The Psychosocial Implications of Disney

Movies Lauren Dundes
2019-07-11 In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand,

other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

World Investment Report 2019
United Nations Conference on Trade and Development
2019-08-09 The 2019 edition of the World Investment Report focuses on special economic zones (SEZs) which are widely used across most developing and many developed economies. Although the performance of many zones remains below expectations, the rate of establishment of new zones is accelerating as governments increasingly compete for internationally mobile industrial activity. Policymakers face not only the traditional challenges to making SEZs succeed, including the need for strategic focus, sound governance models, and effective investment promotion tools, but also new challenges brought about by the sustainable development imperative, the new industrial revolution, and changing patterns of international production. The Report explores

the place of SEZs in today's global investment landscape and provides guidance for policymakers on how to make SEZs work for sustainable development. It presents international investment trends and prospects at global, regional and national levels, as well as the evolution of international production and global value chains. It analyses the latest developments in new policy measures for investment promotion, facilitation and regulation around the world, as well as updates on investment treaties, their reform and investment dispute settlement cases.

experience in real-world patent litigation, reinforced with an abundance of relevant case law, in order to introduce the Chinese patent regime in a systematic and practical manner. In their thorough analysis of the scope of protection of patent rights and invalidation procedures, supported throughout by detailed examination of patent infringement lawsuits, the authors clarify such essential elements of Chinese patent law practice as the following: assertion of a claim; choosing the basis of the right to sue; publicity of claims; principle of internal interpretation priority; correction of ambiguity in a claim; interpretation of claims defined by preparation methods; defining the effect of a sequence of steps of a process claim; meaning of “persons of ordinary skill in the art”; concept of “means plus function”; application of the All Elements Rule; determination of functional features; and doctrine of equivalents. Each doctrine and the underlying principle is thoroughly

examined with reference to relevant court decisions. With this eminently practical and authoritative guide, corporate counsel and patent lawyers will proceed confidently through the Chinese patent application system, assess risks and opportunities, understand how precedents might affect their case, protect their rights in China once they have a patent, and handle infringement proceedings with full awareness of applicable principles and procedures.

of ergonomics research and methods applied to the design, development and evaluation, of products, systems and services. It gathers theoretical contributions, case studies and reports on technical interventions focusing on a better understanding of human machine interaction, and user experience for improving product design. The book covers a wide range of established and emerging topics in user-centered design, relating to design for special populations, design education, workplace assessment and design, anthropometry, ergonomics of buildings and urban design, sustainable design, as well as visual ergonomics and interdisciplinary research and practices, among others. Based on the AHFE 2021 International Conference on Ergonomics in Design, held virtually on 25–29 July, 2021, from USA, the book offers a thought-provoking guide for both researchers and practitioners in human-centered design and related fields.

Foresighted Leading Yunxian Chen 2013-07-11 Under the conditions of market economy, the government is an independent economic entity, whose function is not only to provide services and handle public affairs, but also to coordinate, advance and lead economic development. The dual functions of regional government include providing service and administration at the micro-level on behalf of market economy on one hand and leading, regulating and promoting economic development at the macro-level on behalf of the central government on the other hand. Foresighted leading means giving free rein to the government, especially regional government, in economic guidance, regulation and early warning. It also means that the government is responsible for effectively allocating funds and gaining advantages using market rules, leveraging market forces and other means such as investment, price, taxation, law, and organizational, institutional and

technological innovations to promote the scientific and sustainable development of the regional economy.

China After Covid-19 Alessia Amighini 2021-07-20 The coronavirus pandemic that has rocked China since December 2019 has posed a gruelling test for the resilience of the country's national economy. Now, as China emerges from its Covid-induced "recession", it feels like the worst is behind it. How did China manage to come out almost unscathed from the worst crisis in over a century? This Report examines how China designed and implemented its post-Covid recovery strategy, focussing on both the internal and external challenges the country had to face over the short- and medium-run. The book offers a comprehensive argument suggesting that, despite China having lost economic and political capital during the crisis, Beijing seems to have been strengthened by the "pandemic test", thus becoming an even more challenging "partner,

competitor and rival" for Western countries.

