**The Story of English in 100 Words** David Crystal 2012-03-27 The world’s foremost expert on the English language takes us on an entertaining and eye-opening tour of the history of our vernacular through the ages. In The Story of English in 100 Words, an entertaining history of the world’s most ubiquitous language, David Crystal draws on one hundred words that best illustrate the huge variety of sources, influences and events that have helped to shape our vernacular since the first definitively English word—“roe”—was written down on the femur of a roe deer in the fifth century. Featuring ancient words (‘loaf’), cutting edge terms that reflect our world (‘tweetersphere’), indispensable words that shape our tongue (‘and’, ‘what’), fanciful words (‘fopdoodle’) and even obscene expressions (the “c word”…), David Crystal takes readers on a tour of the winding byways of our language via the rude, the obscure and the downright surprising.

**Quantum Theory Cannot Hurt You** Marcus Chown 2008-09 The two towering achievements of modern physics are quantum theory and Einstein’s general theory of relativity. Together, they explain virtually everything about the world we live in. But, almost a century after their advent, most people haven’t the slightest clue what either is about. Did you know that there’s so much empty space inside matter that the entire human race could be squeezed into the volume of a sugar cube? Or that you grow old more quickly on the top floor of a building than on the ground floor? And did you realize that 1% of the static on a TV tuned between stations is the relic of the Big Bang? Marcus Chown, the bestselling author of What A Wonderful World and the Solar System app, explains all with characteristic wit, colour and clarity, from the Big Bang and Einstein’s general theory of relativity to probability, gravity and quantum theory. ‘Chown discusses special and general relativity, probability waves, quantum entanglement, gravity and the Big Bang, with humour and beautiful clarity, always searching for the most vivid imagery.’ Steven Poole, Guardian

**Selfie** Will Storr 2019-04-02 “An intriguing odyssey” though the history of the self and the rise of narcissism (The New York Times). Self-absorption, perfectionism, personal branding—it wasn’t always like this, but it’s always been a part of us. Why is the urge to look at ourselves so powerful? Is there any way to break its spell—especially since it doesn’t necessarily make us better or happier people? Full of unexpected connections among history, psychology, economics, neuroscience, and more, Selfie is a “terrific” book that makes sense of who we have become (NPR’s On Point). Award-winning journalist Will Storr takes us from ancient Greece, through the Christian Middle Ages, to the self-esteem evangelists of 1980s California, the rise of the “selfie generation,” and the era of hyper-individualism in which we live now, telling the epic tale of the person we all know so intimately—because it’s us. “It’s easy to look at Instagram and selfie-sticks and shake our heads at millennial narcissism. But Will Storr takes a longer view. He ignores the easy targets and instead tells the amazing 2,500-year story of how we’ve come to think about our selves. A top-notch journalist, historian, essayist, and sleuth, Storr has written an essential book for understanding, and coping with, the 21st century.” —Nathan Hill, New York Times-bestselling author of The Nix “This fascinating psychological and social history . . . reveals how biology and culture conspire to keep us striving for perfection, and the devastating toll that can take.”—The Washington Post “Abyl synthesizes centuries of attitudes and beliefs about selfhood, from Aristotle, John Calvin, and Freud to Sartre, Ayn Rand, and Steve Jobs.” —USA Today “Eminently suitable for readers of both Yuval Noah Harari and Daniel Kahneman, Selfie also has shades of Jon Ronson in its subversive humor and investigative spirit.” —Bookseller “Storr is an electrifying analyst of Internet culture.” —Financial Times “Continually delivers rich insights . . . captivating.” —Kirkus Reviews

**Monoclonal Antibody Production** National Research Council 1999-06-06 The American Anti-Vivisection Society (AAVS) petitioned the National Institutes of Health (NIH) on April 23, 1997, to prohibit the use of animals in the production of mAb. On September 18, 1997, NIH declined to prohibit the use of mice in mAb production, stating that “the ascites method of mAb production is scientifically appropriate for some research projects and cannot be replaced.” On March 26, 1998, AAVS submitted a second petition, stating that “NIH failed to provide valid scientific reasons for not supporting a proposed ban.” The office of the NIH director asked the National Research Council to conduct a study of methods of producing mAb. In response to that request, the Research Council appointed the Committee on Methods of Producing Monoclonal Antibodies, to act on behalf of the Institute for Laboratory Animal Research of the Commission on Life Sciences, to conduct the study. The 11 expert members of the committee had extensive experience in biomedical research, laboratory animal medicine, animal welfare, pain research, and patient advocacy (Appendix B). The committee was asked to determine whether there was a scientific necessity for the mouse ascites method; if so, whether the method caused pain or distress; and, if so, what could be done to minimize the pain or distress. The committee was also asked to comment on available *in vitro* methods; to suggest what acceptable scientific rationale, if any, there was for using the mouse ascites method; and to identify regulatory requirements for the continued use of the mouse ascites method. The committee held an open data-gathering meeting during which its members summarized data bearing on those questions. A 1-day workshop (Appendix A) was attended by 34 participants, 14 of whom made formal presentations. A second meeting was held to finalize the report. The present report was written on the basis of information in the literature and information presented at the meeting and the workshop.

