*Twentieth-Century Building Materials* Thomas C.

Jester 2014-08-01 Over the concluding decades

of the twentieth century, the historic preservation community increasingly turned its attention to modern buildings, including bungalows from the 1930s, gas stations and diners from the 1940s, and office buildings and architectural homes from the 1950s.

Conservation efforts, however, were often hampered by a lack of technical information about the products used in these structures, and to fill this gap *Twentieth-Century Building Materials* was developed by the U.S. Department of the Interior's National Park Service and first published in 1995. Now, this invaluable guide is being reissued—with a new preface by the book's original editor. With more than 250 illustrations, including a full-color photographic essay, the volume remains an indispensable reference on the history and conservation of modern building materials. Thirty-seven essays written by leading experts offer insights into the history, manufacturing processes, and uses of a wide range of materials, including glass block, aluminum, plywood, linoleum, and gypsum board. Readers will also learn about how these

materials perform over time and discover valuable conservation and repair techniques. Bibliographies and sources for further research complete the volume. The book is intended for a wide range of conservation professionals including architects, engineers, conservators, and material scientists engaged in the conservation of modern buildings, as well as scholars in related disciplines.

**The Gilded Buddha** Alex R. Furger 2017 This book celebrates in words and images the traditional metal crafts practised for over a thousand years by the creators of religious Buddhist statues in Nepal. The skills of these artisans are nurtured with deep respect for tradition, regarding religion, iconography and technology. Wax modellers, mould makers, casters, fire-gilders and chasers are among the specialists of the Newar ethnic group, whose work is characterised to this day by a melding of age-old technology, great skill, religious observance and contemplation. There are numerous books and exhibition catalogues dedicated to Buddhist art and iconography but little was available about the craft of the artists who turn the religious imagery into metal casts. This book fills this gap, with a thoroughly documented and historical account of the development of this "archaic" technology. The well-informed text and comprehensive photographic coverage constitute the only up-to-date account and full documentation of an art that is 1300 years old but dying out: the "ritual" production of Buddhist statues in the lost wax casting technique. The author, Dr. Alex Furger, is an archaeologist who has studied ancient metallurgy and metalworking techniques over the past four decades. He spent twenty-five years at the head of the Roman site of Augusta Raurica and lives in Basel (Switzerland). He is the author of over 130 articles in scientific journals and twelve books in the field of culture history. The fieldwork for this book led him repeatedly to Nepal, where he met and interviewed dozens of craftsmen in their workshops. This book is addressed to readers interested in culture history, travellers to Asia, collectors of statues of Buddha, (avocational) metalworkers, historians of technology, Buddhists, ethnologists,

archaeologists, art historians, scholars of Asia and to libraries and museums.

*Metal Craft Discovery Workshop* Linda O'Brien 2005-10-19 Creating with metal has never been easier! Whether it's jewelry, journals or kitschy keepsakes that spark your fire, Metal Craft Discovery Workshop shows just how easy it is to create 20 fun and funky projects step-by-step, from a miniature journal to an altered lunch box. A nontraditional approach and a comprehensive techniques section will introduce you to the whimsical side of metal. Not only will you learn secrets to cutting and joining metal, you'll also:

- Explore ways to age and add texture to metal
- Discover the numerous types of metal available, including copper, mesh, wire and recycled material
- Conjure up beautiful patina finishes with several "secret" recipes
- Find further inspiration in the artists' gallery section

You'll love creating these pieces, whether you've worked with metal before or you're new to the medium. Give your recycle bin a second glance and start crafting beautiful pieces with metal today.
