Discovering Orff Jane Frazee 1987 (Schott). This book is intended for those who want detailed, practical assistance in how and why to use Orff techniques and materials in the classroom. Goals are outlined and the best ways to achieve them are explored, but the principal focus is on the arrangement of the curriculum in a logical sequence. Such a structure provides a reasonable progression from simple to more complex objectives not only from day to day but from year to year. Structured learning need not be the enemy of improvisation but rather the best way to provide students with the tools they need to improvise. The book contains an introduction to the development of Orff-Schulwerk and a discussion of the distinguishing features of this approach. Chapter Two introduces the activities children use in their music-making. The teaching procedure that structures those activities is taken up in Chapter Three while Chapter Four explains the vocabulary and accompaniment theory essential to the Orff teacher. Part Two applies these elements in a sequential curriculum designed for Grades One through Five. Especially important in each chapter is the inclusion of supporting activities designed to aid in teaching the various skills and concepts.

Arts education in public elementary and secondary schools Basmal Parsad Student access to arts education and the quality of such instruction in the nation's public schools continue to be of concern to policymakers, educators, and families. Specifically, research has focused on questions such as: To what extent do students receive instruction in the arts? Under what conditions is this instruction provided? What is the profile of arts education instructors? (Ruppert and Nelson 2006). This study is the third of its kind to be conducted by the National Center for Education Statistics (nces) in the Institute of Education Sciences (ies), U.S. Department of Education, to provide national data that inform these issues. The first study was conducted in the 1994-95 school year to provide baseline data on public schools' approaches to arts education. The second study was conducted during the 1999-2000 school year to provide broader coverage of arts education issues by collecting the first national data on educational backgrounds, professional development activities, teaching loads, and instructional practices of elementary school teachers--self-contained classroom teachers, music specialists, and visual arts specialists. To update the information from a decade ago, Congress requested that the U.S. Department of Education's Office of Innovation and Improvement (oii) and nces conduct a new study that would borrow from

and build on the previous studies. This study examines many of the issues from the previous studies, including the extent to which students received instruction in the arts; the facilities and resources available for arts education instruction; and the preparation, work environments, and instructional practices of music and visual arts specialists and non-arts classroom teachers. This study also addresses emerging issues such as the availability of curriculum-based arts education activities outside of regular school hours and the presence of school-community partnerships in the arts. In addition, the current study provides broader coverage of arts education instructors by including two new surveys for secondary music and visual arts specialists. Selected indicators on arts education in public elementary and secondary schools are organized into four sections, one for each arts education subject area--music, visual arts, dance, and drama/theatre. Using its Fast Response Survey System (frss), nces conducted the surveys during the 2009-10 school year, with the two school surveys and the collection of sampling lists for the teacher surveys starting in fall 2009. frss is a survey system designed to collect small amounts of issue-oriented data from a nationally representative sample of districts, schools, or teachers with minimal burden on respondents and within a relatively short period of time. The findings in this report have been chosen to demonstrate the range of information available from the frss study rather than to discuss all of the observed differences; they are not meant to emphasize any particular issue. The findings are based on self-reported data from public school principals and teachers. Where relevant, national findings are broken out by the poverty concentration at the school, measured as the percent of students eligible for free or reduced-price lunch. Appended are: (1) Technical Notes; and (2) Standard Errors for Text Tables and Figures. (Contains 63 tables, 27 figures and 16 footnotes.) [For "Supplemental Tables to the nces Report. Arts Education in Public Elementary and Secondary Schools: 1999-2000 and 2009-10 (nces 2012-014)," see ed530716.]

Music and the Child Natalie Sarrazin 2016-06-14 Children are inherently musical. They respond to music and learn through music. Music expresses children's identity and heritage, teaches them to belong to a culture, and develops their cognitive well-being and inner self worth. As professional instructors, childcare workers, or students looking forward to a career working with children, we should continuously search for ways to tap into children's natural reservoir of enthusiasm for singing, moving and experimenting with instruments. But how, you might ask? What music is appropriate for the children I'm working with? How can music help inspire a well-rounded child? How do I reach and teach children musically? Most importantly perhaps, how can I incorporate music into a curriculum that marginalizes the arts? This book explores a holistic, artistic, and integrated approach to understanding the developmental connections between music and children. This book guides professionals to work through music, harnessing the processes that underlie music learning, and outlining developmentally appropriate methods to understand the role of music in children's lives through play, games, creativity, and movement. Additionally, the book explores ways of applying music-making to benefit the whole child, i.e., socially, emotionally, physically, cognitively, and linguistically.

Strum It Up! Sandy Lantz 2016-10-24 Ukuleles are a beautiful addition to elementary music classrooms. By playing ukuleles, students learn about chord progressions, develop vocabulary, and accompany vocal and instrumental melodies. The ukulele's timbre supports the child's voice, often allowing students to hear and sing harmony more accurately with ukulele accompaniment. Such experiences promote independent musicianship; many students purchase their own ukulele and enjoy playing at home, even beyond their elementary years. As with recorder instruction, we believe ukuleles should be integrated with other classroom instruments, and in this book, you find orchestrations with barred instruments, unpitched percussion, and recorder. Some lessons include creative movement and improvisation. Keep in mind these lessons may span several class sessions. As music teachers, we strive to be lifelong learners. We encourage you to branch out, pick up a uke, and STRUM IT UP!
