From USA Today best-selling author, Willow Winters, comes a tempting tale of fated love, lust-filled secrets and the beginnings of an epic war. His chiseled jaw and silver gaze haunts both my nightmares and my dreams, though I’ve only ever gotten a glimpse of either. There’s a treaty between us and them; mere mortals and the ones who terrify but keep us safe. The contract demands that every year there’s an offering and this year I’ll walk across that stage presenting myself. We have no idea what to expect if they choose someone, since they haven’t done so in generations. The only thing we know is that the ones they take belong to them forevermore. If chosen, you don’t come back, or so the story of the treaty goes. Gather and present yourself. This is the offering . . . and I . . . belong to him.

All the Secrets Charlotte Byrd 2020-11-17 The only way he’ll agree to the story about the great and reclusive writer, D. B. Carter is if I agree to spend the week with him. He thinks that the reason that I left is that I don’t want him. Nothing could be from the truth. He thinks I was insulted. He’s wrong. I have a fire in my body that burns just for him. Still, I leave. He shouldn’t have asked for something like that. All that it did was push me away. But I have to write this story to save my job. It won’t be published for a while and I’ll have time to convince him to go on the record. At least, that’s what I think. But then the article comes out and he shows up at my house. He’s angry. I’m mad. What happens when that fire between us starts to ignite? What happens when he pulls me close and doesn’t let go? Praise for Charlotte Byrd “BEST AUTHOR YET! Charlotte has done it again! An Examination of Late Assyrian Metalwork John Curtis 2013 Although the Assyrian kingdom that dominated the Ancient Near East between the ninth and seventh centuries BC had a rich material culture, attested particularly by the distinctive stone wall reliefs and colossal gateway figures, practically nothing is known about Assyrian metalwork. There has been no previous survey of this subject, largely because most of the material was not accessible. This volume makes available for the first time a vast amount of previously unpublished metalwork, much of it from the Assyrian capital city of Nimrud, excavated first by Sir Henry Layard between 1845 and 1851 and then by the British School of Archaeology in Iraq between 1949 and 1963. It emerges that Assyria had a thriving metalworking industry probably superior to any contemporary state in the region, and was producing large quantities of sophisticated bronze and ironwork, of high technical quality and sometimes elaborately decorated. This book will therefore be of interest to archaeologists, art historians and metallurgists. It is the publication of a PhD thesis that was successfully submitted in 1979. It is published here in its original form in order to make the large amount of primary data that it contains available to a wider circle of scholars.

Artists’ Laboratory David Scott Kastan 2010 The Artists Laboratory series presents the more experimental and less familiar work of contemporary artists, opening up the creative process to explore the conceptual and practical concerns with which they engage. In recent years Stephen Farthing has investigated the back story of paintings, his own and those by other artists, using drawing and painting to understand their character, content and form. Examining the art-historical classifications that define the pictures, the narratives that have informed their content or the patterns they share with other works, he sifts and organises the information in drawings, and proposes conclusions in paintings. David Scott Kastan responds to this body of work, published here for the first time, with an eloquent analysis of several key pieces, while Farthing and his fellow artist Stephen Chambers discuss subjects ranging from the attitude required to write about a painting and the role that text can play in making one, to the differences in working on either side of the Atlantic.

Black Boy White School Brian F. Walker 2012-01-03 In a hard-hitting novel about fitting in—or not—Anthony “Ant” Jones gets transported from his East Cleveland hood to an almost all-white prep school and has to figure out where he belongs...before he loses himself entirely. Black Boy White School is a memorable debut that will appeal to fans of Walter Dean Myers and Sherman Alexie. Anthony has never been outside his rough neighborhood when he receives a scholarship to Belton Academy, an elite prep school in Maine. But at Belton things are far from perfect. Everyone calls him “Tony,” assumes he’s from Brooklyn, expects him to play basketball, and yet acts shocked when he fights back. As Anthony tries to adapt to a world that will never fully accept him, he’s in for a rude awakening: Home is becoming a place where he no longer belongs. In debut author Brian F. Walker’s honest and dynamic novel about staying true to yourself, Anthony might find a way to survive at Belton, but what will it cost him?

Analysis, Controllability and Optimization of Time-Discrete Systems and Dynamical Games Werner Krabs 2012-12-06 Focuses on the analysis, optimization and controllability of time-discrete dynamical systems and games

under the aspect of stability, controllability and (for games) cooperative and non-cooperative treatment. The investigation of stability is based on Lyapunov's method which is generalized to non-autonomous systems. Optimization and controllability of dynamical systems is treated, among others, with the aid of mapping theorems such as implicit function theorem and inverse mapping theorem. Dynamical games are treated as cooperative and non-cooperative games and are used in order to deal with the problem of carbon dioxide reduction under economic aspects. The theoretical results are demonstrated by various applications.
