Proofs and Fundamentals Ethan D. Bloch 2013-12-01 The aim of this book is to help students write mathematics better. Throughout it are large exercise sets well-integrated with the text and varying appropriately from easy to hard. Basic issues are treated, and attention is given to small issues like not placing a mathematical symbol directly after a punctuation mark. And it provides many examples of what students should think and what they should write and how these two are often not the same.

Special Relativity for Beginners Jürgen Freund 2008 This book, first appearing in German in 2004 under the title Spezielle Relativit[ts]theorie f[ür] Studienanf[änger], offers access to the special theory of relativity for readers with a background in mathematics and physics comparable to a high school honors degree. All mathematical and physical competence required beyond that level is gradually developed through the book, as more advanced topics are introduced. The full tensor formalism, however, is dispensed with as it would only be a burden for the problems to be dealt with. Eventually, a substantial and comprehensive treatise on special relativity emerges which, with its gray-shaded formulary, is an invaluable reference manual for students and scientists alike.Some crucial results are derived more than once with different approaches: the Lorentz transformation in one spatial direction three times, the Doppler formula four times, the Lorentz transformation in two directions twice; also twice the unification of electric and magnetic forces, the velocity addition formula, as well as the aberration formula. Beginners will be grateful to find several routes to the goal; moreover, for a theory like relativity, it is of fundamental importance to demonstrate that it is self-contained and without contradictions.Author's website: www.relativity.ch.

Comprehensive Radiographic Pathology Ronald L. Eisenberg 2007 This complete foundational text and reference covers the core curriculum for radiography students with vivid illustrations and thoroughly updated content.

In the 4th edition of this highly-respected text, content is updated and modified to convey the pathology knowledge radiographers need at the appropriate comprehension level for better understanding. The book covers all of the essential information radiography students need, including disease processes, their radiographic appearance, and their treatment. Radiographers Notes in every chapter provide helpful suggestions for producing optimal radiographs for each organ system and teach students to deal effectively with varying patient needs. Thorough coverage of alternative imaging modalities encourages readers to think about other imaging modalities that may be needed to ensure proper diagnosis. Summary of diseases, their locations, their radiographic appearance, and treatment tables provide a review tool for students and a quick reference guide for practitioners. Treatment sections provide useful background on certain treatment and prognosis information for a more thorough understanding of pathology. Organized by body systems, information is easily located and convenient for studying one area at a time in a logical sequence. Written for radiographers, the text provides the most up-to-date, logically organized presentation of radiographic pathology available. Enhanced imaging appearances include multiple modalities such as SPECT, PET, CT, MR, ultrasound, and fusion. Now covers the pathology of hepatitis variations, SARS, anthrax, and Marfan's syndrome for more comprehensive information. An expanded discussion of how CT and MR are used to diagnose pathological processes helps students understand the benefits of using these scans. New and updated radiograph images of the newly added pathologies. More images for alternative modalities, including nuclear, ultrasound, PET, CT, and vascular imaging.

The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.
