U.S.S. Enterprise Haynes Manual Ben Robinson 2011-07-12 The U.S.S. Enterprise is without doubt the most famous starship in history. The vessels that have carried the name have saved the galaxy countless times and her captains, including Archer, Kirk, and Picard, have been legendary. This Haynes Manual provides in-depth information about these extraordinary ships, from the Enterprise NX-01, to Captain Kirk's Enterprise NCC-1701 and Captain Picard's Enterprise NCC-1701-D including histories of each vessel, technical information about their systems, and discussions of key technologies such as transporters and warp-speed travel. Find out exactly what powered these ships, how they were armed and what it took to operate them. The book features newly created artwork throughout, including full-ship cutaways of each Enterprise, key systems, and interior locations together with detailed new exterior views by one of Star Trek's original visual effects artists. This Haynes Manual is fully authorized by CBS and technical consultant Michael Okuda, who spent thirteen years working on Star Trek TV series and movies.

Sustainable Manufacturing Günther Seliger 2012-06-30 The annual series Global Conferences on Sustainable Manufacturing (GCSM) sponsored by the International Academy for Production Engineering (CIRP) is committed to excellence in the creation of sustainable products and processes that conserve energy and natural resources, have minimal negative impacts upon the natural environment and society, and adhere to the core principle of sustainability by considering the needs of the present without compromising the ability of future generations to meet their own needs. To promote this noble goal, there is a great need for increased awareness in education and training, including the dissemination of new findings on principles and practices of sustainability applied to manufacturing. The series Global Conferences on Sustainable Manufacturing offers international colleagues the opportunity to network, expand their knowledge, and improve practice globally.

Battle Come Down Charlie Flowers 2014-11-23 Britain, five minutes into the future. War comes to Tottenham as the Syrian conflict washes back onto our shores, and anarchists of every description bring heavy weaponry onto the streets, arming the local gangs. But they haven't met Riz and the Blackeyes. A terror is about to be unleashed on the gangs that they will have never imagined and they are completely unprepared for. A terror from our own side... As the crisis escalates and violence and atrocity devastate North London, Sergeant Farzana Shaheen and her covert army unit will be tested to breaking point. But can they end the conflict without becoming war criminals themselves? BATTLE COME DOWN is a searing portrayal of future war, from the high-tech networked command centres to the cockpit of an attack helicopter, and right down to the soldier on the ground.

Microelectronic Circuits: Analysis and Design Muhammad H. Rashid 2016-12-18 MICROELECTRONIC CIRCUITS: ANALYSIS AND DESIGN, 3E combines a breadth-first approach to learning electronics with a strong emphasis on design and simulation. This book first introduces the general characteristics of circuits (ICs) in preparation for using circuit design and analysis techniques. This edition then offers a more detailed study of devices and circuits and how they operate within ICs. More than half of the problems and examples concentrate on design and emphasize how to use computer software tools extensively. The book's proven sequence introduces electronic devices and circuits, then electronic circuits and applications, and finally, digital and analog integrated circuits. Readers learn to apply theory to real-world design problems as they master the skills to test and verify their designs. Planning for Power Advertising Anand Halve 2005-10-04 This book is a step-by-step guide to producing a sound foundation for advertising: one that will serve as the springboard to inspire powerful creative expression. Rich in cases from the evolving Indian context, Planning for Power Advertising offers an understanding of how strategic advertising is created. It takes the reader through cases and analyses of what worked or did not work in the marketplace. Anand Halve involves the reader throughout in exercises with Action Points at the end of most chapters—an approach that brings alive the concepts within, and helps readers discover the theory in practice. For advertising professionals, this is a manual to create a robust advertising brief. For students of advertising and marketing, Planning for Power Advertising is a simulation exercise from which they will learn how to apply the principles that will help them in their future careers. And for professionals in areas related to advertising—such as media, event management and PR—this book provides an insight into how the strategic underpinning of advertising is built.

The Teaching of Speaking Skills Via Plasma TV Instruction Berhanu Abera 2011-09 Educational technology has evolved and become more central to teaching and learning nowadays. There is a growing recognition of its potential value in establishing and supporting a foreign language teaching environment. This study

addresses the teaching of speaking skills via plasma TV. To generate data for the study, sixteen televised speaking lessons were observed, two hundred students filled a questionnaire, and four teachers of the observed sections were interviewed. The results of the study revealed that the pace of the plasma teacher mismatched with the students' pace of learning. The roles of classroom teachers during the telecasted scenario were also minimal. And both the plasma and the classroom teachers took most of the students' speaking time. Moreover, the time given in the plasma program and the amount of speaking activities were not adequate to generate oral discussions. Hence, students' participation in the broadcasted speaking lessons was low. What is more, the classroom conditions (immense number of students and improper seats) were not suitable to perform speaking activities. Based on these results, conclusions were drawn, and recommendations were made.

TPACK: Breakthroughs in Research and Practice Management Association, Information Resources 2019-02-01 Educational technologies are becoming commonplace entities in classrooms as they provide more options and support for teachers and students. However, many teachers are finding these technologies difficult to use due to a lack of training and instruction on how to effectively apply them to the classroom. TPACK: Breakthroughs in Research and Practice is an authoritative reference source for the latest research on the integration of technological knowledge, pedagogical knowledge, and content knowledge in the contexts of K-12 education. Highlighting a range of pertinent topics such as pedagogical strategies, blended learning, and technology integration, this publication is an ideal resource for educators, instructional designers, administrators, academicians, and teacher education programs seeking current findings on the implementation of technology in instructional design.
