Mini Weapons of Mass Destruction John Austin 2017-06-05 We've come a long way from the Peashooter Era: with the advent of modern household products and office supplies - foldback clips, clothespins, rubber bands, ballpoint pens, toothpicks, paper clips and plastic utensils - the everyday junk drawer can hold all the materials needed to create pocket-sized weaponry. Whether you're slowing dying of boredom in a stuffy office, plotting revenge on your older siblings or simply looking for a wonderful way to kill some time, this book is for you. Toy designer John Austin provides detailed, step-by-step instructions for each project, including materials and ammo lists, clear pictures, and construction tips, for mayhem-loving MacGyvers. The 35 devices include catapults, slingshots, darts, crossbows, and combustion shooters. Build a tiny trebuchet from paper clips and a D-cell battery. Wrap a penny in a string of paper caps to create a surprisingly impressive "bomb." Several of the projects even include variations where combatants mount laser pointer sights to their shooters to increase their accuracy. The instructions are simple so that anyone can make these wacky innovations in minutes whilst also learning about mechanics and physics in a fun, hands-on way.

101 Gift Projects from Wood James A. Jacobson 1992 Over 200 drawings, patterns, and photographs, plus expert finishing tips will show you how to build these great projects easily. Most can be crafted with small power and hand tools; some can be hand-carved.

Surprise the Enemy Rob Ives 2016-11-01 Make a set of traps and triggers powered by rubber bands and inspired by real-life devices. All you need are everyday items and some adult help. Choose your target and area of operation, hide your traps and triggers, and wait. Bite-sized facts explain how these traps and triggers have been used through history too!

Rubber Band Engineer Lance Akiyama 2016-05-15 You don't have to be a genius to create these ingenious contraptions, you just need rubber bands, glue, paperclips, and Rubber Band Engineer, of course. Shooting far, flying high, and delivering way more exciting results than expected are the goals of the gadgets in Rubber Band Engineer. Discover unexpected ways to turn common materials into crafty contraptions that range from surprisingly simple to curiously complex. In vivid color photos, you'll be guided on how to create slingshot rockets, unique catapults, and even hydraulic-powered machines. Whether you build one or all 19 of these designs, you'll feel like an ingenious engineer when you're through. Best of all, you don't need to be an experienced tinkerer to make any of the projects! All you need are household tools and materials, such as paper clips, pencils, paint stirrers, and ice pop sticks. Grab your glue gun, pull out your pliers, track down your tape and paper clips, and get started on the challenging, fun, and rewarding journey toward becoming a rubber band engineer.

The BrickGun Book Jeff Boen 2013 The BrickGun Book shows you how to build five remarkably sleek LEGO(R) handgun replicas, like the classic Berreta 92FS and a formidable rubber-band-firing MAC-11. Each chapter includes step-by-step building instructions and a complete parts list using only readily available LEGO pieces. Builder Jeff Boen has designed each model with stunning accuracy and attention to detail, focusing on everything from 1:1 real-life scale to functioning cocking and trigger mechanisms. Each BrickGun is ultra-realistic in look and feel, but mostly harmless--perfect for display or your next backyard battle. NOTE: Adult supervision is required. These models are not suitable for children under the age of 12.

Canadian Journal of Fisheries and Aquatic Sciences 1989-04

LEGO Heavy Weapons Jack Streat 2012 Provides instructions for building replicas of firearms, including a desert eagle, jungle carbine, and an AKS-74U.

The New APPI United States. Army Materiel Command 1967

Badass LEGO Guns Martin Hudepohl 2011 LEGO Guns is packed with building instructions for five impressive looking "weapons" built entirely from LEGO TECHNIC parts. In this heavily illustrated 2-color book, you learn how to use LEGO TECHNIC pieces to build working model guns like the Warbeast, a sophisticated, fully-automatic submachine gun; Parabella, a semi-automatic pistol; Thriller, a slide action crossbow pistol with smooth cocking and chambering mechanisms; and the Magic Moth, a simple butterfly "knife" built with TECHNIC pieces. With the help of a bit of sanding, some rubber bands, and Crazy Glue, each gun actually shoots LEGO bricks at high speed, with surprising accuracy. The building instructions for each model are easy to follow and include detailed parts lists. LEGO Guns also includes sections discussing the general concepts of LEGO gun design and offers practical building tips and tricks. The models range from sophisticated to easy, and readers of all ages will find something enjoyable to build and play with.

