The Friendly Orange Glow Brian Dear 2018-10-02 At a time when Steve Jobs was only a teenager and Mark Zuckerberg wasn't even born, a group of visionary engineers and designers—some of them only high school students—in the late 1960s and 1970s created a computer system called PLATO, which was light-years ahead in experimenting with how people would learn, engage, communicate, and play through connected computers. Not only did PLATO engineers make significant hardware breakthroughs with plasma displays and touch screens but PLATO programmers also came up with a long list of software innovations: chat rooms, instant messaging, message boards, screen savers, multiplayer games, online newspapers, interactive fiction, and emoticons. Together, the PLATO community pioneered what we now collectively engage in as cyberculture. They were among the first to identify and also realize the potential and scope of the social interconnectivity of computers, well before the creation of the internet. PLATO was the foundational model for every online community that was to follow in its footsteps. The Friendly Orange Glow is the first history to recount in fascinating detail the remarkable accomplishments and inspiring personal stories of the PLATO community. The addictive nature of PLATO both ruined many a college career and launched pathbreaking multimillion-dollar software products. Its development, impact, and eventual disappearance provides an instructive case study of technological innovation and disruption, project management, and missed opportunities. Above all, The Friendly Orange Glow at last reveals new perspectives on the origins of social computing and our internet-infatuated world.

Proofs and Fundamentals Ethan D. Bloch 2013-12-01 The aim of this book is to help students write mathematics better. Throughout it are large exercise sets well-integrated with the text and varying appropriately from easy to hard. Basic issues are treated, and attention is given to small issues like not placing a mathematical symbol directly after a punctuation mark. And it provides many examples of what students should think and what they should write and how these two are often not the same.

Greek Texts and Armenian Traditions Francesca Gazzano 2016-08-22 An interdisciplinary approach, crucial as it is in most fields of research, proves itself to be unescapable in the study of interactions between the ancient Armenian and Greek worlds and literatures. The volume arises from such an awareness and collects papers presented in a conference which has been organized in 2013 at the University of Genova, thanks to a cooperation with the Université Paris-Sorbonne, following in the footsteps of a tradition inaugurated by Giancarlo Bolognesi in the years '80 and '90. The subject is explored from many points of view: the topic of Armenian translations of Greek texts – with considerations of a methodological nature and the discussion of case-studies –, aspects which pertain to the historical context and the historiographical sources, the wide theme of the Armenian reception of Biblical, Christian and Byzantine literature, and finally philological, linguistic and lexical problems. The aim of this kind of research is to exploit the cooperation among classical philologists, linguists and Armenologists, in order to face the challenge of investigating a subject which requires many different competences.

Disrupting Class, Expanded Edition: How Disruptive Innovation Will Change the Way the World Learns Clayton Christensen 2010-09-17 Clay Christensen's groundbreaking bestselling work in education now updated and expanded, including a new chapter on Christensen's seminal "Jobs to Be Done" theory applied to education. "Provocatively titled, Disrupting Class is just what America's K-12 education system needs—a well thought-through proposal for using technology to better serve students and bring our schools into the 21st Century. Unlike so many education 'reforms,' this is not small-bore stuff. For that reason alone, it's likely to be resisted by defenders of the status quo, even though it's necessary and right for our kids. We owe it to them to make sure this book isn't merely a terrific read; it must become a blueprint for educational transformation." —Joel Klein, Chancellor of the New York City Department of Education "A brilliant teacher, Christensen brings clarity to a muddled and chaotic world of education." —Jim Collins, bestselling author of Good to Great "Just as iTunes revolutionized the music industry, technology has the potential to transform education in America so that every one of the nation's 50 million students receives a high quality education. Disrupting Class is a must-read, as it shows us how we can blaze that trail toward transformation." —Job Bush, former Governor of Florida According to recent studies in neuroscience, the way we learn doesn't always match up with the way we are taught. If we hope to stay competitive-academically, economically, and technologically-we need to rethink our understanding of intelligence, reevaluate our educational system, and reinventorize our commitment to learning. In other words, we need "disruptive innovation." Now, in his long-awaited new book, Clayton M. Christensen and coauthors Michael B. Horn and Curtis W. Johnson take one of the most important issues of our time-education-and apply Christensen's now-famous theories of "disruptive" change using a wide range of real-life examples. Whether you're a school administrator, government official, business leader, parent, teacher, or entrepreneur, you'll discover surprising new ideas, outside-the-box strategies, and straight-A success stories. You'll learn how: Customized learning will help many more students succeed in school Student-centric classrooms will increase the demand for new technology Computers must be disruptively deployed to every student Disruptive innovation can circumvent roadblocks that have prevented other attempts at school reform We can compete in the global classroom-and get ahead in the global market Filled with fascinating case studies, scientific findings, and unprecedented insights on how innovation must be managed, Disrupting Class will open your eyes to new possibilities, unlock hidden potential, and get you to think differently. Professor Christensen and his coauthors provide a bold new lesson in innovation that will help you make the grade for years to come. The future is now. Class is in session.