**DNA** Dennis Kelly 2021-05-20 Dennis Kelly’s play DNA centres on friendship, morality and responsibility in odd circumstances. When a group of young friends are faced with a terrible accident, they deliberately make the wrong choices to cover it up and find themselves in an unusually binding friendship where no one will own up to what they’ve done. The play began life as a National Theatre Connections commission in 2008 and has subsequently been produced, studied and toured around the world. DNA is published for the first time in the Methuen Drama Student Edition series with commentary and notes by Clare Finburgh Delijani, which look at the play’s context, themes, dramatic form, staging possibilities and production history, plus offers suggestions for further reading.

**Reaching Down the Rabbit Hole** Dr. Allan H. Ropper 2014-09-30 "Tell the doctor where it hurts." It sounds simple enough, unless the problem affects the very organ that produces awareness and generates speech. What is it like to try to heal the body when the mind is under attack? In this book, Dr. Allan Ropper and Brian Burrell take the reader behind the scenes at Harvard Medical School's neurology unit to show how a seasoned diagnostician faces down bizarre, life-altering afflictions. Like Alice in Wonderland, Dr. Ropper inhabits a world where absurdities abound: • A figure skater whose body has become a ticking time-bomb • A salesman who drives around and around a traffic rotary, unable to get off • A college quarterback who can't stop calling the same play • A child molester who, after falling on the ice, is left with a brain that is very much dead inside a body that is very much alive • A mother of two young girls, diagnosed with ALS, who has to decide whether a life locked inside her own head is worth living How does one begin to treat such cases, to counsel people whose lives may be changed forever? How does one train the next generation of clinicians to deal with the moral and medical aspects of brain disease? Dr. Ropper and his colleague answer these questions by taking the reader into a rarified world where lives and minds hang in the balance.

**Ready to Teach: Macbeth** Stuart Pryke 2020-10-23 What is the best approach for helping students to understand higher level concepts? How can specific subject knowledge be implemented in lessons?Ready to Teach: Macbeth brings together the deep subject knowledge, resources and classroom strategies needed to teach Shakespeare’s tragic play, as well as the pedagogical theory behind why these ideas work, helping teachers to deliver a knowledge-rich curriculum with impact. Each chapter contains lesson-by-lesson essays and commentaries that enhance subject knowledge on key areas of the text alongside fully resourced lessons reflecting current and dynamic best practice. The book also offers an introduction to the key pedagogical concepts which underpin the lessons and why they are proven to help students develop powerful knowledge and key skills. Whether you are new to teaching or looking for different ways into the text, Ready to Teach: Macbeth is the perfect companion to the study of ‘the Scottish play’.

**Reading Poetry** Tom Furniss 2007 'Reading Poetry' provides a structured introduction to ideas and techniques which will enable students to produce informed and exciting readings of poetry.

**Pejoration** Rita Finkbeiner 2016-03-31 Though “pejoration” is an important notion for linguistic analysis and theory, there is still a lack of theoretical understanding and sound descriptive analysis. In this timely collection, the phenomenon of pejoration is studied from a number of angles. It contains studies from phonology, morphology, syntax, semantics and pragmatics, and deals with diverse languages and their variants. The collection will appeal to all those linguists with a genuine interest in locating pejoration at the grammar-pragmatics interface.

**The Strange Case Of Dr. Jekyll And Mr. Hyde** Robert Louis Stevenson 2022-10-19 "The Strange Case of Dr. Jekyll and Mr. Hyde" Stevenson’s famous exploration of humanity’s basest capacity for evil, has become synonymous with the idea of a split personality. More than a moral tale, this dark psychological fantasy is also a product of its time, drawing on contemporary theories of class, evolution, criminality, and secret lives. Also in this volume are "The Body Snatcher," which charts the murky underside of Victorian medical practice, and "Olalla," a tale of vampirism and "The Beast Within" which features a beautiful woman at its center.

**Notes from a Small Island** Bill Bryson 2015-06-02 Before New York Times bestselling author Bill Bryson wrote The Road to Little Dribbling, he took this delightfully irreverent jaunt around the unparalleled floating nation of Great Britain, which has produced zebra crossings, Shakespeare, Twiggie Winkie’s Farm, and places with names like Farleigh Wallop and Tisbury.

**Middle Leadership Mastery** Adam Robbins 2021-05-21 Never has there been a more crucial time to improve middle leadership. For many years school inspections have focused on data-driven outcomes and the role of senior leaders in driving school improvement; recently, however, the focus has shifted to curriculum and middle leadership. This has left middle leaders under increased pressure to be able to justify their actions and decisions. Instead of relying on generic leadership theories, Middle Leadership Mastery collates perspectives from psychology, sociology, cognitive science and Silicon Valley CEOs to share evidence-informed guidance on a wide range of topics - from designing a curriculum and quality assuring teaching to supporting staff and students in crisis and managing well-being. Adam Robbins draws on his 16 years’ experience of teaching in a deprived area to illustrate his points with stories and anecdotes from the front line, demonstrating how middle leaders can better understand their context and deliver the best outcomes from a variety of starting points.