Mini Weapons of Mass Destruction: Build and Master Ninja Weapons John Austin 2014-09-01 To become a ninja master, one needs discipline, a silent footstep, and an impressive personal arsenal. Author and toy designer John Austin shows even "little grasshoppers" how to turn disposable pens, rubber bands, old CDs, toothpicks, erasers, mint tins, and binder clips into miniaturized stealth weaponry. Clothespins, craft sticks, playing cards, pushpins, and recycled milk jug caps make a cotton swab-launching Hwacha Rocket Cart. Rolled magazines, book rings, and duct tape can be fashioned into a set of working but harmless nunchucks. And a carefully folded sheet of paper can become an origami boomerang. This handy resource provides detailed, step-by-step instructions with diagrams to show stealth warriors how to build 37 different ninja weapons for the modern era. All of the projects in MiniWeapons of Mass Destruction 4 are built from common household and office items--plastic utensils, markers, clothespins, paper clips, wire hangers, and discarded packaging--all clearly detailed on materials lists. Builders are offered a variety of samurai stars, blowguns, throwing darts, siege weapons, and ninja tools to choose from. Once they've assembled their armory, the author provides novices several targets to practice their shooting skills. Nested paper cups become a dragon; chopsticks and a paper plate, a tripod bulls-eye. Armed, trained, and shrouded in black, they are now prepared for missions of reconnaissance,

sabotage, and other grim errands. John Austin is a professional toy designer and author of MiniWeapons of Mass Destruction series, as well as So Now You're a Zombie. He lives in Cincinnati, Ohio.

ATF - National Firearms Act Handbook U.S. Department of Justice 2019-03-17 This handbook is primarily for the use of persons in the business of importing, manufacturing, and dealing in firearms defined by the National Firearms Act (NFA) or persons intending to go into an NFA firearms business. It should also be helpful to collectors of NFA firearms and other persons having questions about the application of the NFA. This publication is not a law book. Rather, it is intended as a ?user friendly? reference book enabling the user to quickly find answers to questions concerning the NFA. Nevertheless, it should also be useful to attorneys seeking basic information about the NFA and how the law has been interpreted by ATF. The book's Table of Contents will be helpful to the user in locating needed information. Although the principal focus of the handbook is the NFA, the book necessarily covers provisions of the Gun Control Act of 1968 and the Arms Export Control Act impacting NFA firearms businesses and collectors.

Backpacker 2001-03 Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

Get Big Things Done Erica Dhawan 2015-02-24 Connectional Intelligence unlocks the 21st-century secret to getting "big things done," regardless of who you are, where you live, or what you do. We typically associate success and leadership with smarts, passion and luck. But in today's hypercompetitive world, even those gifts aren't enough. Get Big Things Done argues that the game changer is a thoroughly modern skill called Connectional Intelligence. Virtually anyone can maximize his or her potential, and achieve breakthrough performance, by developing this crucial ability. So, what is it? Put simply, Connectional Intelligence is the ability to combine knowledge, ambition and human capital, forging connections on a global scale that create unprecedented value and meaning. As radical a concept as Emotional Intelligence was in the 90s, Connectional Intelligence is changing everything from business and sports to academics, health and politics by quickly, efficiently and creatively helping people enlist supporters, drive innovation, develop strategies and implement solutions to big problems. Can a small-town pumpkin grower affect the global food crisis? A Fortune 500 executive change her company's outdated culture through video storytelling? A hip-hop artist launch an international happiness movement? Or a scientist use virtual reality games to lower pain for burn victims? The answer, you'll read, is a resounding yes. Each of these individuals is using Connectional Intelligence to become a power player to get big things done. Erica Dhawan and Saj-nicole Joni's Get Big Things Done unlocks the secrets of how the world's movers and shakers use Connectional Intelligence to achieve their personal and professional goals--no matter how ambitious.

