Chapters are organized so that instructors can teach and students can learn these frameworks comparatively and critically. Each chapter follows a similar outline, which includes 1) a summary of the major contributors to the framework presentation of the core concepts; 2) five to ten principles for practice in application of the framework; 3) an example of its application to a particular practice situation; 4) assessment of its strengths and limitations; 5) annotated sources for further study; and 6) discussion questions to promote critical thinking about the framework.
