*Hodd* Adam Thorpe 2010-12-07 Who was Robin Hood? Romantic legend casts him as outlaw, archer, and hero of the people, living in Sherwood Forest with Friar Tuck, Little John and Maid Marian, stealing from the rich to give to the poor - but there is no historical proof to back this up. The early ballads portray a quite different figure: impulsive, violent, vengeful, with no concern for the needy, no merry band, and no Maid Marian. Hodd provides a possible answer to this famous question, in the form of a medieval document rescued from a ruined church on the Somme, and translated from the original Latin. The testimony of an anonymous monk, it describes his time as a boy in the greenwood with a half-crazed bandit called Robert Hodd - who, following the thirteenth-century principles of the 'heresy of the Free Spirit', believes himself above God and beyond sin. Hodd and his crimes would have been forgotten without the boy's minstrel skills, and it is the old monk's cruel fate to know that not only has he given himself up to apostasy and shame, but that his ballads were responsible for turning a murderous felon into the most popular outlaw hero and folk legend of England, Robin Hood. Written with his characteristic depth and subtlety, his sure understanding of folklore, his precise command of detail, Adam Thorpe's ninth novel is both a thrilling re-examination of myth and a moving reminder of how human innocence and frailty fix and harden into history.

**Closing the Vocabulary Gap** Alex Quigley 2018-04-06 As teachers grapple with the challenge of a new, bigger and more challenging school curriculum, at every key stage and phase, success can feel beyond our reach. But what if there were 50,000 small solutions to help us bridge that gap? In *Closing the Vocabulary Gap*, Alex Quigley explores the increased demands of an academic curriculum and how closing the vocabulary gap between our 'word poor' and 'word rich' students could prove the vital difference between school failure and success. This must-read book presents the case for teacher-led efforts to develop students' vocabulary and provides practical solutions for teachers across the curriculum, incorporating easy-to-use tools, resources and classroom activities. Grounded in the very best available evidence into reading development and vocabulary acquisition, *Closing the Vocabulary Gap* sets out to: help teachers understand the vital role of vocabulary in all learning; share what every teacher needs to know about reading (but was afraid to ask); unveil the intriguing history of words and exactly how they work; reveal the elusive secrets to achieve spelling success; provide strategies for vocabulary development for all teachers of every subject and phase. With engaging anecdotes from the author's extensive personal teaching experience woven throughout, as well as accessible summaries of relevant research, Alex Quigley has written an invaluable resource suitable for classroom teachers across all phases, literacy leaders and senior leadership teams who wish to close the vocabulary gap.

**Real Artists Don't Starve** Jeff Goins 2017-06-06 Jeff Goins dismantles the myth that being creative is a hindrance to success by revealing how an artistic temperament is a competitive advantage in the marketplace.? The myth of the starving artist has dominated our culture, seeping into the minds of creative people and stifling their pursuits. The truth is that the world's most successful artists did not starve. In fact, they capitalized on the power of their creative strength. In *Real Artists Don't Starve*, bestselling author and creativity expert Jeff Goins debunks the myth of the starving artist by unveiling the ideas that created it and replacing them with 14 rules for artists to thrive, including: Steal from your influences (don't wait for inspiration) Collaborate with others (working alone is a surefire way to starve) Take strategic risks (instead of reckless ones) Make money in order to make more art (it's not selling out) Apprentice under a master (a "lone genius" can never reach full potential) From graphic designers and writers to artists and business professionals, creatives already know that no one is born an artist. Goins' revolutionary rules celebrate the process of becoming an artist, a person who utilizes the imagination in fundamental ways. He reminds creatives that business and art are not mutually exclusive pursuits. *Real Artists Don't Starve* explores the tension every creative person and organization faces in an effort to blend the inspired life with a practical path to success. Being creative isn't a disadvantage for success, it is a powerful tool to be harnessed.

