Just a Girl Carrie Mesrobian
2017-03-28 Taking a hard look at the societal constraints on teenage girls, Morris Award nominee Carrie

Mesrobian tells one girl's story with bracing honesty and refreshing authenticity. By her senior year of high school, Rianne has exhausted all the fun there is to have in small-

town Wereford, Minnesota. Volleyball season is winding down, the parties feel tired, and now that she's in a serious relationship with reformed player Luke Pinsky, her wild streak has ended. Not that she ever did anything worse than most guys in her school...but she knows what everyone thinks of her. Including her parents. Divorced but now inexplicably living together again, Rianne wonders why they're so quick to point out every bad choice she's making when they can't even act like adults—or have the decency to tell Rianne whether or not they're getting back together. With an uncomfortable home life and her once-solid group of friends now dissolving, the reasons for sticking around after high school are few. So why is Rianne locking step when it comes to figuring out her future?

That's not the only question Rianne can't answer. Lately she's been wondering why, when she has a perfect-on-paper boyfriend, she wants anything but. Or how it is that Sergei, a broken-English-speaking Russian, understands her better than anyone who's known her all her life? And—perhaps the most troubling question—why has Rianne gotten stuck with an “easy girl” reputation for doing the same exact things as guys without any judgment? Carrie Mesrobian, acclaimed author of *Sex & Violence* and *Cut Both Ways*, sets fire to the unfair stereotypes and contradictions that persist even in the twenty-first century.

The Law of Judicial Precedent Bryan A. Garner 2016 *The Law of Judicial Precedent* is the first hornbook-style treatise on the doctrine of precedent

in more than a century. It is the product of 13 distinguished coauthors, 12 of whom are appellate judges whose professional work requires them to deal with precedents daily. Together with their editor and coauthor, Bryan A. Garner, the judges have thoroughly researched and explored the many intricacies of the doctrine as it guides the work of American lawyers and judges. The treatise is organized into nine major topics, comprising 93 blackletter sections that elucidate all the major doctrines relating to how past decisions guide future ones in our common-law system. The authors' goal was to make the book theoretically sound, historically illuminating, and relentlessly practical. The breadth and depth of research involved in producing the book will be

immediately apparent to anyone who browses its pages and glances over the footnotes: it would have been all but impossible for any single author to canvass the literature so comprehensively and then distill the concepts so cohesively into a single authoritative volume. More than 2,500 illustrative cases discussed or cited in the text illuminate the points covered in each section and demonstrate the law's development over several centuries. The cases are explained in a clear, commonsense way, making the book accessible to anyone seeking to understand the role of precedents in American law. Never before have so many eminent coauthors produced a single lawbook without signed sections, but instead writing with a single voice. Whether you are a judge, a lawyer, a law student, or

even a nonlawyer curious about how our legal system works, you're sure to find enlightening, helpful, and sometimes surprising insights into our system of justice.

The Jungle Sale June Crebbin 1990

Pictures from Italy Charles Dickens
1846 After MARTIN CHUZZLEWIT was
published in 1844, Dickens
deliberately took a break from novels
to travel in Italy for almost a year.
Attracted by the urban desolation,
the colourful life of the streets and
visible signs of the nation's richly
textured past, rather than by the
traditional tourist sites, the result
is a thrilling travelogue. It also
reveals Dickens's anxieties and
concerns, and should be viewed
alongside the masterpieces of his
mature works.

Germany, 1858-1990 Alison Kitson 2001
Specially written for the AS/A2

extended period cover with detailed
focus on exam board-selected topics.
The lively, accessible text is
supplemented by Spotlights, providing

detailed study of sources on key
issues and topics, and Document
Exercises, which offer opportunities
for assessment and exam practice.
Covering almost 150 years between
unification and reunification, with a
particular emphasis on the interwar
years, the text encourages students
to think for themselves around the
issues that have affected German
history during this period and to
consider important historical debates
and controversies.

How to Sell Your Art Online Cory Huff 2016-06-28 An essential guide for artist that teaches them how to skip the gallery system, find their niche, and connect directly with collectors to profitably sell their art. For years, galleries have acted as gatekeeper separating artists and collectors. But with the explosion of the Internet, a new generation of savvy, independent artists is connecting with buyers and making a substantial living doing what they love. How to Sell Your Art Online shows any artist how to make a successful living from their work.

