Republic of Poland International Monetary Fund 2009-05-06 This paper focuses on an arrangement under the Flexible Credit Line (FCL) for the Republic of Poland. Poland's macroeconomic performance has been very strong. The authorities believe that access under an FCL arrangement in the amount of SDR 13.69 billion could help maintain market access and safeguard against downside risks during the current period of high volatility and retrenchment in international capital markets. IMF staff concurs and believes that, given Poland's regional importance, the FCL may provide insurance not only to Poland, but also to the region more broadly.

The Global Innovation Index 2018 Cornell University 2018-07-10 The Global Innovation Index 2018 provides detailed metrics about the innovation performance of 126 countries and economies around the world. Its 80 indicators explore a broad vision of innovation, including political environment, education, infrastructure and business sophistication. The GII 2018 analyses the energy innovation landscape of the next decade and identifies possible breakthroughs in fields such as energy production, storage, distribution, and consumption. It also looks at how breakthrough innovation occurs at the grassroots level and describes how small-scale renewable systems are on the rise.

Global Productivity Alistair Dieppe 2021-06-09 The COVID-19 pandemic struck the global economy after a decade that featured a broad-based slowdown in productivity growth. *Global Productivity: Trends, Drivers, and Policies* presents the first comprehensive analysis of the evolution and drivers of productivity growth, examines the effects of COVID-19 on productivity, and discusses a wide range of policies needed to rekindle productivity growth. The book also provides a far-reaching data set of multiple measures of productivity for up to 164 advanced economies and emerging market and developing economies, and it introduces a new sectoral database of productivity. The World Bank has created an extraordinary book on

productivity, covering a large group of countries and using a wide variety of data sources. There is an emphasis on emerging and developing economies, whereas the prior literature has concentrated on developed economies. The book seeks to understand growth patterns and quantify the role of (among other things) the reallocation of factors, technological change, and the impact of natural disasters, including the COVID-19 pandemic. This book is must-reading for specialists in emerging economies but also provides deep insights for anyone interested in economic growth and productivity. Martin Neil Baily Senior Fellow, The Brookings Institution Former Chair, U.S. President's Council of Economic Advisers This is an important book at a critical time. As the book notes, global productivity growth had already been slowing prior to the COVID-19 pandemic and collapses with the pandemic. If we want an effective recovery, we have to understand what was driving these long-run trends. The book presents a novel global approach to examining the levels, growth rates, and drivers of productivity growth. For anyone wanting to understand or influence productivity growth, this is an essential read. Nicholas Bloom William D. Eberle Professor of Economics, Stanford University The COVID-19 pandemic hit a global economy that was already struggling with an adverse pre-existing condition—slow productivity growth. This extraordinarily valuable and timely book brings considerable new evidence that shows the broad-based, long-standing nature of the slowdown. It is comprehensive, with an exceptional focus on emerging market and developing economies. Importantly, it shows how severe disasters (of which COVID-19 is just the latest) typically harm productivity. There are no silver bullets, but the book suggests sensible strategies to improve growth prospects. The Federal Democratic Republic of Ethiopia International Monetary Fund 2004-03-18 Ethiopia showed commendable performance under the Poverty Reduction and Growth Facility (PRGF) Arrangement. Executive Directors appreciated this development, and emphasized the need to strengthen fiscal and monetary policies, enhance revenues, strengthen public expenditure management, and introduce poverty-related activities. They welcomed the restructuring plan for the Commercial Bank of Ethiopia, and stressed the need to strengthen the organizational structure and finances of the National Bank of Ethiopia. They agreed that Ethiopia has successfully completed the fifth review under the PRGF program, and approved further financial assistance.

Islamic Republic of Mauritania International Monetary Fund 2007-02-02 This paper discusses key findings of the Second Review Under the Staff Monitored Program (SMP) for Mauritania. Mauritania's performance since the beginning of 2006 has been fully satisfactory. All quantitative targets and structural benchmarks under the SMP that covered the first six months of 2006 were observed. Sound macroeconomic policies reined

in inflation and contributed to the elimination of the parallel foreign exchange market premium. The proposed Poverty Reduction and Growth Facility (PRGF)-supported program will consolidate the progress achieved during the SMP toward macroeconomic stabilization.

