Metaphorically Selling Anne Miller 2004 You might say that author Anne Miller is like a homeowner who strikes oil while digging a ditch in the backyard. In this book, she shares knowledge she refined from more than 20 years of distilling metaphors. Her book leaves little doubt that metaphors can fuel the engines of your sales success. Its pages are full of colorful, persuasive anecdotes and analogies that follow one another like racecars coming out of Turn Four at Daytona. If you doubt whether her advice will apply to the rubber-meets-the-road realities of sales, just take Miller's ideas out for a test drive. Her primary expertise is in presentations, not sales, which may explain why her roadmap (note the extended metaphor) to success is so much more creative than most sales advice. Miller's book leaves many other tomes in the dust. getAbstract.com thinks sales professionals who read this book and master the art of the metaphor should get ready to take a victory lap or two.

Privatisation and Development Claude V. Chang 2017-11-28 The book interrogates privatisation in terms of its effectiveness vis-à-vis its stated goals and more fundamentally in terms of its success in delivering economic development. It investigates why privatisation was successful in the UK and other OECD countries and why it has not met with equal success in developing countries. In this regard, it further examines the policy prescriptions of the IMF and World Bank in relation to the conceptualised benefits and theoretical assumptions underlying these supposed benefits. The author assesses the extent to which culture and customs, indeed the mode of production, stand in determinate relationship to the goals, techniques and outcome of the process. Furthermore, Chang examines the degree to which socioeconomic and moral consequences of privatisation have been ignored in pursuit of the ideological imperative implicit in the Washington Consensus. Hence, the book contributes to the reflective thought that must necessarily be part of theory validation, and provides the basis for a balanced and empirically-valid theory of privatisation.