Chinese Capital Market Takeover and Restructuring Guide Chengwei Liu 2010-12-22

Although several useful entry guides to China for business investors have appeared in recent years, this is the first book to focus on a business strategy that is becoming increasingly important - and attractive - to businesses in China: the takeover and restructuring of a listed company. This practice orientated book has an additional value, moreover, in that it fully takes into account not only the relevant regulations, most of which were promulgated or updated from 2005 to 2010, but also the actual structures and procedures of nearly ninety announced deals, right up to September 2010. In unprecedented details, the author, an experienced M&A lawyer, describes China specific takeover and restructuring cases involving foreign investors as well as state-owned shareholders on the

Shanghai Stock Exchange, the Shenzhen Stock Exchange and 'ChiNext'. The presentation and analysis covers such elements as the following: the standard bids, such as tender offers, negotiated transfers, indirect takeovers and subscriptions for new shares; the special accesses available to a foreign investor such as qualifying as a 'strategic investor' or 'qualified foreign institutional investor' (QFII); the particular situations where 'state-owned shareholder' (SS) is involved or where a share exchange occurs, including where a foreign investor subscribes by injecting, or acquires indirectly via, its 'onshore foreign invested enterprise'; the basic restructuring approaches of a listed company - public offering and private placement; and the full meaning and significance of the 'substantial asset restructuring' (SAR), which may be asset purchases, disposals or swaps, or the SAR in special cases - merger or separation deals. The author's illustration of deal structures and step-by-step procedures, visualized in

over 150 charts and checklists, gives the reader a clear path to follow through what can seem like a forbiddingly difficult process - a path rendered more secure by the deal histories presented. For companies with operations in China, or considering such operations, as well as professionals advising on these companies, this book is a goldmine of crucially valuable information and guidance. There is nothing else available that comes close to its authority or expertise in this area.

emphasis on visual communication? Are we becoming more individual or more social? Why is public social media so conservative? Why does equality online fail to shift inequality offline? How did memes become the moral police of the internet? Supported by an introduction to the project's academic framework and theoretical terms that help to account for the findings, the book argues that the only way to appreciate and understand something as intimate and ubiquitous as social media is to be immersed in the lives of the people who post. Only then can we discover how people all around the world have already transformed social media in such unexpected ways and assess the consequences

Transition and Opportunity

Huiyao Wang 2022 This book is open access under a CC BY-NC-ND 4.0 license. Multinational corporations (MNCs) have long played a crucial role in the Chinese economy. This role is one that is set to continue in the post-pandemic era as China works to transit to a high-

quality growth model that is more sustainable and innovation-driven. With global experience and front-line involvement in some of the most pressing economic, technological, and environmental issues of our day, leading figures in MNCs and chambers of commerce are well placed to share insights that could potentially contribute to policymaking and development strategies so that everyone can "make the most" of China's future. This collection of essay aims to share these invaluable insights with a wider audience, offering balanced and diverse perspectives from companies and advocacy groups working on a range of issues related to China's domestic development, international economic cooperation, and China-US competition. These insights are useful not only for the wider business community, but also for academics, policymakers, students, and anyone trying to deepen their understanding of this exciting period of "transition and opportunity,"

Guide to Big Data Applications
S. Srinivasan 2017-05-25 This handbook brings together a variety of approaches to the uses of big data in multiple fields, primarily science, medicine, and business. This single resource features contributions from researchers around the world from a variety of fields, where they share their findings and experience. This book is intended to help spur further innovation in big data. The research is presented in a way that allows readers, regardless of their field of study, to learn from how applications have proven successful and how similar applications could be used in their own field. Contributions stem from researchers in fields such as physics, biology, energy, healthcare, and business. The contributors also discuss important topics such as fraud detection, privacy implications, legal perspectives, and ethical handling of big data.