Plunkett's Almanac of Middle Market Companies:

Middle Market Research, Statistics & Leading Companies Jack W. Plunkett 2007-07

Plunkett's Almanac of Middle Market Companies 2008 is designed to be time-saving business development tool for professionals, marketers, sales directors, consultants and strategists seeking to understand and reach middle market American companies. It will also be of great use to placement, recruiting and human resources professionals, as well as professionals working in economic development, lending and media. It covers competitive intelligence, market research and business analysis--everything you need to identify and develop strategies for middle market corporations. Coverage includes all major business sectors, from InfoTech to health care to telecommunications and much more. (We have intentionally omitted retail companies and banks.) These profiles and details on over 500 middle market firms are pulled from our extensive company and industry databases. We also include a business glossary and a listing of business contacts, such as industry associations and government agencies. Next, we profile hundreds of leading middle market companies. Our company profiles include complete business descriptions and up to 27 executives by name and title. Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling key word search and export of key information, addresses, phone numbers and executive names with titles for every company profiled.

Denmark: 2021 Article IV Consultation-Press Release; Staff Report; and Staff Supplement International Monetary 2021-06-14

Denmark entered the pandemic on a strong economic footing and utilized its large policy space built over time to successfully address the crisis and lay the ground for a strong recovery. The outlook is for a rebound in activity, but uncertainty remains elevated with risks tilted to the downside. Macrofinancial vulnerabilities persist as housing price growth has accelerated

and household debt remains high. The current account declined but remains in surplus.

The Israeli Central Bank Daniel Maman 2011-03-01 This book examines the local and global political and institutional processes that have led to the strengthening of the Israeli central bank within the context of the now predominant neoliberal regime. Using Israel as a case study to identify broader patterns around the world, the authors examine the strengthening of central banks as a key dimension of the institutionalisation of the global regime. Drawing on an in-depth analysis of the political economy of the Israeli central bank since the mid-1980s, the authors show how the Bank of Israel mobilized global logics in order to strengthen its position vis-à-vis competing actors, especially the Ministry of Finance, and to promote the institutionalisation of the neoliberal regime. Employing a conflict-centered theoretical perspective, the authors elucidate the character of this institutional transformation and the mechanisms that were involved. Chapters examine the different phases of the process of central bank strengthening, focusing on the actors involved, the interactions between them, and the political strategies they employed, and analyse the consequences of the process for the shift in macro-economic management and in the mode of state involvement in the economy. Addressing the political and institutional processes that have led to the fundamental transformation of Israeli political economy, this book is a valuable addition to the existing literature on the Israeli banking system, political economy and globalisation.

Kenya International Monetary Fund 2011-07-07
Based on the economic development and policies of Kenya, the staff report was prepared. GDP growth was broadly supported by both private and public investment. Policy issues related to monetary tightening to reign in inflationary expectations, medium-term, monitoring and emerging financial risks and gradual fiscal consolidation are discussed. A waiver for the nonobservance of the performance criteria on net domestic asset (NDA) and net international reserves (NIR) is outlined. A comprehensive

public financial management at both the central and county government levels was introduced as a structural reform.

Ukraine International Monetary Fund 2010-08-06 Even though the global financial crisis hit Ukraine hard, the Stand-By Arrangement (SBA) program managed to restore macroeconomic and financial stability. Executive Directors welcomed the new SBA aimed to consolidate public finances, restore banking system soundness, and develop a more robust monetary policy framework. Directors stressed the need for implementing tax and expenditure policies, pension reforms to catalyze financing, and measures to strengthen the banking system. Directors advised that strict adherence to these policies will help deepen market access, facilitating exit from IMF financial support.

Internet Stock Trading and Market Research for the Small Investor Paul M. Moubarak; Amy E. Steele 2012-06-22 Internet Stock Trading and Market Research for the Small Investor presents a fresh perspective on online trading that eliminates the prerequisite of technical charting, and simplifies the formulation of buying and selling positions down to a fundamental interpretation of corporate news that drives the market. The first part of the book introduces novice traders to basic market dynamics and terminologies, and exposes them to online trade regulations and web resources where market information can be accessed to formulate short-term daily trading positions. The investment strategies recommended in this book target the growing trend of online investors, including short-term and first-time traders who don't employ technical analysis as a trading compass. In the second part, Internet Stock Trading and Market Research for the Small Investor offers individual market researchers an alternative software tool to financial database subscriptions called SMART, which provides free access to discrete-time market data necessary for technical analysis. This combination of the trading and research aspects of the stock market leaves you with an encompassing introduction to the market dynamics, and to the sensible investment strategies that maximize profit from short-term positions in an environment of financial volatility.