**Queen Elizabeth II and the Royal Family** 2021-06 A magnificent tribute to the life and reign of Queen Elizabeth II, and a celebration of the British royal family. This book is a stunning visual guide to the world's most famous royals, from the Queen's Norman predecessors to her great-grandchildren. It features events such as the royal wedding of Prince William and Kate Middleton, and profiles on key people such as Princess Diana and Prince Harry. This new edition is revised to include the most recent events and milestones, such as the retirement of the Duke of Edinburgh, the birth of Charlotte, Louis, Archie, and other new family members, Harry and Meghan's wedding, and their decision to step back as senior members of the royal family. Including rare, restricted, and exclusive photos, this book examines the Queen's life in detail from her childhood to today, but also goes back through more than 1,000 years of history to tell the story of the House of Windsor and the entire succession of kings and queens of England and Scotland. With dazzling galleries of royal artefacts and photographic tours of sumptuous royal residences, this is the perfect book for fans of the Queen and royal family, fans of the Netflix series *The Crown*, or anyone interested in the history of the British monarchy.

**Periodic Tales** Hugh Aldersey-Williams 2012-05 The phenomenal Sunday Times bestseller *Periodic Tales* by Hugh Aldersey-Williams, packed with fascinating stories and unexpected information about the building blocks of our universe. Everything in the universe is made of them, including you. Like you, the elements have personalities, attitudes, talents, shortcomings, stories rich with meaning. Here you'll meet iron that rains from the heavens and noble gases that light the way to vice. You'll learn how lead can tell your future while zinc may one day line your coffin. You'll discover what connects the bones in your body with the Whitehouse in Washington, the glow of a streetlamp with the salt on your dinner table. Unlocking their astonishing secrets and colourful pasts, *Periodic Tales* is a voyage of wonder and discovery, showing that their stories are our stories, and their lives are inextricable from our own. 'Science writing at its best. A fascinating and beautiful literary anthology, bringing them to life as personalities. If only chemistry had been like this at school. A rich compilation of delicious tales'*Matt Ridley, Prospect* 'A love letter to the chemical elements. Aldersey-Williams is full of good stories and he knows how to tell them well'*Sunday Telegraph* 'Great fun to read and an endless fund of unlikely and improbable anecdotes'*Financial Times* 'The history, science, art, literature and everyday applications of all the elements from aluminium to zinc' *The Times* Hugh Aldersey-Williams studied natural sciences at Cambridge. He is the author of several books exploring science, design and architecture and has curated exhibitions at the Victoria and Albert Museum and the Wellcome Collection. He lives in Norfolk with his wife and son.

**Virtual Worlds** Jean-Claude Heudin 2003-05-20 1 Introduction Imagine a virtual world with digital creatures that looks like real life, sounds like real life, and even feels like real life. Imagine a virtual world not only with nice three dimensional graphics and animations, but also with realistic physical laws and forces. This virtual world could be familiar, reproducing some parts of our reality, or unfa miliar, with strange "physical" laws and artificial life forms. As a researcher interested in the sciences of complexity, the idea of a conference about virtual worlds emerged from frustration. In the last few years, there has been an increasing interest in the design of artificial environments using image synthesis and virtual reality. The emergence of industry standards such as VRML [1] is an illustration of this growing interest. At the same time, the field of Artificial Life has addressed and modeled complex phenomena such as self organization, reproduction, development, and evolution of artificial life like systems [2]. One of the most popular works in this field has been *Tierra* designed by Tom Ray: an environment producing synthetic organisms based on a computer metaphor of organic life in which CPU time is the "energy" resource and memory is the "material" resource [3]. Memory is organized into informational patterns that exploit CPU time for self replication. Mutation generates new forms, and evolution proceeds by natural selection as different creatures compete for CPU time and memory space.

**Killer Verse** Harold Schechter 2011-09-06 *Killer Verse: Poems of Murder and Mayhem* is a spine-tingling collection of terrifically creepy poems about the deadly art of murder. The villains and victims who populate these pages range from Cain and Abel and Bluebeard and his wives to Lizzie Borden, Jack the Ripper, and Mafia hit men. The literary forms they inhabit are just as varied, from the colorful melodramas of old Scottish ballads to the hard-boiled poetry of twentieth-century noir, from lighthearted comic riffs to profound poetic musings on murder. Robert Browning, Thomas Hardy, W. H. Auden, Stevie Smith, Mark Doty, Frank Bidart, Toi Derricotte, Lynn Emanuel, and Cornelius Eady are only a few of the many poets, old and new, whose work is captured in this heart-stopping—and criminally entertaining—collection.