From World Factory to

Global Investor Xuedong Ding
2017-11-22 Chinese outward direct investment (ODI) is growing rapidly in recent years. As an important phenomenon in the global economy, China's ODI deserves more thorough analysis. This book looks at China's ODI activities from multi-perspectives. With the rebalancing of China's own structural growth and China's shift towards a net capital exporter, her initiatives such as "One Belt One Road (OBOR)" have brought profound implications to the traditional super-sovereign or multilateral financial and investment cooperation mechanism. As her investment destinations and investment methods become more diversified and sophisticated, this book offers unique and refreshing insight into China's ODI activities. The book covers the whole range of history and policy development of China's ODI and analyses China's ODI trends and characteristics in the recent years. It reviews China's major policy changes after the Third Plenary Session of the 18th

Central Committee of the Communist Party and how they may impact China's ODI strategy and activities. The book addresses potential challenges and risks of rising ODI activities from practitioners' perspective, and discusses how recipient countries may react and respond to the surge of Chinese capital. The book also offers policy implications and future research agenda in relation to the Chinese investments.

“economic miracles” which have brought Germany, Japan, and the South East Asian Tigers into the top-league of the industrialized world. The rapid expansion of the Chinese economy has gone along with a fledgling re-integration of China into the global economic system. In the course of the last 30 years China has become a major player in the global economy and today is on a trajectory towards even greater prominence. In recent years, the Chinese economy seems to have reached an important threshold line of economic development and global integration. In the first quarter century of reform and global opening, Chinese enterprises have been largely confined to a ‘passive’ role in the global division of labor. Foreign enterprises as the proprietors of greatly superior business models, production technologies, management models as well as very competitively established brands have been integrating Chinese players in their value chains and global operations.

Lacking the necessary production technologies, products as well as marketing knowledge to successfully address OECD-consumers, Chinese enterprises have been hardly able to enter the global markets without such guidance. Now, this constellation is changing.

New Economic Engine: Effective Government and Efficient Market Yunxian Chen

2020-04-01 This book contains at least three main highlights: breaking through the limitations of the mainstream Western economics system and the market theory framework, correctly explaining the successful experience of China's reform and opening up over the past 40 years from an

economic perspective, and developing a new economics system and market theory. China's reform and opening up and innovative developments have provided a wide range of materials and resources for this theory; the results of this research will be integrated into world economic theories and serve the economic development and economic growth across the world.

The Future of Global Retail

Winter Nie 2021-09-26 China's new retail revolution will completely transform how the world thinks about retail and digital innovation. But is the world ready yet? In this book, the authors share an insider's perspective on what is happening in China to reveal the future for global retail, and a clear framework to help you prepare. The book presents a number of real-world cases, based on interviews and first-hand consumer experience, to decode China's retail revolution so that you can understand what is happening and why, and what it means for the rest of the world. Crucially, the book

identifies five critical stages in the development of new retail that global retail executives need to grasp now: lifestyle commerce, Online-Merge-Offline retail, social retail, livestream retail and invisible retail. To help the industry get ready for this new, China-inspired paradigm in retail, the authors present a practical and simple framework – a ten-year strategic roadmap for global retail executives, which we call the “Beyond” the Value Chain Model. China's new retail is not just about fashion, cosmetics, snacks, data-driven convenient stores and commercial live streaming. At a time when the world of retail is being upended, it offers inspirational lessons in innovation, purpose and agility for global executives across the entire retail spectrum.

China Branding Martin J. Liu 2019-09-14 This book provides an overview of the brand construction process of manufacturing enterprises in Zhejiang province, China. There are now a number of industry-leading enterprises that are trying to build their own brands and manufacture products of higher quality in Zhejiang. The first chapter focuses on the place branding strategy employed by the Zhejiang Provincial Government in launching the “ZhejiangMade” brand to improve the perception of products made by Zhejiang manufacturing firms and promote them in the domestic and international markets. In the following nine chapters, the editors bring together case studies from nine leading enterprises in Zhejiang, including Baoxiniao,

Shuanghuan, Feida, ROBAM, Xinhai, Yinlun, Weixing, Deli and Fotile, providing an analysis of their branding process.