Cory Huff dispels the myth of the starving artist and provides the effective business strategies necessary to make artistic creations pay. He helps individual artists find their niche; outlines the elements essential for an effective website; and provides invaluable advice on e-mail marketing, blogging, social media marketing, and paid advertising—explaining how to tie all these online activities into offline success. Most importantly, he shares the secret to overcoming the biggest challenge artists face when self-marketing: learning how to tell their unique stories. Every artist has a reason for making art, but can't always find the right way to express it. Huff provides exercises artists can use to clarify the intellectual and emotional process behind their

art, and teaches them how turn that knowledge into stories they can tell online and in person—and expand their reach through blogs and social media to build their art business. Drawing from the stories of successful artists, thoroughly describing how art is sold today, and providing tips on how to build connections personally and electronically, *How to Sell Your Art Online* illustrates the countless ways artists can take control of their creative careers—and sell their work without selling out.

The Writing Revolution Judith C. Hochman 2017-08-07 Why you need a writing revolution in your classroom and how to lead it The Writing

Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, The Writing Revolution can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of teaching

writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

Yield gap analysis of field crops

Food and Agriculture Organization of the United Nations 2018-06-29 To feed a world population that will exceed 9 billion by 2050 requires an estimated 60% increase over current primary agricultural productivity. Closing the common and often large gap between actual and attainable crop yield is critical to achieve this goal. To close yield gaps in both small and large scale cropping

systems worldwide we need (1) definitions and techniques to measure and model yield at different levels (actual, attainable, potential) and different scales in space (field, farm, region, global) and time (short and long term); (2) identification of the causes of gaps between yield levels; (3) management options to reduce the gaps where feasible and (4) policies to favour adoption of sustainable gap-closing solutions. The aim of this publication is to critically review the methods for yield gap analysis, hence addressing primarily the first of these four requirements, reporting a wide-ranging and well-referenced analysis of literature on current methods to assess productivity of crops and cropping systems.

An Astrobiology Strategy for the

Search for Life in the Universe

National Academies of Sciences, Engineering, and Medicine 2019-04-20
Astrobiology is the study of the origin, evolution, distribution, and future of life in the universe. It is an inherently interdisciplinary field that encompasses astronomy, biology, geology, heliophysics, and planetary science, including complementary laboratory activities and field studies conducted in a wide range of terrestrial environments. Combining inherent scientific interest and public appeal, the search for life in the solar system and beyond provides a scientific rationale for many current and future activities carried out by the National Aeronautics and Science Administration (NASA) and other national and international agencies and organizations. Requested

by NASA, this study offers a science strategy for astrobiology that outlines key scientific questions, identifies the most promising research in the field, and indicates the extent to which the mission priorities in existing decadal surveys address the search for life's origin, evolution, distribution, and future in the universe. This report makes recommendations for advancing the research, obtaining the measurements, and realizing NASA's goal to search for signs of life in the universe.

ART/WORK Heather Darcy Bhandari

2009-03-24 Find Out What They Didn't Teach You in Art School The most comprehensive guide of its kind, *Art/Work* gives artists of every level the tools they need to make it in an art world so competitive one dealer likens it to "The Sopranos, except nobody gets killed." Whether you're an art school grad looking for a gallery, a mid-career artist managing a busy studio, or someone just thinking about becoming a professional artist, this indispensable resource will help you build your career and protect yourself along the way. Unlike other creative professionals, visual artists don't have agents or managers. You have to do it all yourself, at least until you find gallery representation -- and even then, there are important business

and legal issues you need to understand to stay in control of your career and ensure you're being treated fairly. Heather Darcy Bhandari, a gallery director, and Jonathan Melber, an arts lawyer, walk you through these issues so that you can essentially act as your own manager and agent. They show you, for example, how to tackle business basics such as tracking inventory and preparing invoices; how to take legal precautions like registering a copyright and drafting consignment forms; how to use promotional tools like websites and business cards; and how to approach career decisions such as choosing the right venue to show your work. In addition to drawing on their own experiences, Bhandari and Melber interviewed nearly one hundred curators, dealers, and other arts

professionals, in cities across the country, about what they expect from and look for in artists. The authors also talked to a host of artists about their careers and the lessons they've learned navigating the art world. The book is full of their entertaining anecdotes and candid advice. No matter what kind of artist you are -- or want to be -- this book will help you. Art/Work covers everything you need to know to succeed, saving you from having to learn it all the hard way -- and letting you spend more time making art.

