Charting the World Richard Panchyk 2011-08 Maps have been a part of human culture since the days of scratching on cave walls, and this richly illustrated history chronicles the road from simple diagrams used to avoid danger to the complex, navigational charts used today. Displaying an array of historic atlases and a variety of cartography styles, this book allows young readers to test their map-reading skills while discovering the intricate beauty and the wealth of information held within. Geographical concepts are spotlighted through an assortment of guided activities—including finding the elevation of hills, plotting a course with a magnetic compass, creating three-dimensional land models using a contour map, and performing a plot survey. Drawing the conclusion that the study of geography and maps is crucial to understanding an ever-changing planet, this handbook discloses the ways in which technological advances in cartography can further discussions on climate change, warfare, environmental conservation, population growth, and other timely topics.

Ancestral Voices Etienne van Heerden 2012-09-27 In the wild night hours, or during the heat of the day - whenever man's thoughts whirl feverishly - then truth and fantasy, the past and the future, life and death are indiscriminately mingled on Toorberg, home of the Moolman family. So the magistrate is to learn as he investigates the strange circumstances of the death of little Noah, child of grief, who was not entirely of this world. Every day the case becomes more complex, until it challenges the very foundations of the law. It seems as if the magistrate will have to judge an entire dynasty, both the living and the dead. Everyone's guilt has to be affirmed, or denied, and this means he will have to rip open the lives of all. The Moolmans are a tribe who have long since learned how to deal with their own. Parents cut children out of their lives, shunt them aside to live as stepchildren, scrag-ends of the clan, or as city-dwellers whose names are never uttered. The Moolmans cannot forgive; not when their tribal blood is betrayed.

Eating the Sun Oliver Morton 2009-11-17 Wherever there is greenery, photosynthesis is working to make oxygen, release energy, and create living matter from the raw material of sunlight, water, and carbon dioxide. Without photosynthesis, there would be an empty world, an empty sky, and a sun that does nothing more than warm the rocks and reflect off the sea. Eating the Sun is the story of a world in crisis; an appreciation of the importance of plants; a history of the earth and the feuds and fantasies of warring scientists; a celebration of how the smallest things, enzymes and pigments, influence the largest things, the oceans, the rainforests, and the fossil fuel economy. Oliver Morton offers a fascinating, lively, profound look at nature's greatest miracle and sounds a much-needed call to arms—illuminating a potential crisis of climatic chaos and explaining how we can change our situation, for better or for worse.

James Buchanan 2008 A skills standard for budding scientists is an invaluable and practical hands-on guide for teaching students the vital skills needed at high school and early tertiary level for successful completion of most tasks and assignments. It covers a wide range of skills from effective essay and report writing, to working with and evaluating different kinds of information and data, effective summarising and note-taking, as well as the skills required for more practical tasks such as conducting surveys, presenting orals, creating project displays, and so on. This book aims to offer practical skills education, whilst encouraging the vital practice of critical thinking, each step of the way. The book also aims to promote standardisation of skills within all schools and across all grades so that teachers and learners alike can start working from the 'same page'. Standardising skills helps eliminate the confusion arising out of conflicting skills instruction and helps learners know what should be presented in any task or assignment.
