The Platonic Dialogues for English Readers: Dialogues of the Socratic school, and dialogues referring to the trial and death of Socrates Plato 1859

I Am a Strange Loop Douglas R. Hofstadter 2007-08-01 Can thought arise out of matter? Can self, soul, consciousness, "I" arise out of mere matter? If it cannot, then how can you or I be here? I Am a Strange Loop argues that the key to understanding selves and consciousness is the "strange loop"—a special kind of abstract feedback loop inhabiting our brains. The most central and complex symbol in your brain is the one called "I." The "I" is the nexus in our brain, one of many symbols seeming to have free will and to have gained the paradoxical ability to push particles around, rather than the reverse. How can a mysterious abstraction be real—or is our "I" merely a convenient fiction? Does an "I" exert genuine power over the particles in our brain, or is it helplessly pushed around by the laws of physics? These are the mysteries tackled in I Am a Strange Loop, Douglas Hofstadter's first book-length journey into philosophy since Gödel, Escher, Bach. Compulsively readable and endlessly thought-provoking, this is a moving and profound inquiry into the nature of mind.

Plato and the English Romantics (RLE: Plato) E Douka Kabitoglou 2013-05-07 This book tackles the problematic relationship between Platonic philosophy and Romantic poetry, between the intellect and the emotions. Drawing on contemporary critical theory, especially hermeneutics and deconstruction, the author shows that a dialogue between thinking and poetizing is possible. The volume yields many new insights into both Platonic and Romantic texts and forms an important work for scholars and students of Greek philosophy, Romantic literature and critical theory.

Philosophy of Education J.J. Chambliss 2013-07-04 First Published in 1996. This first of its kind Encyclopaedia charts the influence of philosophic ideas that have had the greatest influence on education from Ancient Greece to the present. It covers classical thinkers as Plato, Augustine, Hypatia, Locke and Rousseau, as well as recent figures such as Montessori, Heldegger, Du Bois and Dewey. It illuminates time-hounded ideas and concepts such as idealism, practical wisdom, scholasticism, tragedy and truth, as well as modern constructs as critical theory, existentialism, phenomenology, Marxism and post-Colonialism. The coverage consists of 228 articles by 184 contributors who survey the full spectrum of the philosophy of education.

A Philosophy of the Christian Religion Nancey Murphy 2018-10-30 Each field of study comes with its own set of questions; each period of time refines and redirects those questions. The Christian religion as we find it in the twenty-first century presents a unique set of problems to be solved and questions to be answered. In this introduction to the philosophy of the Christian religion, eminent philosopher and theologian Nancey Murphy applies the tools of philosophical analysis to a set of core yet contemporary religious questions: what does our historical moment mean for the possibility of knowing God? Is faith still possible? Does God intervene in human history? Is there such a thing as universal knowledge of God? Written with the needs of students encountering the philosophy of religion for the first time in mind, this book provides a comprehensive introduction to the fundamental questions inherent in Christian faith. Murphy also provides tools for how to answer those questions.

The English Works of Thomas Hobbes of Malmesbury: Tripos. Answer to Bishop Bramhall's book, called The catching of the Leviathan. Historical narration concerning heresy, and the punishment thereof. Considerations upon the reputation, loyalty, manners, and religion of Thomas Hobbes. Answer to Sir William Davenant's preface before "Gondibert." Letter to the Right Honourable Edward Howard Thomas Hobbes 1966

Recollection and Experience Dominic Scott 1995-08-17 Questions about learning and discovery have fascinated philosophers from Plato onwards. Does the mind bring innate resources of its own to the process of learning or does it rely wholly upon experience? Plato was the first philosopher to give an innatist response to this question and in doing so was to provoke the other major philosophers of ancient Greece to give their own rival explanations of learning. This book examines these theories of learning in relation to each other. It presents an entirely different interpretation of the theory of recollection which also changes the way we understand the development of ancient philosophy after Plato. The final section of the book compares ancient theories of learning with the seventeenth-century debate about innate ideas, and finds that the relation between the two periods is far more interesting and complete than is usually supposed.

Writing Across Distances and Disciplines Joyce Magnotto Neff 2009-03-04 "Writing Across Distances and Disciplines addresses questions that cross borders between onsite, hybrid, and distributed learning environments, between higher education and the workplace, and between distance education and composition pedagogy. Exploring the intersection of writing across the curriculum, composition studies, and distance learning, it provides an in-depth look at issues of importance to students, faculty, and administrators regarding the technological future of writing and learning in higher education."--Jacket

The Allegory of the Cave Plato 2021-01-08 The Allegory of the Cave, or Plato's Cave, was presented by the Greek philosopher Plato in his work Republic (514a-520a) to compare "the effect of education (παιδεία) and the lack of it on our nature". It is written as a dialogue between Plato's brother Glaucon and his mentor Socrates, narrated by the latter. The allegory is presented after the analogy of the sun (508b-509c) and the analogy of the divided line (509d-511e). All three are characterized in relation to dialectic at the end of Books VII and VIII (531d-534e). Plato has Socrates describe a group of people who have lived chained to the wall of a cave all of their lives, facing a blank wall. The people watch shadows projected on the wall from objects passing in front of a fire behind them, and give names to these shadows. The shadows are the prisoners' reality.

