P. Mallory, author of In Search of the Indo-Europeans and The Origins of the Irish Who are the Europeans? Where did they come from? New research in the fields of archaeology and linguistics, a revolution in the study of genetics, and cutting-edge analysis of ancient DNA are dramatically changing our picture of prehistory, leading us to question what we thought we knew about these ancient peoples. This paradigm-shifting book paints a spirited portrait of a restless people that challenges our established ways of looking at Europe’s past. The story is more complex than at first believed, with new evidence suggesting that the European gene pool was stirred vigorously multiple times. Genetic clues are also enhancing our understanding of European mobility in epochs with written records, including the arrival of the Anglo-Saxons, the spread of the Slavs, and the adventures of the Vikings. Now brought completely up to date with all the latest findings from the fast-moving fields of genetics, DNA, and dating, Jean Manco’s highly readable account weaves multiple strands of evidence into a startling new history of the continent, of interest to anyone who wants to truly understand Europeans’ place in the ancient world.

Kerry James Marshall Kerry James Marshall 2015 With a career spanning almost three decades, Kerry James Marshall is well known for his complex and multilayered portrayals of youths, interiors, nudes, housing estate gardens, land- and seascapes, all of which synthesize different traditions and genres while seeking to counter stereotypical representations of black people in society. Working across various mediums, from paintings to comic-style drawings to sculptural installations, photographs, and videos, the artist conflates actual and imagined events from African-American history, integrating a range of stylistic influences to address the limited historiography of black art. Produced on the occasion of Marshall's first exhibition at David Zwirner in London and designed by JNL Design in Chicago, Look See features beautiful reproductions of every painting on view in the show - all of them brand-new compositions - as well as numerous details and preparatory drawings, installation photographs and new scholarship by Robert Storr and Hamza Walker. As suggested by the show's title, these portraits use the etymological differences between looking and seeing as their point of departure, featuring subjects whose dissociated stares seem as defiant as they are mystifying. In keeping with his signature approach, Marshall has painted his figures in strikingly opaque black pigments, both fashioning and abstracting their presences in order to assimilate the limitations and contradictions of style, subject, and chronology inherent in art-historical narratives written from a white, Western perspective. Taken all together, the range of materials included in Look See constitutes a vibrant and comprehensive portrait of Marshall's original and ever-evolving practice.

The Essential Joseph Beuys Alain Borer 1997 Joseph Beuys (1921-1986) was one of the most original and influential artists of the twentieth century. Challenging the traditional confines of art, he embraced a broader, philosophically and politically based practice formulated in the dictum "Everyone is an artist." His unique approach to the creative process transformed materials such as felt, fat, honey, blood, wax, copper, and sulfur into fluent and expressive artistic media. Called the most olfactory artist in history, he preferred the smells of the pungent and decaying, just as he favored the indecent, ugly, and disfigured over the polished, shiny, tasteful products of city slickers and social seekers. His long-term radical aims included the introduction of direct democracy through referendum, free access to all educational institutions, and a restructuring of the economy based on ecological necessity. The Essential Joseph Beuys was inspired by the idea of an imaginary Beuys exhibition unhampered by the problems connected with actual exhibitions, e.g., those of geography, insurance, fragility, and the concerns of lenders. The book provides a definitive survey of the artist's work in every medium in which he worked—drawings and watercolors, sculptures and objects, environments and actions, and multiples and printed works. Arranged chronologically and covering the four decades he was active (1945-1985), the book reflects the changes in Beuys's choice of register, from the soliloquy of his early days to the dialogue of his period as a teacher to the powerful language of his public lectures to international audiences. In his introductory essay, "A Lament for Joseph

Beuys," Alain Borer summarizes the artist's oeuvre, drawing out themes of great complexity and relating them to Beuys' artistic and social milieus.

Binational Urbanism Bernd Upmeyer 2015-01-09 Never before was the mobility of individuals higher than today. People work and live not only in different places, but often even between different countries. 'Binational urbanism' examines the way of living of people who start a second life in a second city in a second nation-state, without saying goodbye to their first city. They live in constant transit between two homes, between two countries. As a global phenomenon binational urbanists come from all strata of society, including the working class, and the highly educated and cosmopolitan creative classes. Through their continuous change of location binational urbanists seem to be living in a state that is characterized by a constant longing, or a constant homesickness, for the other city. The author interviewed people of Turkish origin living in Germany, who commute regularly between cities in Germany and Turkey and live, whether deliberately and consciously chosen or not, this innovative urban way of life. Only at first sight do they appear as rooted residents in their host country Germany, yet in actual fact they are extremely mobile and utilise the best of both cultures in tandem. Binational urbanism has the potential to become one of the most interesting forms of life in the twenty-first century. Accordingly, this book creates a theory of binational urbanism that is developed from these interviews.