Global Economic Prospects, June 2020 World

Bank Group 2020-07-07 The COVID-19 pandemic has, with alarming speed, dealt a heavy blow to an already-weak global economy, which is expected to slide into its deepest recession since the second world war, despite unprecedented policy support. The global recession would be deeper if countries take longer to bring the pandemic under control, if financial stress triggers defaults, or if there are protracted effects on households and firms. Economic disruptions are likely to be more severe and protracted in emerging market and developing economies with larger domestic outbreaks and weaker medical care systems; greater exposure to international spillovers through trade, tourism, and commodity and financial markets; weaker macroeconomic frameworks; and more pervasive informality and poverty. Beyond the current steep economic contraction, the pandemic is likely to leave lasting scars on the global economy by undermining consumer and investor confidence, human capital, and global value chains. Being mostly a reflection of the recent plunge in global energy demand, low oil prices are unlikely to provide much of a boost to global growth in the near term. While policymakers' immediate priorities are to address the health crisis and moderate the short-term economic losses, the likely long-term consequences of the pandemic highlight the need to forcefully undertake comprehensive reform programs to improve the fundamental drivers of economic growth, once the crisis abates. Global Economic Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects, with a special focus on emerging market and developing economies, on a semiannual basis (in January and June). The January edition includes in-depth analyses of topical policy challenges faced by these economies, while the June edition contains shorter analytical pieces.

Mali International Monetary Fund 2010-03-15 This paper discusses key findings of the Third Review Under the Extended Credit Facility (ECF) for Mali. Implementation of the ECF-supported program has been challenged by the global financial crisis and the ensuing global slowdown. The new program aims to continue prudent fiscal policies and complementary reforms. The 2008 food and oil crisis challenged program

implementation, but performance was broadly satisfactory. On the basis of the authorities' satisfactory record, IMF staff recommends completion of the Third Review of the current ECF arrangement.

Mauritania International Monetary Fund 2010-12-03 Program implementation is satisfactory and economic activity is recovering in Mauritania. The budget preserves fiscal discipline and protects infrastructures and social spending. Greater flexibility in the exchange rate and an enhanced monetary policy framework will help build reserves. The structural program continues to focus on improving the business climate. The commitment for continued fiscal consolidation is commended by Executive Directors. This will help strengthen the country's resilience to external shocks, improve the country's prospects for mobilizing external support, sustain economic growth, create jobs, and reduce poverty.

Germany International Monetary Fund. European Dept. 2019-07-10 Germany's economic performance has been strong for the past decade, but external factors and structural challenges are now weighing on growth. The export-dependent economy has been hit by the recent slowdown in global demand, while medium-term growth is expected to fall due to low productivity growth and adverse demographics. External imbalances remain large, partly reflecting rising top income inequality, macro-financial vulnerabilities are rising, and the financial sector continues to suffer from weak profitability. Still, fundamentals are sound, with public and private balance sheets remaining healthy, and the unemployment rate at record lows. Inflation is subdued, but wage growth is continuing to pick up, reflecting the strength of the labor market and increasingly binding capacity constraints.

Press Release 1997

Georgia International Monetary Fund 2011-06-27 This is the final review under the Stand-By

Arrangement for Georgia. Recent economic developments have been largely in line with the program expectations. Policy targets for the year 2011 have been strengthened. The authorities are in the process of designing a medium-term policy framework to address these challenges. The authorities reiterated their interest in a successor arrangement, but needed time to design their medium-term policy framework before submitting a formal request. The economy is growing at a solid pace, and international reserves have been restored to pre-crisis levels. The FDIC Quarterly Banking Profile 1995

Armenia International Monetary Fund. Middle East and Central Asia Dept. 2019-12-30 This paper highlights Republic of Armenia's First Review Under the Stand-By-Arrangement. Armenia's economic performance is strong with healthy growth, low inflation, a stable financial system, with increasing foreign reserves and higher revenues. Despite fiscal overperformance, it is key to maintain the reform momentum to strengthen revenue mobilization, including by completing reforms to property taxation.

