The laureates explained the central role of banks in nancial ...

These insights form the foundation of modern bank regulation. Through statistical analysis and historical source research, Bernanke demonstrated how failing banks played a decisive role in the global depression of the 1930s, the worst economic crisis in . modern history. The collapse of the banking system explains why the downturn was not only ...

LESSON 7 HUNGER AND EATING

The consequences of need deprivation compel humans (and all mammals) to seek what is missing. Drives exist to insure preservation of life, and what is enough is different for different people. Hunger signals the need for food. Restrained or restricted eating compels humans to respond to food in predictable ways, including compensatory eating.

WHY WE AGE AND HOW TO STOP IT

Caloric Restriction "Caloric restriction with adequate nutrition is the only non- genetic, and the most consistent non-pharmacological intervention that extends lifespan in model organisms from yeast to mammals, and protects against the deterioration of biological functions, delaying or reducing the risk of many age-related