Disciple IV Abingdon Press 2005-05 DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

Calculus Earl W. Swokowski 2000-06 This edition of Swokowski's text is truly as its name implies: a classic. Groundbreaking in every way when first published, this book is a simple, straightforward, direct calculus text. It's popularity is directly due to its broad use of applications, the easy-to-understand writing style, and the wealth of examples and exercises which reinforce conceptualization of the subject matter. The author wrote this text with three objectives in mind. The first was to make the book more student-oriented by expanding discussions and providing more examples and figures to help clarify concepts. To further aid students, guidelines for solving problems were added in many sections of the text. The second objective was to stress the usefulness of calculus by means of modern applications of derivatives and integrals. The third objective, to make the text as accurate and error-free as possible, was accomplished by a careful examination of the exposition, combined with a thorough checking of each example and exercise.

Instructional Message Design Malcolm L. Fleming 1978 Abstract: A textbook and reference manual for instructional material designers bridges the gap between research and practice in instructional message design. Emphasis is placed on analyzing the instructional problem and testing possible solutions and providing instructional designers with authoritative guidelines for choosing or creating effective forms of instruction from broadly applicable and reliable research findings and principles. The basis of the text resides with how people perceive, memorize, form concepts, and develop attitudes from exposures to instructional messages. (wz)

Philosophy in Reality Joseph E. Brenner 2020-11-30 Philosophy in Reality offers a new vision of the relation between science and philosophy in the framework of a non-propositional logic of real processes, grounded in the physics of the real world. This logical system is based on the work of the Franco-Romanian thinker Stéphane Lupasco (1900-1988), previously presented by Joseph Brenner in the book Logic in Reality (Springer, 2008). The present book was inspired in part by the ancient Chinese Book of Changes (I Ching) and its scientific-philosophical discussion of change. The emphasis in Philosophy in Reality is on the recovery of dialectics and semantics from reductionist applications and their incorporation into a new synthetic paradigm for knowledge. Through an original re-interpretation of both classical and modern Western thought, this book addresses philosophical issues in scientific fields as well as long-standing conceptual problems such as the origin, nature and role of meaning, the unity of knowledge and the origin of morality. In a rigorous transdisciplinary manner, it discusses foundational and current issues in the physical sciences - mathematics, information, communication and systems theory and their implications for philosophy. The same framework is applied to problems of the origins of society, the transformation of reality by human subjects, and the emergence of a global, sustainable information society. In summary, Philosophy in Reality provides a wealth of new perspectives and references, supporting research by both philosophers and physical and social scientists concerned with the many facets of reality.

Then she ripped my heart out. But I'm not going to let that happen again. She's back. Invading my life and acting like she was the wronged one. The pain is still there, but I can't keep my eyes off her. I can't stop thinking about her and how much was left unsaid between us. Being this close is making me question everything I thought I knew about her. This time everything will be on my terms. Everything...