WIRED Achieve clandestine ends practically and inexpensively with Desk Wars - perfect for do-it-yourself spy enthusiasts. Follow fully illustrated step-by-step instructions to build 30 miniature secret weapons and surveillance tools from stationery, transforming common household items into uncommon gadgets and sidearms. Assert dominion over the desktop with these cunning contraptions:

Ready the Cannons! William Gurstelle 2016-10-01 From the author of Backyard Ballistics comes this new DIY handbook on building cannons and other fun things that shoot, from wiffle ball launchers and beverage bottle bazookas to super-powered water guns and model culverins. It combines military history and physics with do-it-yourself projects. Now ordinary folks can construct a dozen awesome artillery devices in their garage or basement workshops using inexpensive household or hardware store materials and this step-by-step guide. Clear instructions, diagrams, and photographs show how to build projects ranging from the simple supersonic ping-pong ball shooter to the more complex replica of the Napoleon Cannon. With a strong emphasis on safety, the book also gives tips on troubleshooting, tells the history of how and when the artillery devices were used, and explains the physics behind the projects. This book will be indispensable for the legions of backyard watergunners, model-rocket launchers, and fireworks fanatics who wish every day was the fourth of July.

A Book of Target Practice Projects for Kids Who Love to Take Aim Ruth Owen 2021-07-15 Marksmanship is a fun skill to develop, but it must be developed safely and responsibly. Both of those aspects of marksmanship are highlighted in this entertaining and educational guide. Young readers are introduced to a number of exciting DIY projects that allow them to practice their shooting skills. In addition to clear and focused instructions, important tips are included to ensure that each project is completed and used in an age-appropriate and safe manner. By following a series of steps accompanied by colorful photographs, readers are able to independently create and use tools that will test their marksmanship.

Dictionary of Occupational Titles 1991

Mini Weapons of Mass Destruction: Build Implements of Spitball Warfare John Austin 2009-10-01 We've come a long way from the Peashooter Era: with the advent of modern household products and office supplies—binder clips, clothespins, rubber bands, ballpoint pens, toothpicks, paper clips, plastic utensils, and (of course) matches and barbecue lighters—troublemakers of all stripes have the components needed to build an impressive, if somewhat miniaturized, arsenal. Toy designer John Austin provides detailed, step-by-step instructions for each project, including materials and ammo lists, clear diagrams, and construction tips, for mayhem-loving MacGyvers. The 35 devices include catapults, slingshots, minibombs, darts, and combustion shooters. Build a tiny trebuchet from paper clips and a D-cell battery. Wrap a penny in a string of paper caps to create a surprisingly impressive "bomb." Several of the projects even include variations where combatants mount laser pointer sights to their shooters to increase their accuracy. Finally, once you've built your armory, the author provides plans for a Top Secret Concealing Book to hide your stash, as well as targets for shooting practice. Never let your personal space go undefended again!

International Underwater Systems Design 1981

Almost Donald Thomsen 2010-11-29 ALMOST is about a young lad reared on a farm outside a small town (population 200) in rural Nebraska. He is the last of six children, his closest sibling nine years his senior. Hes blessed with a fertile imagination and the influence of his older brothers extensive comic book collection, and action-packed radio programs. These stimuli were his only link to the outside world. What he discovered piqued his curiosity. Much to his delight, his mother, trying to help elevate their financial status, got a job at the local dry-goods store in town. This arrangement made it possible for Donnie to have a lot of free time (during the summer and after school) to visit most all the towns businesses and discover the inner-workings of their prospective operations. This led to his realizing at an early age that he didnt want to follow in the footsteps of his farmer parents. He decided to become a businessman. The book is a compilation of his trials and tribulations, his many jobs, and entrepreneurial attempts to amass his fortune. His naivety combined with dogged determination get him into some hilarious situations. Revealed are the self-contrived solutions to his many problems, applying comic book logic and ingenuityand almost succeeding! Donnie decides his future is not in Nebraska and convinces his parents to let him join the Navy while a junior in high school. Thus he schedules his four-year induction immediately after graduation, only two months into his seventeenth year of age. He is leaving: his elderly parents, the only girl he ever dated, and a naive lifestyle, (his moral compass). His security is his life-savings of \$145.00 stockpiled in the bank. Donnie is entering a strange world hes completely unfamiliar with, and totally unprepared for, and hes doing this. . . alone.
