Modern African Wars (4) Peter Abbott 2014-02-20 In the 1970s, during the ruinous 30-year dictatorship of General Mobutu, periodic rebellions required the hasty insertion once again of Belgian and French paratroops to save European lives. From the mid-1990s the country

split again, becoming the battleground for the largest African war in history, as armies and rebel groups from Rwanda, Angola, Zimbabwe, Uganda, Namibia and other countries crossed into the Congo to support one side or the other, or simply to loot the rich resources. Major operations ended – or paused – in 2002, but the old hatreds and constant lure of the Congo's natural resources continue to boil over into periodic outbreaks. Featuring specially commissioned full-colour artwork and rare photographs, this is the harrowing story of the wars that ravaged the Congo for four decades.

Manufacturing Processes for Design Professionals Rob Thompson 2007-11-30 An encyclopaedic guide to production techniques and materials for product and industrial designers, engineers, and architects. Today's product designers are presented with a myriad of choices when creating their work and preparing it for manufacture. They have to be knowledgeable about a vast repertoire of processes, ranging from what used to be known as traditional "crafts" to the latest technology, to enable their designs to be manufactured effectively and efficiently. Information on the internet about such

processes is often unreliable, and search engines do not usefully organize material for designers. This fundamental new resource explores innovative production techniques and materials that are having an impact on the design industry worldwide. Organized into four easily referenced parts—Forming, Cutting, Joining, and Finishing—over seventy manufacturing processes are explained in depth with full technical descriptions; analyses of the typical applications, design opportunities, and considerations each process offers; and information on cost, speed, and environmental impact. The accompanying step-by-step case studies look at a product or component being manufactured at a leading international supplier. A directory of more than fifty materials includes a detailed technical profile, images of typical applications and finishes, and an overview of each material's design characteristics. With some 1,200 color photographs and technical illustrations, specially commissioned for this book, this is the definitive reference for product designers, 3D designers, engineers, and architects who need a convenient, highly accessible, and practical reference.

Mackenzie's Five Thousand Receipts in All the Useful and Domestic Arts An American Physician 2013-07-16 Published in 1829 in Philadelphia, Mackenzie's Five Thousand Receipts in All the Useful and Domestic Arts was an unknown "American physician's" adaptation of a best-selling British reference book by Colin Mackenzie. The book is an all-encompassing miscellanea of household information specifically revised from its original British publication for use in the United States. Covering everything from gardening, metallurgy, and pickling and preserving to watercolors, medical cures, perfumery, brewing, and cooking, this early 19th century compendium was an essential guide for cooking and

managing a household during this time period. With the extensive material covered, the tome was very well received in America, as was the original publication in the United Kingdom. Even though the work was first published nearly 200 years ago, the recipes and advice have proven to be relevant today—lip balms citing the book as the recipe source can be found on the Internet, as well as numerous blogs referring to the brewing section of the book. While recipes such as Acorn Coffee, Clove Cordial, and Elephant's Milk may only be of historical interest, Mackenzie's Five Thousand Receipts in All the Useful and Domestic Arts still has significance today beyond simple historical curiosity. This edition of Mackenzie's Five Thousand Receipts in All the Useful and Domestic Arts was reproduced by permission from the volume in the collection of the American Antiquarian Society, Worcester, Massachusetts. Founded in 1812 by Isaiah Thomas, a Revolutionary War patriot and successful printer and publisher, the society is a research library documenting the lives of Americans from the colonial era through 1876. The society collects, preserves, and makes available as complete a record as possible of the printed materials from the early American experience. The cookbook collection comprises approximately 1,100 volumes.