Proxies Dylan Mulvin 2021-08-17 How those with the power to design technology, in the very moment of design, are allowed to imagine who is included--and who is excluded--in the future. Our world is built on an

array of standards we are compelled to share. In *Proxies*, Dylan Mulvin examines how we arrive at those standards, asking, "To whom and to what do we delegate the power to stand in for the world?" Mulvin shows how those with the power to design technology, in the very moment of design, are allowed to imagine who is included--and who is excluded--in the future. For designers of technology, some bits of the world end up standing in for other bits, standards with which they build and calibrate. These "proxies" carry specific values, even as they disappear from view. Mulvin explores the ways technologies, standards, and infrastructures inescapably reflect the cultural milieus of their bureaucratic homes. Drawing on archival research, he investigates

some of the basic building-blocks of our shared infrastructures. He tells the history of technology through the labor and communal practices of, among others, the people who clean kilograms to make the metric system run, the women who pose as test images, and the actors who embody disease and disability for medical students. Each case maps the ways standards and infrastructure rely on prototypical ideas of whiteness, able-bodiedness, and purity to control and contain the messiness of reality. Standards and infrastructures, Mulvin argues, shape and distort the possibilities of representation, the meaning of difference, and the levers of change and social justice.

Dual Coding for Teachers Oliver Caviglioli 2019-06-04 As part of the

discovery of cognitive science, teachers are waking up to the powers of dual coding - combining words with visuals in your teaching. But cognitive scientists aren't graphic designers, and so their books don't show teachers how to be competent in producing effective visuals. There is a huge gap between what we know about dual coding and the skills needed to practice it effectively in the classroom. Until now. *Dual Coding With Teachers* is a breakthrough educational book. No other book has been designed with both cognitive science and graphic principles in mind. Every page contains diagrams, infographics, illustrations and graphic organisers. The book is designed to cater for both the busy teacher in a rush, as well as the research-hungry colleague. Over 35

teachers, teacher developers, psychologists and information designers are profiled, each with a double-page spread, highlighting their dual coding practice. The author, Oliver Caviglioli, is uniquely placed to bridge the gap between education and graphic design. A former special school head teacher, Oliver learned design principles from an early age from his architect and typographer father. Four decades of reading educational research has found its visual expression in this spectacular, image-rich book. **Real Artists Don't Starve** Jeff Goins 2017-06-06 Jeff Goins dismantles the myth that being creative is a hindrance to success by revealing how an artistic temperament is a competitive advantage in the marketplace. The myth of the

starving artist has dominated our culture, seeping into the minds of creative people and stifling their pursuits. The truth is that the world's most successful artists did not starve. In fact, they capitalized on the power of their creative strength. In *Real Artists Don't Starve*, bestselling author and creativity expert Jeff Goins debunks the myth of the starving artist by unveiling the ideas that created it and replacing them with 14 rules for artists to thrive, including: Steal from your influences (don't wait for inspiration) Collaborate with others (working alone is a surefire way to starve) Take strategic risks (instead of reckless ones) Make money in order to make more art (it's not selling

out) Apprentice under a master (a "lone genius" can never reach full potential) From graphic designers and writers to artists and business professionals, creatives already know that no one is born an artist. Goins' revolutionary rules celebrate the process of becoming an artist, a person who utilizes the imagination in fundamental ways. He reminds creatives that business and art are not mutually exclusive pursuits. *Real Artists Don't Starve* explores the tension every creative person and organization faces in an effort to blend the inspired life with a practical path to success. Being creative isn't a disadvantage for success, it is a powerful tool to be harnessed.
