*Memoir of a Retired Teacher* Edes C. Solina 2011-09-07 In Memoir of a Retired Teacher, author Edes Solina shares her concern that there is a real problem in education today: American children are performing at levels significantly below the skill levels of many countries in mathematics and science exams. College instructors are asking why such a large number of high school graduates are not prepared for college work in these and other subject areas. The United States has the best quality of college or higher education in the whole world, but the quality of education in high school is below acceptable levels for college entrance. She believes the root cause of the substandard performance of American students is the serious disruption caused by discipline problems taking place in the classroom today. Teachers need help in finding positive methods for turning the tide before it's too late. She believes that the schools need to allow the teachers to focus every minute of the class period on teaching and learning activities without the constant disruption from the rampant discipline problems plaguing their classrooms. Memoir of a Retired Teacher is Solina's life story in three parts: in the first part, she looks back on the final days of her teaching career; in the second part she remembers her teaching experiences; and in the final part she recounts her life's journey.

**BAHKRUUNE** Yuriy Ivanov 2022-04-20 **BAHKRUUNE** means to revert with a duel purpose. The rune is old Norse meaning, return ill will to the originator. I hope you will understand

by the time you finished reading my autobiography of my life and will understand why I chose to use the rune and the name of my own design for the intent of insight and understanding of the choices that are given to us and how and why to that which affects us and others around us. Only an Earl of Norway from a Noble inheritance or birthright can enact BloodEagle on it's Subjects given the severity of the wrongful actions against its victims. Should the punished scream before the ritual of BloodEagle is finished, Odin will deny the right of passage to the halls of Valhalla. Had my heart been poisonous in the form of Vengeance and Hatred and if it were up to me and if I was a Earl of Norway, I would enact such measures of BloodEagle on my adopted parents given the severity of their actions towards me to where the punishment is equal to how I have felt for the last 26 years of my life. The Super Nova that is inside my heart that has been boiling is currently being held at bay of my own fire will knowing the choices that can be given from the premeditated offensive actions that can cause and effect that is around me most inflicting what I care about the most, for which I cannot allow. **Rethinking Grading** Cathy Vatterott 2015-07-13 Grading systems often reward on-time task completion and penalize disorganization and bad behavior. Despite our best intentions, grades seem to reflect student compliance more than student learning and engagement. In the process, we inadvertently subvert the learning process. After careful research and years of experiences with grading as a teacher and a parent, Cathy Vatterott examines and debunks traditional practices and policies of grading in K-12 schools. She offers a new paradigm for standards-based grading that focuses on student mastery of content and gives concrete examples from elementary, middle, and high schools. Rethinking Grading will show all educators how standards-based grading can authentically reflect student progress and learning--and significantly improve both teaching and learning. Cathy Vatterott is an education professor and researcher at the University of Missouri-St. Louis, a former middle school teacher and principal, and a parent of a college graduate. She has learned from her workshops that "grading continues to be the most contentious part . . . conjuring up the most intense emotions and heated disagreements." Vatterott is also the author of the book Rethinking Homework: Best Practices That Support Diverse Needs.

**Teacher's Choice Math** Regents Review Henry Gu 2010 "Less is more." When students have only six to eight weeks to review for the Regents exam and they have to remember so many topics, what can the teacher offer to help? They won't be able to review the 800 page textbooks or even the 400 page review books. Our students need an efficient review kit that is concise, yet contains all the important mathematical concepts and their applications. This book will help students remember all the key topics and build their problem solving skills through the use of examples. This review book is geared towards helping students succeed with high scores on the Regents exams. I have already used these review sheets with my own Regents classes and I have seen firsthand that their performance is significantly higher than the statewide average. Both teachers and students like these review sheets because they are practical.This book contains three courses in one: Integrated Algebra 1, Geometry, and Algebra 2/Trigonometry. It also serves as a handy reference guide for math teachers and college students.
