lyon 1873-01-01

A History and Description of Winchester Bernard Bolingbroke Woodward 186?

Loyalty, memory and public opinion in England, 1658–1727 Edward Vallance 2019-05-10 This book makes an important contribution to the ongoing debate over the emergence of an early modern 'public sphere'. Focusing on the petition-like form of the loyal address, it argues that these texts helped to foster a politically aware public by mapping shifts in the national 'mood'. Covering addressing campaigns from the late-Cromwellian to the early Georgian period, the book explores the production, presentation, subscription and publication of these texts. It argues that beneath partisan attacks on the credibility of loyal addresses lay a broad consensus about the validity of this political practice. Ultimately, loyal addresses acknowledged the existence of a 'political public' but did so in a way which fundamentally conceded the legitimacy of the social and political hierarchy. They constituted a political form perfectly suited to a fundamentally unequal society in which political life continued to be centered on the monarchy.

The Grass Roots of English History David Hey 2016-05-05 In medieval and early modern Britain, people would refer to their local district as their 'country', a term now largely forgotten but still used up until the First World War. Core groups of families that remained rooted in these 'countries', often bearing distinctive surnames still in use today, shaped local culture and passed on their traditions. In *The Grass Roots of English History*, David Hey examines the differing nature of the various local societies that were found throughout England in these periods. The book provides an update on the progress that has been made in recent years in our understanding of the history of ordinary people living in different types of local societies throughout England, and demonstrates the value of studying the varied landscapes of England, from towns to villages, farmsteads, fields and woods to highways and lanes, and historic buildings from cathedrals to

cottages. With its broad coverage from the medieval period up to the Industrial Revolution, the book shows how England's socio-economic landscape had changed over time, employing evidence provided by archaeology, architecture, botany, cultural studies, linguistics and historical demography. *The Grass Roots of English History* provides an up-to-date account of the present state of knowledge about ordinary people in local societies throughout England written by an authority in the field, and as such will be of great value to all scholars of local and family history.

Findings Mary Carolyn Beaudry 2006-01-01 Mary C. Beaudry mines archaeological findings of sewing and needlework to discover what these small traces of female experience reveal about the societies and cultures in which they were used. Beaudry's geographical and chronological scope is broad: she examines sites in the United States and Great Britain, as well as Australia and Canada, and she ranges from the Middle Ages through the Industrial Revolution. The author describes the social and cultural significance of "findings": pins, needles, thimbles, scissors, and other sewing accessories and tools. Through the fascinating stories that grow out of these findings, Beaudry shows the extent to which such "small things" were deeply entrenched in the construction of gender, personal identity, and social class.

Modern Christianity and Cultural Aspirations David Bebbington 2003-06-01

Christianity and cultural aspirations are inevitably in tension: the combination invites a suspicion that temporal pursuits have slackened a quest for divine approbation. Nevertheless, as Christians generally believe that worldly success may be a position of influence worth seeking for noble reasons, it is truly an area of tension, rather than merely temptation. This volume explores this lively juxtaposition in the context of modern Britain and America. In fifteen original essays, a range of well-respected scholars examine the cultural aspirations of a broad spectrum of Christians, including Baptists, Congregationalists, Methodists, Presbyterians, Roman Catholics, and Anglicans, as they were expressed in arenas as diverse as politics, education, architecture, and sport.

Voices from Exile 2015-06-05 The volume satisfies the researcher with an interest in exile as an historical and literary phenomenon. The first eight essays focus on the British and Irish dimension. The following four widen the discussion to encompass continental Europe. And finally, the historical dimension is deepened with contributions the marginalisation of the mass emigration of the Jews within German memory, and the 'exile' of princesses.

Royal Historical Society Annual Bibliography of British and Irish History Austin Gee 1998 The Royal Historical Society's Annual Bibliography of British and Irish History provides a comprehensive and authoritative survey of books and articles on historical topics published in a single calendar year. The volume covers all periods of British and Irish history from Roman Britain to the late twentieth century, and also includes a section on imperial and commonwealth history. British Businessmen and Canadian Confederation Andrew Smith 2008-07-16 Andrew Smith discusses the role of British investors in Canadian Confederation, covering the period from the construction of the Grand Trunk Railroad in the 1850s to Canada's purchase of Rupert's Land in 1869-70. He describes how some investors lobbied the British government for the policies that made Confederation possible, working closely with the Fathers of Confederation, many of whom were participants in the same trans-Atlantic crony-capitalist system. British factory owners with classical liberal beliefs, however, disliked Confederation because they believed it would delay the political independence of the North American colonies, something they saw as beneficial.
