Heidegger and Unconcealment Mark A. Wrathall 2010-11-01 This book includes ten essays that trace the notion of unconcealment as it develops from Heidegger's early writings to his later work, shaping his philosophy of truth, language and history. 'Unconcealment' is the idea that what entities are depends on the conditions that allow them to manifest themselves. This concept, central to Heidegger's work, also applies to worlds in a dual sense: first, a condition of entities manifesting themselves is the existence of a world; and second, worlds themselves are disclosed. The unconcealment or disclosure of a world is the most important historical event, and Heidegger believes there have been a number of quite distinct worlds that have emerged and disappeared in history. Heidegger's thought as a whole can profitably be seen as working out the implications of the original understanding of unconcealment.

Toward Natural Right and History Leo Strauss 2018-03-30 Natural Right and History is widely recognized as Strauss's most influential work. The six lectures, written while Strauss was at the New School, and a full transcript of the 1949 Walgreen Lectures show Strauss working toward the ideas he would present in fully matured form in his landmark work. In them, he explores natural right and the relationship between modern philosophers and the thought of the ancient Greek philosophers, as well as the relation of political philosophy to contemporary political science and to major political and historical events, especially the Holocaust and World War II. Previously unpublished in book form, Strauss's lectures are presented here in a thematic order that mirrors Natural Right and History and with interpretive essays by J. A. Colen, Christopher Lynch, Svetozar Minkov, Daniel Tanguay, Nathan Tarcov, and Michael Zuckert that establish their relation to the work. Rounding out the book are copious annotations and notes to facilitate further study.