Plato: The Republic (English Edition) Plato (Plátōn) 2018-12-12 "I went down yesterday to the Piraeus with Glaucon the son of Ariston, that I might offer up my prayers to the goddess (Bendis, the Thracian Artemis.); and also because I wanted to see in what manner they would celebrate the festival, which was a new thing. I was delighted with the procession of the inhabitants; but that of the Thracians was equally, if not more, beautiful. When we had finished our prayers and viewed the spectacle, we turned in the direction of the city; and at that instant Polemarchus the son of Cephalus chanced to catch sight of us from a distance as we were starting on our way home, and told his servant to run and bid us wait for him. The servant took hold of me by the cloak behind, and said: Polemarchus desires you to wait. I turned around, and asked him where his master was." "The Republic" by Plato is a Socratic dialogue concerning justice, the order and character of the just city-state, and the just man. It was published around 380 BC. "The Republic" is Plato's best-known work, *The Dialogues of Plato Translated Into English with Analyses and Introductions* by B. Jowett 1871

Socratic Wisdom : The Model of Knowledge in Plato's Early Dialogues Hugh H. Benson Professor of Philosophy University of Oklahoma 2000-01-05 While the early Platonic dialogues have often been explored and appreciated for their ethical content, this is the first book devoted solely to the epistemology of Plato's early dialogues. Author Hugh H. Benson argues that the characteristic features of these dialogues-- Socrates' method of questions and answers (elenchos), his fascination

with definition, his professions of ignorance, and his thesis that virtue is knowledge--are decidedly epistemological. In this thoughtful study, Benson uncovers the model of knowledge that underlies these distinctively Socratic views. What emerges is unfamiliar, yet closer to a contemporary conception of scientific understanding than ordinary knowledge.

The Platonic Dialogues for English Readers. By W. Whewell Plato 1859

Failure to Disrupt Justin Reich 2020-09-29 A leader in educational technology separates truth from hype, explaining what tech can—and can't—do to transform our classrooms. Proponents of large-scale learning have boldly promised that technology can disrupt traditional approaches to schooling, radically accelerating learning and democratizing education. Much-publicized experiments, often underwritten by Silicon Valley entrepreneurs, have been launched at elite universities and in elementary schools in the poorest neighborhoods. Such was the excitement that, in 2012, the New York Times declared the "year of the MOOC." Less than a decade later, that pronouncement seems premature. In *Failure to Disrupt: Why Technology Alone Can't Transform Education*, Justin Reich delivers a sobering report card on the latest supposedly transformative educational technologies. Reich takes readers on a tour of MOOCs, autograders, computerized "intelligent tutors," and other educational technologies whose problems and paradoxes have bedeviled educators. Learning technologies—even those that are free to access—often provide the greatest benefit to affluent students and do little to combat growing inequality in education. And institutions and investors often favor programs that scale up quickly, but at the expense of true innovation. It turns out that technology cannot by itself disrupt education or provide shortcuts past the hard road of institutional change. Technology does have a crucial role to play in the future of education, Reich concludes. We still need new teaching tools, and classroom experimentation should be encouraged. But successful reform efforts will focus on incremental improvements, not the next killer app.

The Whole Critical Works of Monsieur Rapin ... Newly Translated Into English by Several Hands René Rapin 1706

Critical Approaches to Science and Philosophy Mario Bunge 2018-10-08 This collection of essays, written on four continents by scientists, philosophers and humanists, was initially presented to Karl R. Popper on his sixtieth birthday as a token of critical admiration and in recognition of his work. But the volume also stands on its own as a remarkable series of statements utilizing Popper's critical vision in the study of philosophy proper, logic, mathematics, science as method and theory, and finally to the study of society and history. What is remarkable is that Popper worked in all of these areas, not in a cursory or discursive way, but with the utmost clarity and rigor. . The core position of this volume and its contributors is that the progress of knowledge is not a linear accumulation of definitive acquisitions but a zigzagging process in which counterexamples and unfavorable evidence ruin generalizations and prompt the invention of more comprehensive and sometimes deeper generalizations, to be criticized in their turn. A critical approach to problems, procedures, and results in every field of inquiry is therefore a necessary condition for the continuance of progress. The title of this volume then is, in a sense, an homage to Popper's critical rationalism and critical empiricism. The essays are a tribute to his unceasing and uncompromising quest, not for final certainty, but for closer truth and increased clarity. Among the contributors are outstanding figures in philosophy and the exact sciences in their own right, including Herbert Feigl, R. M. Hare, J.O. Wisdom, Nicholas Rescher, David Bohm, Paul K. Feyerabend, F. A. Hayek, and Adolf Grunbaum. Social science contributions include Hans Albert on social science and moral philosophy, W. B. Gallie, on the critical philosophy of history, Pieter Geyl on The Open Society and its Enemies, and George H. Nadel on the philosophy of History.

Becoming God Patrick Lee Miller 2011-01-20 A lucid presentation of the first and most influential attempts to weave together philosophical thought on God, reason and happiness.
