Daily Life Skills Big Book Gr. 6-12 Sarah Joubert 2015-12-24 Our combined resource helps engage learners while providing the knowledge they need to have successful daily life skills. Our in depth study combines the three lessons in this series: Daily Marketplace Skills, Daily Social & Workplace Skills, and Daily Health & Hygiene Skills. Students will start by going into the marketplace and learning how to budget and how to best spend their money. Then, students go into the workplace and learn how to behave in a

social environment. Finally, students go back to their home and learn about health and hygiene. Comprised of reading passages, graphic organizers, real-world activities, crossword, word search and comprehension quiz, our resource combines high interest concepts with low vocabulary to ensure all learners comprehend the essential skills required in life. All of our content is reproducible and aligned to your State Standards and are written to Bloom's Taxonomy.

Becoming a teacher Josef de Beer
2020-12-31 This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the 'elephant in the room'. These authors note that 'the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road'. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the 'gap' that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open- and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where "safe spaces" or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive

use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.

Art and Creative Development for Young Children J. Englebright Fox

2014-01-01 Written for pre-service and in-service early childhood professionals in child care, preschool, or kindergarten through third grade settings, **ART & CREATIVE DEVELOPMENT FOR YOUNG CHILDREN**, 8th Edition, takes a child-centered approach to art education. Updated throughout, the book includes an in-depth discussion of technology to aid teachers in understanding the role that technology can play in children's visual art appreciation and production. Guidelines for establishing an inclusive art program in classrooms for young children are included for early childhood professionals. Activities and recipes make the text a valuable resource for in-service teachers. Explore Your Environment: K-8 Activity Guide Project Learning Tree 2021-08

Explore Your Environment: K-8 Activity Guide includes 50 hands-on, multidisciplinary activities to connect children to nature and increase young people's awareness and knowledge about their environment. Activities include step-by-step instructions, time and material requirements, and corresponding student worksheets with green career connections. Teachers and nonformal educators can easily integrate the activities into their programming. Activities are organized by

grade level (K-2, 3-5, and 6-8) and align with national standards for science, English language arts, math, and social studies. Many activities offer variations for a different grade level or focus. While lessons can be conducted both indoors and outdoors, all suggest meaningful ways to take student learning outside. Many activities are particularly suited to urban environments and STEM learning as well as some longer-term studies. This supplementary curriculum develops students' critical thinking and problem-solving skills.

Mathematics Learning in Early Childhood National Research Council
2009-11-13 Early childhood mathematics is vitally important for young children's present and future educational success. Research demonstrates that virtually all young children have the capability to learn and become competent in mathematics. Furthermore, young children enjoy their early informal experiences with mathematics. Unfortunately, many children's potential in mathematics is not fully realized, especially those children who are economically disadvantaged. This is due, in part, to a lack of opportunities to learn mathematics in early childhood settings or through everyday experiences in the home and in their communities. Improvements in early childhood mathematics education can provide young children with the foundation for school success. Relying on a comprehensive review of the research, *Mathematics Learning in Early Childhood* lays out the critical areas that should be the focus of young children's early mathematics education, explores the extent to which they are currently being incorporated in early childhood settings, and identifies the changes needed to improve the quality of mathematics experiences for young children. This book serves as a call to action to improve the state of early childhood mathematics. It will be especially useful for policy makers and practitioners—those who work directly with children and their families in shaping the policies that affect the education of young children.
