**Gold of the Great Steppe** Rebecca Roberts 2021-02-15 This catalogue accompanies an exhibition which presents artefacts from burial mounds of the Saka people of East Kazakhstan, who, over 2,500 years ago, lived lives rich in complexity. The Saka people occupied a landscape of seemingly endless steppe to the west, bounded by mountains to the east and south. Known to be fierce warriors, they were also skilled craftspeople, producing intricate gold and other metalwork. Their artistic expression indicates a deep respect for the animals around them - both real and imagined. They dominated their landscapes with huge burial mounds of sophisticated construction, burying their horses with elite members of their society. Recent excavations and analyses, led by archaeologists from Kazakhstan, have demonstrated that by looking through a scientific and social lens at what the Saka left behind we can paint a picture of a complex society. We can start to understand how it affected the way people lived, how they travelled, the things they made and what they believed in.00Exhibition: The Fitzwilliam Museum, Cambridge, UK (October 2021-January 2022).

**When You Reach Me** Rebecca Stead 2009-07-14 "Like A Wrinkle in Time (Miranda's favorite book), When You Reach Me far surpasses the usual whodunit or sci-fi adventure to become an incandescent exploration of 'life, death, and the beauty of it all.'" —The Washington Post This Newbery Medal winner that has been called "smart and mesmerizing," (The New York Times) and "superb" (The Wall Street Journal) will appeal to readers of all types, especially those who are looking for a thought-provoking mystery with a mind-blowing twist. Shortly after a fall-out with her best friend, sixth grader Miranda starts receiving mysterious notes, and she doesn't know what to do. The notes tell her that she must write a letter—a true story, and that she can't share her mission with anyone. It would be easy to ignore the strange messages, except that whoever is leaving them has an uncanny ability to predict the future. If that is the case, then Miranda has a big problem—because the notes tell her that someone is going to die, and she might be too late to stop it. Winner of the Boston Globe–Horn Book Award for Fiction A New York Times Bestseller and Notable Book Five Starred Reviews A Junior Library Guild Selection "Absorbing." —People "Readers ... are likely to find themselves chewing over the details of this superb and intricate tale long afterward." —The Wall Street Journal "Lovely and almost impossibly clever." —The Philadelphia Inquirer "It's easy to imagine readers studying Miranda's story as many times as she's read L'Engle's, and spending hours pondering the provocative questions it raises." —Publishers Weekly, Starred review

**Teaching Mockingbird** Facing History and Ourselves 2018-01-19 Teaching Mockingbird presents educators with the materials they need to transform how they teach Harper Lee's novel To Kill a Mockingbird. Interweaving the historical context of Depression-era rural Southern life, and informed by Facing History's pedagogical approach, this resource introduces layered perspectives and thoughtful strategies into the teaching of To Kill a Mockingbird. This teacher's guide provides English language arts teachers with student handouts, close reading exercises, and connection questions that will push students to build a complex understanding of the historical realities, social dynamics, and big moral questions at the heart of To Kill a Mockingbird. Following Facing History's scope and sequence, students will consider the identities of the characters, and the social dynamics of the community of Maycomb, supplementing their understanding with deep historical exploration. They will consider challenging questions about the individual choices that determine the outcome of Tom Robinson's trial, and the importance of civic participation in the building a more just society. Teaching Mockingbird uses Facing History's guiding lens to examine To Kill a Mockingbird, offering material that will enhance student's literary skills, moral growth, and social development.

**Designs for Science Literacy** American Association for the Advancement of Science 2001-03-22 The call for science curriculum reform has been made over and over again for much of the twentieth century. Arguments have been made that the content of the curriculum is not appropriate for meeting the individual and social needs of people living in the modern world; that the curriculum has become overstuffed with topics and does not serve students especially well; and above all, that the curriculum does not generate the student learning it is expected to produce. The latest volume in a continuing series of publications from the AAAS designed to reform science education, Designs for Science Literacy presupposes that curriculum reform must be considerably more extensive and fundamental than the tinkering with individual courses and subjects that has been going on for decades. Designs deals with the critical issues involved in assembling sound instructional materials into a new, coherent K-12 whole. The book pays special attention to the need to link science-oriented studies to the arts and humanities, and also proposes how to align the curriculum with an established set of learning goals while preserving the American tradition of local responsibility for the curriculum itself. If fundamental curriculum reform is ever to occur, a new process for creating alternatives will have to be developed. Designs for Science Literacy provides the groundwork for such a process.
