Handbook of Printed Circuit Manufacturing Raymond H. Clark 2012-12-06 Of all the components that go into electronic equipment, the printed circuit probably requires more manufacturing operations--each of which must be per formed by a skilled person--than any other. As a shift supervisor early in my printed circuit career, I had to hire and train personnel for all job functions. The amount of responsibility delegated to my subordinates depended strictly on how well I had been able to train them. Training people can be a trying experience and is always a time-consuming one. It behooved me to help my workers obtain the highest degree of job under standing and skill that they and I were capable of. One hindrance to effective teaching is poor continuity of thought, for example, having to say to a trainee, "Wait a minute; forget what I just told you. We have to go back and do some thing else first. " It was in trying to avoid pitfalls such as this that I undertook a detailed examination of the processes involved, what I thought each trainee had to know, and what questions they would most frequently ask. From this analysis I developed the various process procedures. Only after I had done so was I able to train effectively and with the confidence that I was doing the best possible job. Answers had to be at hand for all of their questions and in what ever detail they needed to know.

Nationalism and Identity Stefano Harney 1996 The nation-state of Trinidad and Tobago offers a unique nation-space, as Homi K Bhabha would say, for the study of the forces and ideologies of nationalism. This book reveals how this ethnically diverse nation, independent for less than forty years, has provided fertile ground for the creative tension between the imagination of the writer and the official discourse on nationalism. Harney argues that this discourse has in turn been embedded in a struggle that propelled the nation's story. He explores the influences on the sense of national identity caused by migration and the ethnicization of migrant communities in the cities. Adding to the comparative tone of much of this book, models of nationalism and ethnicity, often based on other societies, are tested against the imaginings of Trinidad by such essayists as VS Naipaul, CLR James, Willi Chen, Valerie Belgrave and Earl Lovelace. Using the wealth of imaginative literature produced by Trinidadians at home and abroad over the last forty years, together with European-based scholarship on theories of nationalism, this book provides a fascinating understanding of the forging of a national identity.