**Volatiles in the Martian Crust** Justin Filiberto 2018-08-30 *Volatiles in the Martian Crust* is a vital reference for future missions - including ESA's EXO Mars and NASA's Mars2020 rover - looking for evidence of life on Mars and the potential for habitability and human exploration of the Martian crust. Mars science is a rapidly evolving topic with new data returned from the planet on a daily basis. The book presents chapters written by well-established experts who currently focus on the topic, providing the reader with a fresh, up-to-date and accurate view. Organized into two main sections, the first half of the book focuses on the Martian meteorites and specific volatile elements. The second half of the book explores processes and locations on the crust, including what we have learned about volatile mobility in the Martian crust. Coverage includes data from orbiter and in situ rovers and landers, geochemical and geophysical modeling, and combined data from the SNC meteorites. Presents information about the nature, relationship, and reactivity of chemical elements and compounds on Mars Explores the potential habitability of Mars Provides a comprehensive view of volatiles in the Martian crust from studies of actual samples as well as from the variety of landed missions, including the MER and Curiosity rovers Delivers a vital reference for ongoing and future missions to Mars while synthesizing large data sets and research on volatiles in the Martian atmosphere Concludes with an informative summary chapter that looks to future Mars missions and what might be learned

**The Search for Sasquatch (A Wild Thing Book)** Laura Krantz 2022-10-11 Inspired by her popular *Wild Thing* podcast, journalist Laura Krantz incorporates the scientific method and her journalistic skills to determine if Bigfoot is real When journalist Laura Krantz discovered that her long-lost cousin, Grover Krantz, a distinguished anthropologist and professor at Washington State University, had devoted much of his career to the search for Bigfoot, she couldn't quite believe it. A natural skeptic and a strong believer in facts, Krantz decided to conduct her own quest for the most famous and elusive mythical creature. The Search for Sasquatch takes readers through the big guy's fun, fascinating, and complex world, posing the question: Could Bigfoot be out there? Exploring the gray area between myth and science, Krantz takes readers on a strange, surreal, and surprising hunt for the fabled Sasquatch—showing us how to challenge our gut assumptions and open our minds to new possibilities, to think critically, and to use the scientific method along the way. The Search for Sasquatch asks readers to evaluate the evidence it presents and make up their own minds, all while considering why Bigfoot might be important—even if we don't find him.

**Natural Speller** Kathryn Stout 2004 Absolutely the only book you will ever need to teach spelling. Teaching strategies include additional tips for use with the learning disabled, and word lists are organized by both sight and sound patterns. Build vocabulary skills with Latin and Greek roots and word lists, and by using the spelling rules to add prefixes and suffixes to root words. Choose from among the suggested activities to include practice with grammar, dictionary, and composition skills. Phonic, spelling, and punctuation rules are listed for easy reference. Word lists are divided by grade, 1 through 8. However, this method is easily adapted for older students or adults who need remedial work. Because of its multi-sensory and simplified approach to spelling, and because each child can work at his own pace, this program is ideal for students with learning disabilities. Grades K-12.

**Teranesia** Greg Egan 2010-12-30 As a young boy, Prabir Suresh lives with his parents and sister on an otherwise uninhabited island in a remote part of the Indonesian peninsula. Prabir names it Teranesia, populating it with imaginary creatures even stranger than the evolutionarily puzzling butterflies that his parents are studying. Civil war strikes, orphaning Prabir and his sister. Eighteen years later, rumours of bizarre new species of plants and animals being discovered in the peninsula that was their childhood home draw Prabir's sister back to the island - Prabir cannot bear for her to have gone out alone and he follows, persuading a pharmaceutical researcher to take him along as a guide.

**A New Hasidism: Roots** Arthur Green 2019-10-01 Neo-Hasidism applies the Hasidic masters' spiritual insights—of God's presence everywhere, of seeking the magnificent within the everyday, in doing all things with love and joy, uplifting all of life to become a vehicle of God's service—to contemporary Judaism, as practiced by men and women who do not live within the strictly bounded world of the Hasidic community. This first-ever anthology of Neo-Hasidic philosophy brings together the writings of its progenitors: five great twentieth-century European and American Jewish thinkers—Hillel Zeitlin, Martin Buber, Abraham Joshua Heschel, Shlomo Carlebach, and Zalman Schachter-Shalomi—plus a young Arthur Green. The thinkers reflect on the inner life of the individual and their dreams of creating a Neo-Hasidic spiritual community. The editors' introductions and notes analyze each thinker's contributions to Neo-Hasidic thought and influence on the movement. Zeitlin and Buber initiated a renewal of Hasidism for the modern world; Heschel's work is quietly infused with Neo-Hasidic thought; Carlebach and Schachter-Shalomi re-created Neo-Hasidism for American Jews in the 1960s; and Green is the first American-born Jewish thinker fully identified with the movement. Previously unpublished materials by Carlebach and Schachter-Shalomi include an interview with Schachter-Shalomi about his decision to leave Chabad-Lubavitch and embark on his own Neo-Hasidic path.