Implementation of the authorities' reform agenda including efforts to improve governance by establishing a holistic anti-corruption framework, will bolster sustainable and inclusive growth. The monetary policy framework's focus on price stability has served Armenia well. The authorities' implementation of Basel III measures will raise the resilience of the financial system, while their plans to develop the capital market and improve access to finance are also welcome.

Republic of Azerbaijan International Monetary Fund 2005-08-01 The staff report for the Fifth Review Under the Poverty Reduction and Growth Facility for the Republic of Azerbaijan focuses on the short-term macroeconomic outlook and monetary and exchange rate policies. Domestic demand has been increasing much faster than GDP partly on account of large oil sector-related and other investments. There was broad

agreement that greater exchange rate flexibility is essential for reducing inflation pressures.

Azerbaijan has had an excellent track record in servicing its external debt.

Mongolia International Monetary Fund

2009-08-17 This paper discusses key findings of the First Review Under the Stand-By Arrangement for Mongolia. The paper reveals that economic activity in Mongolia is slowing and inflation is falling, broadly in line with what was anticipated at the time the program was approved. The authorities' strong policy implementation is working to stabilize the economy. The biweekly foreign exchange auctions are also working well, and the authorities remain committed to allowing exchange rate flexibility in line with market conditions.

The Impact of Corporate Textual Disclosure on Capital Markets Saskia Jarick 2011-07 Seminar paper from the year 2011 in the subject Business economics - Accounting and Taxes, grade: 1.3, University of Mannheim, language: English, abstract: Each year, firms disclose information that is analyzed and eventually reflected in the market price. Sources of information are for example annual reports, earnings announcements and press releases. In the past, financial accounting research focused primarily on the numerical financial information disclosed (cf. Hales et al. 2011, 224).¹ Interestingly, research showed that asset price movements could only partly be explained by this quantitative information and thus must have additional influencing factors (cf. Demers/Vega 2010, 2). Since corporate disclosure generally consists only to a small fraction of qualitative data and dominantly of textual information (cf. Li 2011, 1)², and since language is the natural medium through which people communicate, financial accounting research started to focus on the analysis of textual disclosure (cf. Hales et al. 2011, 224). Results of these studies show that different aspects of textual disclosure, like the tone (how information is written/expressed) or the readability can influence for example market prices or analyst behavior (e.g. Li 2010 or Tetlock/Saar-Tsechansky/Macskassy 2008). This

paper focuses on research in the field of tone as important characteristic of corporate textual disclosure. Its aim is to provide an overview about the most recent approaches and about challenges that researchers face. The remainder of this paper proceeds as follows. In section 2 the importance of textual analysis and the information content of textual information are discussed. Furthermore this section provides an overview about different approaches to characterize textual disclosure and a tabular classification of the recent literature. Since this paper focuses on the tone of textual disclosure, different approaches to measure tone are discussed as well. In section 3 two recent studies are discussed.

Republic of Korea International Monetary Fund. Asia and Pacific Dept 2019-05-13 This 2019 Article IV Consultation discusses Korea's economy that has strong fundamentals; however, it is facing cyclical and structural headwinds. Potential growth will continue its decline, and polarization and inequality are concerns. Labor and product market duality persist. The government is focusing on supporting income, creating jobs, and promoting innovation. The government has focused on supporting income, creating jobs, and promoting innovation. It has strengthened social safety nets, substantially raised the minimum wage, supported small-and-medium enterprises to boost employment, and expanded public sector jobs. Fiscal policy should remain expansionary in the medium term, focusing on increasing social protection, boosting female labor force participation, and supporting growth enhancing structural reforms. Public sector job creation should be linked to developing services that cannot be provided by the private sector. The minimum wage increase for next year should be set below labor productivity growth. The IMF staff recommend an integrated package of macroeconomic, financial and structural policies to support growth, raise potential output, and reduce excess internal and external imbalances, while preserving financial stability.

Israel International Monetary Fund. European Dept. 2018-05-01 Israel's economy is growing well with inflation remaining low and the housing market cooling. Growth of about 3 1/2 percent in 2017 helped bring unemployment below four percent in early 2018, supporting robust wage rises averaging 3 1/4 percent. Yet, partly owing to the appreciation of the shekel, inflation remained below the 1-3 percent target range. House price increases slowed to below two percent as proposed tax measures deterred investor interest. Prospects for the next few years are for growth to remain around 3 1/2 percent with inflation rising gradually.
