Technologies for a Greenhouse-Constrained Society Michael A. Kuliasha 1992-03-17 This timely book presents strategies for mitigation of the greenhouse effect. It provides practical counter measures to reduce the emission of greenhouse gases. Key substitute technologies discussed include energy efficiency and conservation, biomass, and nuclear energy. These technologies are both mature and can be applied on a large scale. Important concepts can apply to other technologies as well. Technologies for a Greenhouse-Constrained Society will help scientists and engineers identify the technological and policy actions needed to counteract the greenhouse effect. Solutions are aimed at both developed and developing countries. Technologies for a Greenhouse-Constrained Society will appeal to environmental engineers and scientists, meteorologists, social scientists, geologists, educators, fuel engineers, energy engineers, economists, and others interested in this field.