**The Kill Room** Jeffery Deaver 2013-06-04 Lincoln Rhyme and his partner Amelia Sachs return in this gripping thriller to investigate the assassination of a U.S. citizen in the Bahamas. It was a "million-dollar bullet," a sniper shot delivered from over a mile away. Its victim was no ordinary mark: he was Robert Moreno, a man known to have strong anti-American sympathies, and seemingly assassinated by the US government. The nation's most renowned investigator and forensics expert, Lincoln Rhyme, is drafted to investigate. While his partner, Amelia Sachs, traces the victim's steps in Manhattan, Rhyme leaves the city to pursue the sniper himself. As details of the case start to emerge, the pair discovers that not all is what it seems. When a deadly, knife-wielding assassin begins systematically eliminating all evidence—including the witnesses—Lincoln's investigation turns into a chilling battle of wits against a cold-blooded killer.

**The Original Dream** Nukila Amal 2017 For Maya, history is like a dream, and her dreams are like a history of her life and how it relates to others. Effortlessly defying and calling into question time and space, Maya inhabits fantastical realities filled with shamans, romantic longing, a daughter's struggles, and a flying dragon. Lyrically flowing between Maya's multiple realities, The Original Dream is the story of a young independent Indonesian woman trying to break free from cultural and social conventions while also searching for her place among family and friends. With guidance from her parents, coworkers, and sister, along with a newborn filled with the wisdom of elders, Maya navigates her perceptions, looking for answers to unknown questions. Whether soaring through the nighttime sky, caring for her nephew, or tending to guests at the hotel where she works, she tries to delineate the difference between dreams and reality and if such a difference even matters.

**Disciple IV** Abingdon Press 2005-05 DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

**The Forgotten Third** Roy Blatchford 2020 'The Forgotten Third' is a provocative collection of essays which poses the fundamental question: 'Do a third of school students have to fail so that two-thirds can pass?' Roy Blatchford has brought together a group of leading thinkers and influencers in UK education to address this question - and pose some answers.

**Travels with Curiosity** Charles J. Byrne 2020-09-28 The Mars Curiosity Rover is the most sophisticated mobile laboratory ever deployed on a planet. For over seven years, scores of investigators have planned its daily route and activities, poring over the overwhelming images and data and revising our understanding of planetary surfaces, geology, and potential habitability. This book takes readers right down to the surface of Mars, chronicling Curiosity's physical and scientific journey across the planet's Earth-like, yet strikingly alien vistas. Through dozens of images and descriptive accounts of the surface, you will gain a deeper knowledge of the Martian landscape, from the floor of Gale Crater up to the cliffs of Mount Sharp. Presented at the end of each chapter are the results and revelations from the science team spearheading the mission. Like any cross-country road trip, the rover has hit some unexpected hitches along the way. The book describes the obstacles faced by the rover and its scientists over the years and the difficult decisions and careful experimentation it took to solve them.

**Special Relativity for Beginners** Jürgen Freund 2008 This book, first appearing in German in 2004 under the title Spezielle Relativitätstheorie für Studienanfänger, offers access to the special theory of relativity for readers with a background in mathematics and physics comparable to a high school honors degree. All mathematical and physical competence required beyond that level is gradually developed through the book, as more advanced topics are introduced. The full tensor formalism, however, is dispensed with as it would only be a burden for the problems to be dealt with. Eventually, a substantial and comprehensive treatise on special relativity emerges which, with its gray-shaded formulary, is an invaluable reference manual for students and scientists alike.Some crucial results are derived more than once with different approaches: the Lorentz transformation in one spatial direction three times, the Doppler formula four times, the Lorentz transformation in two directions twice; also twice the unification of electric and magnetic forces, the velocity addition formula, as well as the aberration formula. Beginners will be grateful to find several routes to the goal; moreover, for a theory like relativity, it is of fundamental importance to demonstrate that it is self-contained and without contradictions.Author's website: www.relativity.ch.
